We look forward to sharing the love of learning with your school.

Understanding Practice and Fluency (UPF)

Number and Algebra

Develop confidence with number sequences to 100 by ones from any starting point (ACMNA012)			
Quest: Whole number – counting (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Count forwards and backwards to 100	1	Counting forwards in ones within 100	<ul style="list-style-type: none"> count forwards in ones from any number up to 100 identify missing numbers on a number line up to 100
	2	Counting backwards in ones within 100	<ul style="list-style-type: none"> count backwards in ones from any number within 100 identify missing numbers on a number line up to 100
	3	Counting forwards and backwards in ones within 100	<ul style="list-style-type: none"> count forwards and backwards in ones from any number up to 100 identify missing numbers on a number line up to 100
Find numbers before and after to 100	1	Identifying numbers before and after up to 100	<ul style="list-style-type: none"> identify the number that comes before a given number up to 100;- describe this number as 'one more than' identify the number that comes after a given number up to 100;- describe this numbers as 'one less than' identify the number that comes before or after a given number up to 100;- describe this number as 'one more than' or 'one less than'
Identify ordinal numbers up to 31st	1	Using ordinal numbers up to 31st	<ul style="list-style-type: none"> read, write and use ordinal numbers in everyday situations, eg when reading a calendar
Count collections to 100 by partitioning numbers using place value (ACMNA014)			
Count collections 0 to 100	1	Counting collections 0 to 100	<ul style="list-style-type: none"> count everyday concrete materials using one-to-one correspondence
Use groups of 10 to count large collections	1	Using groups of ten to count large collections	<ul style="list-style-type: none"> count by systematically organising collections into groups of tens and then skip counting in tens record and describe the count, eg 'there are 4 groups of ten and 3 left over'
Identify place value up to 2 digits	1	Identifying the place value of digits in 2-digit numbers	<ul style="list-style-type: none"> write the numeral for a 2-digit number modelled using place value equipment identify the digit in the tens or ones column for a given 2-digit number
Solve problems using place value up to 2 digits	1	Solving problems using place value with 2-digit numbers	<ul style="list-style-type: none"> identify, record and model a number using place value clues, eg 'a 5 in the tens and a 2 in the ones' as 52 create the smallest and largest possible number using 2 digits
Partition 2-digit numbers (standard)	1	Using place value to partition 2-digit numbers	<ul style="list-style-type: none"> use place value equipment and models, eg tens frames, to partition a given 2-digit number into tens and ones model and describe a 2-digit number in both words and numerals, eg 53 as '5 tens and 3 ones' or '50 and 3' model a number expressed in words, eg '6 tens and 2 ones'
Partition 2-digit numbers (non-standard)	1	Partitioning 2-digit numbers using non-standard partitioning	<ul style="list-style-type: none"> use place value equipment and models, eg tens frames, to partition a given 2-digit number using non-standard partitioning, eg 35 as 2 tens and 15 ones model and identify a number from non-standard partitioning, eg recognise 4 tens and 13 ones as 53

NSW Curriculum Stage 1

Understanding Practice and Fluency (UPF)

Number and Algebra

Recognise, model, read, write and order numbers to at least 100; locate these numbers on a number line (ACMNA013)			
Quest: Whole number – place value (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Model, read, write and count 2-digit numbers	1		<ul style="list-style-type: none"> write the numerals and words, eg 'fifty three' for a 2-digit number represented using place value equipment or using pictures, drawings
	2	Counting in tens and ones	<ul style="list-style-type: none"> count in tens and then ones along a partially labelled number line to place a number, up to 100 use clues to identify a number on a number line, eg 3 tens and 7 ones as 37 count in tens and ones on a partially labelled number chart to position a number up to 100
Compare and order numbers to 100	1	Comparing numbers to 100	<ul style="list-style-type: none"> model and compare two 2-digit numbers using place value equipment compare two 2-digit numbers
	2	Ordering numbers to 100	<ul style="list-style-type: none"> order up to 4 consecutive numbers within 100 from smallest to largest or largest to smallest;- explain the reason for the order given order up to 4 non-consecutive numbers within 100 from smallest to largest or largest to smallest;- explain the reason for the order given
Round numbers up to 100	1	Rounding numbers up to 100 to the nearest 10	<ul style="list-style-type: none"> model a 2-digit number and recognise which ten it is nearer to;- explain reasoning round a 2-digit number to the nearest 10;- explain reasoning
Solve problems with 2-digit numbers on number lines	1	Solving place value problems with 2-digit numbers	<ul style="list-style-type: none"> use clues to identify numbers on a number line, eg use a number line to find out how many jumps of 10 from 12 make 52 use clues to identify a number on a number chart starting from any number, eg starting from 14 count on 4 groups of 10 to identify the new number
Recognise Australian coins	1	Recognising coins Australia	<ul style="list-style-type: none"> recognise the monetary value of Australian coins order Australian coins by value
Develop confidence with number sequences from 100 by ones from any starting point (ACMNA012)			
Quest: Whole number – counting (2)			
Count in ones up to 1000	1	Counting forwards in ones within 1000	<ul style="list-style-type: none"> count forwards in ones between 100 and 1000, starting from any number identify missing numbers in the hundreds on a number line up to 1000
	2	Counting backwards in ones within 1000	<ul style="list-style-type: none"> count backwards in ones between 100 and 1000, starting from any number identify missing numbers in the hundreds on a number line up to 1000
	3	Counting forwards and backwards in ones within 1000	<ul style="list-style-type: none"> count forwards and backwards in ones between 100 and 1000, starting from any number identify missing numbers in the hundreds on a number line up to 1000

Understanding Practice and Fluency (UPF)

Number and Algebra

Develop confidence with number sequences from 100 by ones from any starting point (ACMNA012)			
Quest: Whole number – counting (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Identify numbers before and after up to 1000	1	Identifying numbers before and after within 1000	<ul style="list-style-type: none"> identify the number that comes before a given 3-digit number up to 1000;- describe this number as 'one more than' identify the number that comes after a given 3-digit number up to 1000;- describe this numbers as 'one less than' identify the number that comes before or after a given 3-digit number up to 1000;- describe this number as 'one more than' or 'one less than'
Recognise, model, represent and order numbers to at least 1000 (ACMNA027)			
Quest: Whole number – place value (2)			
Read and represent 3-digit numbers	1	Reading and writing 3-digit numbers using numeral only	<ul style="list-style-type: none"> read a given 3-digit number in words, eg 456 says 'four hundred and fifty-six'
	2	Reading and writing 3-digit numbers using words and numerals	<ul style="list-style-type: none"> write a given 3-digit number in words, eg 456 as four hundred and fifty-six write the numerals for a 3-digit number given in words
	3	Representing 3-digit numbers using words, numerals and objects	<ul style="list-style-type: none"> model a given 3-digit number using concrete materials, pictures or drawings write the numerals and words, eg 'two hundred and fifty-three' for a 3-digit number represented using place value equipment or using pictures and drawings
Compare and order numbers to 1000	1	Comparing numbers to 1000	<ul style="list-style-type: none"> model and compare two 3-digit numbers using place value equipment compare two 3-digit numbers;- describe as 'more than' or 'less than', 'smaller than', greater than'
	2	Ordering numbers to 1000	<ul style="list-style-type: none"> order up to 4 consecutive numbers within 1000 in ascending order or descending order;- explain the reason for the order given order up to 4 non-consecutive numbers within 1000 in ascending order;- explain the reason for the order given
Investigate number sequences, initially those increasing and decreasing by twos, threes, fives and tens from any starting point, then moving to other sequences (ACMNA026)			
Quest: Whole number – sequences (2)			
Identify, describe and continue number sequences	1	Identifying and describing number patterns (1s, 2s, 5s, 10s, 25s) up to 100	<ul style="list-style-type: none"> identify and describe growing and shrinking patterns generated by the repeated addition or subtraction of 1s, 2s, 5s, 10s or 25s on a number line or number chart
	2	Counting forwards and backwards by 2s, 3s and 5s from any starting point	<ul style="list-style-type: none"> count forwards and backwards by 2s from any starting point count forwards and backwards by 5s from any starting point count forwards and backwards by 3s from any starting point identify sequences in 2s, 3s, or 5s in a number chart

Understanding Practice and Fluency (UPF)

Number and Algebra

Investigate number sequences, initially those increasing and decreasing by twos, threes, fives and tens from any starting point, then moving to other sequences (ACMNA026)			
Quest: Whole number – sequences (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Count in tens with 2- and 3-digit numbers	1	Counting in tens with 2-digit numbers, on the decade, using number lines and charts	<ul style="list-style-type: none"> count forwards and backwards in tens, on the decade, with 2-digit numbers using number lines count forwards and backwards in tens, on the decade, with 2-digit numbers and number charts
	2	Counting in tens with 3-digit numbers using number lines and charts	<ul style="list-style-type: none"> count forwards and backwards in tens, on the decade, with 3-digit numbers using number lines count forwards and backwards in tens, on the decade, with 3-digit numbers using number charts
	3	Counting in tens from any number with 2-digit numbers	<ul style="list-style-type: none"> count forwards and backwards in tens, off the decade, with 2-digit numbers using number lines count forwards and backwards in tens, off the decade, with 2-digit numbers using number charts
	4	Counting in tens from any number with 3-digit numbers	<ul style="list-style-type: none"> count forwards and backwards in tens, off the decade, with 3-digit numbers using number lines count forwards and backwards in tens, off the decade, with 3-digit numbers using number charts
Find numbers 10 before and 10 after up to 1000	1	Finding numbers 10 before and 10 after a 2-digit number on the decade	<ul style="list-style-type: none"> find the number '10 before' or '10 after' a given 2-digit on the decade number using number lines and number charts
	2	Finding numbers 10 before and 10 after a 2-digit and 3-digit number off the decade	<ul style="list-style-type: none"> find the number '10 before' or '10 after' a given 2-digit or 3-digit number off the decade, using number lines and number charts
Group, partition and rearrange collections of up to 1000 in hundreds, tens and ones to facilitate more efficient counting (ACMNA028)			
Quest: Whole number – partition and group (2)			
Identify place value in 3-digit numbers	1	Identifying the place value of digits in 3-digit numbers	<ul style="list-style-type: none"> write the numeral for a 3-digit number modelled using place value equipment identify the digit in the hundreds, tens or ones column for a given 3-digit number recognise that the value of the digit is determined by its place value, eg in 689 the digit 8 has a place value of tens and a total value of 80 identify, record and model a number using place value clues, eg 'a 5 in the hundreds and a 2 in the ones' as 502 recognise the role of zero as a placeholder create the smallest and largest numbers possible using 3 digits

Understanding Practice and Fluency (UPF)

Number and Algebra

Group, partition and rearrange collections of up to 1000 in hundreds, tens and ones to facilitate more efficient counting (ACMNA028)			
Quest: Whole number – partition and group (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Count in hundreds, tens and ones	1	Counting in hundreds, tens and ones	<ul style="list-style-type: none"> count in hundreds, tens and then ones along a partially labelled number line to place a number between 100 and 1000 use clues to identify a number between 100 and 1000 on a number line, eg 3 hundreds, 5 tens and 7 ones as 357 count in hundreds, tens and ones on a partially labelled number chart to position a number between 100 and 1000
Partition 3-digit numbers (standard)	1	Using place value to partition 3-digit numbers	<ul style="list-style-type: none"> use place value equipment to partition a given 3-digit number into hundreds, tens and ones describe a 3-digit number using words, eg 523 as '5 hundreds, 2 tens and 3 ones' write a 3-digit number in expanded notation, eg 523 as $500 + 20 + 3$ write the numeral for a number represented by expanded notation recognise zero as a placeholder
Partition 3-digit numbers (non-standard)	1	Partitioning 3-digit numbers using non-standard partitioning	<ul style="list-style-type: none"> use place value equipment to partition a given 3-digit number using non-standard partitioning, eg 375 as 2 hundreds and 175 ones or $200 + 175$ model and identify a number from non-standard partitioning, eg recognise 3 hundreds, 4 tens and 27 ones or $300 + 40 + 27$ as 367
Round numbers up to 1000 to the nearest 100	1	Rounding numbers up to 1000 to the nearest 100	<ul style="list-style-type: none"> model a 3-digit number and recognise which hundred it is nearer to; explain reasoning round a 3-digit number to the nearest 100, recognise the digit in the tens column as the key digit
Count and order small collections of Australian coins and notes according to their value (ACMNA034)			
Quest: Whole number – money (2)			
Count and order Australian notes and coins	1	Recognising notes and coins Australia	<ul style="list-style-type: none"> recognise the value of all Australian coins and notes recognise that there are 100 cents in 1 dollar recognise and generate combinations of the same and different denominations of coins that make \$1
	2	Counting totals using notes and coins of the same denomination Australia	<ul style="list-style-type: none"> determine the total amount of money by counting the value of notes of the same denomination
	3	Using notes and coins to make amounts Australia#values up to \$100 only	<ul style="list-style-type: none"> combine amounts of notes and coins to make a given amount of money shown in dollars and cents (no decimal point)
	4	Calculating totals of notes and coins and record using symbols Australia#values up to \$100 only	<ul style="list-style-type: none"> calculate the total value of a group of notes and coins and record this value in dollars and cents using the correct symbols (no decimal point)
	5	Recognising that the same value can be created using different combinations of coins Australia#values up to \$100 only Recognising that the same value can be created using different combinations of notes Australia#values up to \$100 only	<ul style="list-style-type: none"> generate and recognise different combinations of coins that have the same value (combining coins of the same denominations and different denominations) and record these using the symbol c generate and recognise different combinations of notes that have the same value (combining notes of the same denominations and different denominations) and record these using the symbol \$

Understanding Practice and Fluency (UPF)

Number and Algebra

Represent and solve simple addition and subtraction problems using a range of strategies, including counting on, partitioning and rearranging parts (ACMNA015)			
Quest: Addition and subtraction (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Model and record combinations that make 5 – 9	1	Modelling and recording combinations that add up to 5	<ul style="list-style-type: none"> model and record with numerals, the patterns of numbers that add to 5 find the missing number to add to 5 when one number is given
	2	Modelling and recording combinations that add up to 6	<ul style="list-style-type: none"> model and record with numerals, the patterns of numbers that add to 6 find the missing number to add to 6 when one number is given
	3	Modelling and recording combinations that add up to 7	<ul style="list-style-type: none"> model and record with numerals the patterns of numbers that add to 7 find the missing number to add to 7 when one number is given
	4	Modelling and recording combinations that add up to 8	<ul style="list-style-type: none"> model and record the patterns of numbers that add to 8 find the missing number to add to 8 when one number is given
	5	Modelling and recording combinations that add up to 9	<ul style="list-style-type: none"> model and record the patterns of numbers that add to 9 find the missing number to add to 9 when one number is given
Model and record combinations that make 11 – 20	1	Modelling and recording combinations that add to numbers from 11 to 20	<ul style="list-style-type: none"> model and recognise the relationship between numbers to 10 and numbers to 20 using models eg tens frames eg $5 + 4 = 9$ and $15 + 4 = 19$ use the additions to 10 to record the combinations of numbers that add to between 11 and 20
Recognise and recall bonds to 10	1	Recognising and recalling bonds to 10	<ul style="list-style-type: none"> recognise pairs of numbers that add to 10 find the missing number to add to 10 given one number recall and record the bonds that add to 10
Add zero to a number (up to 20)	1	Adding zero to a number (up to 20)	<ul style="list-style-type: none"> investigate and recognise the effect of adding zero to a number;- generalise that adding zero does not change the number
Introduce the commutative property of addition	1	Introducing the commutative property of addition	<ul style="list-style-type: none"> represent and solve an addition problem both ways using concrete materials and models eg $5 + 4$ or $4 + 5$ swap an addition problem around so the larger number comes first and add by counting on (within 20)
Add and subtract by counting on/ back up to 100	1	Counting on and back to add and subtract up to 100	<ul style="list-style-type: none"> count on or back to add and subtract with numbers up to 100
Add doubles up to 20	1	Recalling doubles up to 10	<ul style="list-style-type: none"> recall doubles and add doubles to 10 fluently
	2	Adding doubles up to 20	<ul style="list-style-type: none"> add doubles with and without using models (up to 20)
Add and subtract near doubles	1	Adding doubles or near doubles	<ul style="list-style-type: none"> solve addition problems using doubles, eg $4 + 3 + 4$ as $4 + 4 + 3$ model and solve addition problems with near doubles, eg $5 + 7$ as $5 + 5 + 2 = 12$
	2	Subtracting using doubles	<ul style="list-style-type: none"> model and solve subtraction problems using doubles, eg $14 - 7$ as $7 + 7 = 14$ or $15 - 8$ as $7 + 7 + 1 = 15$

Understanding Practice and Fluency (UPF)

Number and Algebra

Represent and solve simple addition and subtraction problems using a range of strategies, including counting on, partitioning and rearranging parts (ACMNA015)			
Quest: Addition and subtraction (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Find the difference between 2 numbers (to 20)	1	Finding the difference between 2 numbers (up to 20)	<ul style="list-style-type: none"> represent two numbers using concrete materials and a number line eg place value equipment and a number line;- compare the materials and count from the smaller number to find the difference find the missing number in an addition problem eg $4 + ? = 9$ solve word problems which involve finding the difference between two numbers
Add compatible numbers (doubles or bonds to 10)	1	Adding using compatible numbers and manipulatives for support	<ul style="list-style-type: none"> find compatible numbers (bonds to 10 or doubles) to add a list of 1-digit numbers, eg $6 + 3 + 4 + 3$
Add and subtract using bridging to 10 up to 100	1	Bridging to ten to add a 1-digit and 1-digit number using models and diagrams	<ul style="list-style-type: none"> add to the nearest ten first then add the rest, using models for support, eg $8 + 7$ as $8 + 2 = 10$ and $10 + 5 = 15$ record the strategy of bridging to ten using numbers and/or models, eg number lines
	2	Bridging to ten to add a 2-digit and 1-digit number using models and diagrams	<ul style="list-style-type: none"> add to the nearest ten first then add the rest, using models for support, eg $28 + 7$ as $28 + 2 = 30$ and $30 + 5 = 35$ record the strategy of bridging to ten using numbers and/or models, eg number lines
	3	Bridging to ten to subtract a 1-digit number from a 2-digit number using models and diagrams	<ul style="list-style-type: none"> subtract to the nearest ten first then subtract the rest, using models for support, eg $32 - 6$ as $32 - 2 = 30$ and $30 - 4 = 26$ record the strategy of bridging to ten using numbers and/or models eg number lines
	4	Bridging to ten to mentally add or subtract a 1-digit and 2-digit number	<ul style="list-style-type: none"> use bridging to ten to solve addition and subtraction problems with 1- and 2-digit numbers use bridging to ten to solve addition and subtraction problems with 1- and 2-digit numbers where the change is unknown, eg $25 + ? = 32$
Add using place value up to 100	1	Adding 2-digit and 1-digit numbers using place value partitioning with models (split strategy)	<ul style="list-style-type: none"> model and solve the addition of a 2-digit and 1-digit number using place value equipment, eg use base 10 blocks to show $25 + 8$ as $20 + 5 + 8$ and then $20 + 13 = 33$
	2	Adding 2-digit and 1-digit numbers using place value understanding (split strategy)	<ul style="list-style-type: none"> mentally solve the addition of a 2-digit and 1-digit number using place value partitioning
Solve addition and subtraction word problems	1	Creating and solving simple addition and subtraction word problems in context (within 20)	<ul style="list-style-type: none"> represent a word problem as an addition or subtraction number sentence solve a variety of simple addition and subtraction word problems in context, eg find the difference, find the sum, change unknown, start unknown simple addition and subtraction word problems explain and compare strategies used to solve addition and subtraction word problems

Understanding Practice and Fluency (UPF)

Number and Algebra

Represent and solve simple addition and subtraction problems using a range of strategies, including counting on, partitioning and rearranging parts (ACMNA015)			
Quest: Addition and subtraction (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Explore equality and inequality up to 10 and 20	1	Exploring equality and inequality (up to 10)	<ul style="list-style-type: none"> create a set in which the number of objects is greater than, less than or equal to the number of objects in a given set determine if 2 given concrete sets are equal or unequal and explain the process used
	2	Exploring equality and inequality (up to 20)	<ul style="list-style-type: none"> create a set in which the number of objects is greater than, less than or equal to the number of objects in a given set determine if 2 given concrete sets are equal or unequal and explain the process used
	3	Recognising equality in addition and subtraction number sentences using objects and models for support	<ul style="list-style-type: none"> determine if equations involving addition or subtraction are true or false, eg $6 = 6$, $7 = 8 - 1$, $5 + 2 = 2$
Explore the connection between addition and subtraction (ACMNA029)			
Quest: Addition and subtraction (2)			
Find fact families for addition and subtraction	1	Finding fact families for addition and subtraction (between 10 and 20)	<ul style="list-style-type: none"> find the other three facts given one fact, eg $12 + 5 = 17$
	2	Finding fact families for addition and subtraction (within 30)	<ul style="list-style-type: none"> find the other three facts given one fact, eg $12 + 5 = 17$
Solve simple addition and subtraction problems using a range of efficient mental and written strategies (ACMNA030)			
Use mental strategies to add and subtract (to 100)	1	Adding with 1 digit to/from 2-digit numbers using efficient mental strategies (max sum 100)	<ul style="list-style-type: none"> select, use and record an efficient strategy to solve an addition problem, eg counting on, bridging to ten, split strategy, jump strategy, place value
	2	Subtracting with 1 digit to/from 2-digit numbers using efficient strategies	<ul style="list-style-type: none"> select, use and record an efficient strategy to solve the subtraction of a 1-digit number from a 2-digit number, eg counting back, bridging to ten, inverse relationship with addition, jump strategy (max sum 100)
	3	Adding and subtracting 1 digit to/from 2-digit numbers using efficient strategies (max sum 100)	<ul style="list-style-type: none"> select, use and record an efficient strategy to solve an addition or subtraction problem (max sum 100)
Add and subtract tens from a 2-digit number	1	Adding tens to a 2-digit number using models and/or equipment for support	<ul style="list-style-type: none"> add ten and multiples of ten to a give 2-digit number, eg $36 + 20 = 56$ (max sum 100)
	2	Subtracting tens from a 2-digit number using models and/or equipment for support	<ul style="list-style-type: none"> subtract ten and multiples of ten to a give 2-digit number, eg $36 - 20 = 16$ (max sum 100)

Understanding Practice and Fluency (UPF)

Number and Algebra

Solve simple addition and subtraction problems using a range of efficient mental and written strategies (ACMNA030)			
Quest: Addition and subtraction (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Introduce place value to add and subtract (to 200)	1	Introducing the addition of two 2-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> use an empty number line to model and solve the addition of two 2-digit numbers, eg solve $35 + 43$ as $35 + 10 + 10 + 10 + 10 = 75$ then $75 + 1 + 1 + 1 = 78$ (max sum 100)
	2	Introducing subtraction of two 2-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> use an empty number line to model and solve the subtraction of two 2-digit numbers by counting back, eg solve $52 - 23$ as $52 - 10 - 10 = 32$ then $32 - 1 - 1 - 1 = 29$ (max sum 100)
	3	Introducing the mental addition and subtraction of two 2-digit numbers using place value understanding (jump strategy)	<ul style="list-style-type: none"> mentally solve the addition or subtraction of two 2-digit numbers using place value partitioning (max sum 100)
Use place value to add and subtract (to 200)	1	Adding two 2-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> use an empty number line to model and solve the addition of two 2-digit numbers, eg solve $35 + 43$ as $35 + 40 = 75$ then $75 + 3 = 78$
	2	Subtracting two 2-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> use an empty number line to model and solve the subtraction of two 2-digit numbers by counting back, eg solve $52 - 23$ as $52 - 20 = 32$ then $32 - 3 = 29$ (max sum 100)
	3	Adding tens and ones using place value equipment and a split strategy (no crossing tens)	<ul style="list-style-type: none"> model and solve the addition of two 2-digit numbers represented horizontally using place value equipment (not crossing ten), eg use base 10 blocks to model $34 + 12$ as $30 + 10$ and $4 + 2$ (max sum 100)
	4	Subtracting tens and ones using place value equipment and a split strategy (no crossing tens)	<ul style="list-style-type: none"> model and solve the subtraction of two 2-digit numbers represented horizontally using place value equipment (not crossing ten), eg use base 10 blocks to model $34 - 12$ as $30 - 10$ and $4 - 2$
Use place value (no models) to add and subtract	1	Adding and subtracting tens and ones mentally using place value understanding (no crossing tens)	<ul style="list-style-type: none"> solve the addition or subtraction of two 2-digit numbers represented horizontally (no crossing ten) check calculations by doing the inverse operation
	2	Adding and subtracting two 2-digit numbers mentally using place value understanding	<ul style="list-style-type: none"> mentally solve the addition or subtraction of two 2-digit numbers using a jump strategy, eg solve $35 + 43$ as $35 + 40 = 75$ then $75 + 3 = 78$ (max sum 100) check calculations by doing the inverse operation
Use place value to add (crossing a 10)	1	Adding two 2-digit numbers using place value models (split strategy)	<ul style="list-style-type: none"> use place value equipment to model and solve the addition of two 2-digit numbers using standard partitioning, eg $37 + 45$ as $30 + 40$ and $7 + 5$
Subtract using addition	1	Subtracting two 2-digit numbers using addition	<ul style="list-style-type: none"> recognise and model the inverse relationship between addition and subtraction rearrange a subtraction problem into an addition problem with change unknown and then use an effective addition strategy to solve, eg using a jump strategy to solve $54 - 38$ as $38 + ? = 54$ on a number line

Understanding Practice and Fluency (UPF)

Number and Algebra

Solve simple addition and subtraction problems using a range of efficient mental and written strategies (ACMNA030)

Quest: Addition and subtraction (2)

Learning Journey	Steps	Spine Nodes	Subnodes
Solve word problems with start or change unknown	1	Solving addition and subtraction word problems where either the start or the is change unknown (1-digit and 2-digit numbers)	<ul style="list-style-type: none"> solve word problems where the start is unknown, eg 'Anna had some plums. Sam gave her 5 more. Now she has 13 plums. How many did she have to start with?' solve word problems where the change is unknown, eg 'Anna has 5 plums. How many more does she need to have 13?' or 'Anna had 13 plums. She gave some to Sam. Now she has 7 plums. How many plums did she give to Sam?' solve word problems involving comparisons, eg Anna has 13 plums. Sam has 7 plums. How many more plums does Anna have? or Anna has 7 more plums than Sam. Sam has 5 plums. How many plums does Anna have?
Add and subtract using rounding and compensating	1	Adding 10 then compensating to add a single digit (7, 8 or 9) to a 1- or 2-digit number	<ul style="list-style-type: none"> add 10 first then subtract to compensate using models for support, eg, $6 + 9$ as $6 + 10 = 16$ then $16 - 1 = 15$ record the strategy adding 10 then compensating to add a single digit (7, 8 or 9) using numbers and/or models, eg, number lines
	2	Subtracting 10 then compensating to subtract a single digit (7, 8 or 9) from a 2-digit number	<ul style="list-style-type: none"> subtract 10 first then add to compensate using models for support, eg, $15 - 9$ as $15 - 10 = 5$ then $5 + 1 = 6$ record the strategy subtracting 10 then compensating to subtract a single digit (7, 8 or 9) using numbers and/or models, eg, number lines

Skip count by twos, fives and tens starting from zero (ACMNA012)

Quest: Mult/div – skip counting (1)

Skip count by 2s	1	Using skip counting by 2s from zero up to 20	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 2s from zero
	2	Using skip counting by 2s from any multiple of 2 up to 50	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 2s from any multiple of 2
Skip count by 5s	1	Using skip counting by 5s from zero up to 20	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 5s from zero
	2	Using skip counting by 5s from zero up to 50	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 5s from zero

Understanding Practice and Fluency (UPF)

Number and Algebra

Skip count by twos, fives and tens starting from zero (ACMNA012)			
Quest: Mult/div – skip counting (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Skip count by 10s	1	Counting by skip counting forwards by 10s from zero up to 50	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 10s from zero
	2	Counting by skip counting backwards by 10s from numbers up to 50	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count backwards by 10s
	3	Counting by skip counting forwards by 10s from zero up to 100	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 10s from zero recognise an error in the skip counting sequence
	4	Counting by skip counting backwards by 10s from up to 100	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count backwards by 10s recognise an error in the skip counting sequence
	5	Counting by skip counting forwards or backwards by 10s from zero up to 100	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count forwards and backwards by 10s from zero
Skip count by 2s, 5s and 10s		Counting by skip counting forwards or backwards by 10s from zero up to 100	<ul style="list-style-type: none"> recognise an error in the skip counting sequence
	1	Counting by skip counting in 2s, 5s, 10s from zero to 50	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 2s, 5s, 10s from zero
	2	Finding 'how many' objects using skip counting by 2, 5 or 10 up to 50	<ul style="list-style-type: none"> use skip counting by 2, 5 or 10 to determine 'how many' when objects are grouped or shared equally
	3	Counting by skip counting in 2s, 5s, 10s from zero to 100	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/charts to skip count by 2s, 5s, 10s from zero
	4	Finding 'how many' objects using skip counting by 2, 5 or 10 up to 100	<ul style="list-style-type: none"> use skip counting by 2, 5 or 10 to determine 'how many' when objects are grouped or shared equally
Model and use equal groups of objects as a strategy for multiplication			
Quest: Mult/div – equal groups (1)			
Use groups and skip counting to solve problems	1	Grouping and skip counting to solve simple multiplication problems	<ul style="list-style-type: none"> record both the number of groups and the number in each group by completing stem sentences, eg '5 children with 2 marbles each makes 10 marbles altogether'
Recognise and represent division as grouping into equal sets (ACMNA032)			
Share objects to divide	1	Sharing objects to divide up to 20	<ul style="list-style-type: none"> share a collection of objects equally into a given number of groups using concrete materials, models or drawings, eg '15 balloons shared by 3 children, how many balloons will they each get?' relate to multiplication by recombining the groups, eg by counting or skip counting to check the total number of objects solve simple division problems by sharing into equal groups explain how to share a group of objects to divide and describe the number of groups and the number in each group using stem sentences; when sharing into 2 groups students may refer to one group as being 'one half'

Understanding Practice and Fluency (UPF)

Number and Algebra

Recognise and represent division as grouping into equal sets (ACMNA032)			
Quest: Mult/div – equal groups (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Share objects to divide	2	Sharing objects to divide (with leftovers) up to 20	<ul style="list-style-type: none"> share a collection of objects equally into a given number of groups using concrete materials, models or drawings;- recognise that there are 'leftovers' describe the part left over when a collection cannot be shared equally describe the number of groups and the number in each group
Group objects to divide	1	Grouping objects to divide (groups of 2, 5 or 10)	<ul style="list-style-type: none"> share a collection of objects equally into groups of a given size using concrete materials, models or drawings, eg 'there are 15 balloons tied into bunches of 5, how many bunches of balloons are there?' relate to multiplication by recombining the groups, eg skip counting to check the total number of objects solve simple division problems by grouping objects equally describe the number of groups and the number in each group;- when sharing into 2 groups students may refer to one group as being 'one half'
	2	Grouping objects to divide (with leftovers)	<ul style="list-style-type: none"> share a collection of objects equally into groups of a given size using concrete materials, models or drawings;- recognise that there are 'leftovers' describe the part left over when a collection cannot be shared equally describe the number of groups and the number in each group;- when sharing into 2 groups students may refer to one group as being 'one half'
Recognise and represent multiplication as repeated addition, groups and arrays (ACMNA031)			
Quest: Mult/div – models, repeated addition (2)			
Use repeated addition to multiply	1	Using repeated addition to multiply	<ul style="list-style-type: none"> recognise and describe the relationship between, eg 3 groups of 4 as $4 + 4 + 4$ use empty number lines and number charts to help solve multiplication problems using repeated addition (2s, 5s, 10s, 3s, 4s) explore the use of repeated addition to count in practical situations apply known facts, such as doubles, to repeated addition problems, eg $5 + 5 + 5 + 5$ as $10 + 10$
Explore arrays (no x symbol)	1	Introducing arrays and describing arrays (no x symbol)	<ul style="list-style-type: none"> describe simple multiplication problems represented in arrays using '_ groups of _' and use 'rows' and 'columns' to describe the parts of the array represent simple multiplication problems using arrays (concrete materials, pictures or diagrams) recognise and describe practical examples of arrays, eg seedling trays, seating arrangements
Use the commutative property of multiplication	1	Introducing the commutative law of multiplication	<ul style="list-style-type: none"> use concrete materials or drawings of groups or arrays to model the commutative law, eg 3 groups of 2 is the same as 2 groups of 3

Understanding Practice and Fluency (UPF)

Number and Algebra

Represent division as grouping into equal sets and solve simple problems using these representations (ACMNA032)			
Quest: Mult-div – equal groups (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Divide by sharing and grouping	1	Dividing by sharing (up to 50)	<ul style="list-style-type: none"> model and solve division problems by equally sharing a collection into a given number of groups or number of columns/rows in an array record answers to division problems using drawings, words and numerals;- complete stem sentences eg 'when _ is shared into _ equal groups there are _ in each group' describe any parts left over when the collection is not able to be equally shared
	2	Dividing by grouping (up to 50)	<ul style="list-style-type: none"> model and solve division problems sharing a collection of objects into groups of a given size, and by arranging it into rows or columns of a given size in an array, eg determine the number of columns in an array when 20 objects are arranged into rows of 4 record answers to division problems using drawings, words and numerals;- complete stem sentences, eg 'when _ is shared into _ equal groups there are _ in each group' describe any parts left over when the collection is not able to be equally shared
Use repeated subtraction to divide	1	Using repeated subtraction to divide	<ul style="list-style-type: none"> solve division problems (group size known, number of groups unknown) using repeated subtraction and concrete materials, models or drawings of groups or arrays use an empty number line or number chart to represent division problems as repeated subtraction (group size known ... number of groups unknown) explore the use of repeated subtraction in practical situations
Solve simple multiplication problems (2,5,10x)	1	Solving simple multiplication and division problems using models and manipulatives (2x, 5x, 10x)	<ul style="list-style-type: none"> recognise a simple word problem as a division or multiplication problem record answers to multiplication and division problems using drawings, words and numerals, eg '2 rows of 5 is 10'
Recognise and describe one-half as one of two equal parts of a whole (ACMNA016)			
Quest: Fractions and decimals (1)			
Find half of a set or quantity (no symbols)	1	Finding half of a set or quantity (no symbols)	<ul style="list-style-type: none"> find half of a set using equal sharing find halves of quantities (up to 10) find the whole from a half
Find half of a set or quantity (symbols)	1	Finding half of a set or quantity (symbols used)	<ul style="list-style-type: none"> find half of a set using equal sharing find halves of quantities (up to 10) find the whole from one half use the symbols to represent the fraction $\frac{1}{2}$
Recognise and interpret common uses of halves, quarters and eighths of shapes and collections (ACMNA033)			
Quest: Fractions and decimals (2)			
Explore the meaning of fraction symbols	1	Understanding the meaning of fraction symbols (no formal use of numerator or denominator)	<ul style="list-style-type: none"> recognise the top number tells how many parts are selected recognise the bottom number tells how many parts the whole has been split into (the name of the fraction / size of the part) recognise the larger denominator = smaller parts as the whole has been split into more pieces

Understanding Practice and Fluency (UPF)

Number and Algebra

Recognise and interpret common uses of halves, quarters and eighths of shapes and collections (ACMNA033)			
Quest: Fractions and decimals (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Find quarters of sets or shapes (no symbols)	1	Introducing quarters of objects, sets or shapes (no symbols)	<ul style="list-style-type: none"> recognise objects, shapes or set shared into 4 equal parts recognise that the same shape or object can be shared into 4 equal parts in different ways find the whole given quarter(s) use language 'one quarter', 'two quarters' and so on;- use words to describe fractions of sets and quantities eg 'one quarter of 12 is 3'
	2	Finding quarters by halving	<ul style="list-style-type: none"> find a quarter of a shape or region by halving and halving again find a quarter of a set by halving and halving again, eg, one quarter of 12 is 3, because $1/2$ of 12 = 6 and $1/2$ of 6 = 3
Find quarters of sets or shapes (symbols)	1	Introducing quarters of objects, sets or shapes (symbols used)	<ul style="list-style-type: none"> recognise objects, shapes or set shared into 4 equal parts;- recognise that the same shape or object can be shared into 4 parts in different ways find $1/4$, $2/4$ and $3/4$ of objects, shapes, lengths or sets find the whole given quarter(s) use symbols to represent fractions: $1/4$, $2/4$, $3/4$, $4/4$ record quarters of sets as a number sentence, eg $1/4$ of 12 = 3
Find halves and quarters (no symbols)	1	Finding halves and quarters of objects, shapes or sets (no symbols)	<ul style="list-style-type: none"> recognise equivalence find halves and quarters of objects and shapes find halves and quarters of sets find the whole from a part find halves and quarters of uneven partitioned shapes use language 'one half', 'two halves', 'one quarter', 'two quarters' and so on
	2	Recognising equivalence between halves and quarters of objects, shapes or sets up to 1 (symbols used)	<ul style="list-style-type: none"> relate halves and quarters and know that $1/2$ is the same as $2/4$ know that there are 2 quarters in 1 half show equivalent halves and quarters using concrete materials and models.
Find halves and quarters (symbols)	1	Finding halves and quarters of linear models or sets (symbols used)	<ul style="list-style-type: none"> find halves and quarters of objects and shapes find halves and quarters of sets find the whole from a part find halves and quarters of uneven partitioned shapes use language 'one half', 'two halves', 'one quarter', 'two quarters' and so on use symbols to represent fractions: $1/2$, $2/2$, $1/4$, $2/4$, $3/4$, $4/4$
	2	Recognising equivalence between halves and quarters of linear models or sets (symbols used)	<ul style="list-style-type: none"> relate halves and quarters and know that $1/2$ is the same as $2/4$ know that there are 2 quarters in 1 half show equivalent halves and quarters using concrete materials and models.

Understanding Practice and Fluency (UPF)

Number and Algebra

Recognise and interpret common uses of halves, quarters and eighths of shapes and collections (ACMNA033)			
Quest: Fractions and decimals (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Find eighths of objects or shapes	1	Introducing eighths of objects or shapes (no fractional notation)	<ul style="list-style-type: none"> find eighths of objects and shapes recognise equivalence with halves and quarters
	2	Introducing eighths of objects or shapes	<ul style="list-style-type: none"> find eighths of objects and shapes recognise equivalence with halves and quarters use the language of 'one eighth', 'two eighths' and so forth along with standard fractional notation
Find halves, quarters and eighths of shapes	1	Finding halves, quarters and eighths of objects or shapes (no fractional notation)	<ul style="list-style-type: none"> recognise equivalence estimate the size of a fractional part before using, eg paper folding to check or estimate the size of the whole from the part find the whole from a part find halves, quarters and eighths of uneven partitioned shapes recognise that the larger number of parts means that the parts are smaller
Investigate and describe number patterns formed by skip counting and patterns with objects (ACMNA018)			
Quest: Patterns and algebra (1)			
Explore repeating numeric patterns	1	Identifying, extending and describing repeating numeric patterns	<ul style="list-style-type: none"> identify and extend through investigation, numeric repeating patterns, eg 1, 2, 1, 2, 1, 2, describe numeric repeating patterns
Explore repeating patterns with objects	1	Recognising and describing repeating patterns with objects and symbols	<ul style="list-style-type: none"> recognise and describe repeating patterns using objects and symbols;- recognise and correct errors in patterns
	2	Copying repeating patterns using objects and symbols	<ul style="list-style-type: none"> copy repeating patterns using objects and symbols
	3	Continuing repeating patterns with objects and symbols	<ul style="list-style-type: none"> continue repeating patterns using objects and symbols
Relate number and object patterns	1	Relating patterns with objects and symbols to number patterns	<ul style="list-style-type: none"> describe and relate a pattern to the corresponding number pattern, eg circle, square, circle, square ... is a 'two pattern' skip count to count the total objects in a pattern, eg count the total number of objects in a 'two pattern' by skip counting the groups of objects in 2s
Explore number patterns (1, 2, 5, 10)	1	Exploring skip counting patterns with multiples of 1s, 2s, 5s and 10s using concrete materials	<ul style="list-style-type: none"> identify and describe patterns when skip counting forwards or backwards by 1s, 2s, 5s and 10s from any starting point, eg 'all these numbers end in five or zero' investigate and solve problems based on number patterns
	2	Representing and describing number patterns (2s, 5s or 10s)	<ul style="list-style-type: none"> represent number patterns (skip counting in multiples of 1s, 2s, 5s or 10s from any number) on a number line or number chart describe the number pattern represented, eg 'this number pattern goes up in 5s'

Understanding Practice and Fluency (UPF)

Number and Algebra

Investigate and describe number patterns formed by skip counting and patterns with objects (ACMNA018)			
Quest: Patterns and algebra (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Additive and subtractive patterns (within 5)	1	Recognising and describing additive and subtractive number patterns (within 5)	<ul style="list-style-type: none"> recognise and describe given number patterns that increase or decrease, eg 'the numbers are going up'
	2	Copying additive and subtractive number patterns (within 5)	<ul style="list-style-type: none"> copy given number patterns that increase or decrease, eg 1, 2, 3, 4, ... 20, 18, 16, 14, ...
	3	Extending additive and subtractive number patterns (within 5)	<ul style="list-style-type: none"> continue given number patterns that increase or decrease, eg 1, 2, 3, 4, ... 20, 18, 16, 14, ...
Odd and even number patterns (up to 20)	1	Modelling odd and even number patterns up to 20	<ul style="list-style-type: none"> model odd and even numbers using objects such as counters paired in 2 rows describe the pattern created using the terms 'odd' or 'even' numbers
Describe patterns with numbers and identify missing elements (ACMNA035)			
Quest: Patterns and algebra (2)			
Number patterns (1, 2, 5, 10, 25 up to 100)	1	Identifying and describing number patterns (1s, 2s, 5s, 10s, 25s) up to 100	<ul style="list-style-type: none"> identify and describe growing and shrinking patterns generated by the repeated addition or subtraction of 1s, 2s, 5s, 10s or 25s on a number line or number chart
Add or subtract patterns (within 10) up to 100	1	Extending, completing and describing simple additive or subtractive number patterns with 1 operation (within 10) up to 100	<ul style="list-style-type: none"> determine a missing number in a number pattern, eg 3, 7, 11, ..., 19 describe a number pattern in words, eg 'It goes up by 3s'
Solve problems by using number sentences for addition or subtraction (ACMNA036)			
Write simple number sentences	1	Finding the missing number to make an addition or subtraction number sentence true (up to 18)	<ul style="list-style-type: none"> complete number sentences involving 1 operation of addition or subtraction by finding the missing number using a variety of tools, equipment and strategies, eg using guess and check, eg $5 + (\text{box symbol}) = 13$ or $15 - (\text{box symbol}) = 9$
	2	Writing number sentences to solve word problems (1-digit and 2-digit addition and subtraction)	<ul style="list-style-type: none"> represent a word problem as an addition or subtraction number sentence

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Measure and compare the lengths of pairs of objects using uniform informal units (ACMMG019)			
Quest: Length (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Explore informal units of length and distance	1	Exploring uniform informal units of length and distance	<ul style="list-style-type: none"> identify appropriate uniform informal units to measure lengths and distances, eg paper clips instead of craft sticks to measure a pencil;- explain the relationship between the size of a unit and the number of units needed, eg more paper clips than craft sticks will be needed to measure the length of the desk record lengths using informal units, eg the pencil is __ units long recognise the need for uniform units and the need to place the units end-to-end without gaps or overlaps
	2	Measuring length using unit iteration	<ul style="list-style-type: none"> record lengths and distances by referring to the number and type of uniform informal unit used
	3	Measuring lengths and distances with uniform informal units	<ul style="list-style-type: none"> identify the length of an object or shape record lengths and distances by referring to the number and type of uniform informal unit used
Compare and order lengths using informal units	1	Comparing and ordering the lengths of shapes and objects using uniform informal units	<ul style="list-style-type: none"> identify the length of an object or shape compare and order 2 or more shapes or objects that cannot be moved or aligned, according to their lengths, using an appropriate uniform informal unit
Formal units for length (cm)	1	Introducing formal units for length: centimetres	<ul style="list-style-type: none"> recognise and model that there are 100 cm in 1 m ie $100\text{ cm} = 1\text{ m}$ estimate and use the centimetre as a unit to measure lengths, to the nearest centimetre, using a device with 1 cm markings, eg use a paper strip of length 10 cm compare lengths with the same standard unit
Measure and compare areas using uniform informal units			
Quest: Area (1)			
Explore, measure, compare area (informal units)	1	Exploring the attribute of area	<ul style="list-style-type: none"> define area as an attribute identify areas in the environment describe areas using everyday language, such as 'surface', 'inside', 'outside' understand that the area remains the same if a given area is divided up and rearranged into a new configuration (conservation)
	2	Comparing areas using direct comparison	<ul style="list-style-type: none"> compare areas by positioning one area over another area compare areas by tracing one area and placing it over the top another area describe one area as larger than, the same as (about the same as), or smaller than another area
	3	Measuring area using informal units	<ul style="list-style-type: none"> compare use of non-uniform units with uniform units to measure area tile units to completely cover an area consider effect of gaps and overlaps when measuring area recognise iteration and structure in arrangement of uniform informal units to measure the area identify features that determine whether chosen units will be good units to measure area;- ie units must be the same size, units need to tile without gaps or overlaps estimate areas in uniform informal units

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Compare and order several shapes and objects based on area using appropriate uniform informal units (ACMMG037)			
Quest: Area (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Compare and order areas (informal units)	1	Comparing and ordering areas using uniform informal units (indirect comparison)	<ul style="list-style-type: none"> compare two areas by measuring using uniform informal units order three or more areas by measuring using uniform informal units make statements of comparison about the relative size of three areas, eg if A is larger than B and B is larger than C, then A is larger than C
Measure and estimate area using square units	1	Measuring and estimating areas of rectangles using a square unit	<ul style="list-style-type: none"> establish usefulness of using a square unit to find an area as it allows for an array structure and does not have gaps or overlaps compare the same area measured using different sized square unit understand that the larger the unit square, the smaller the number of units needed and likewise the smaller the square unit, the larger the number of units needed
	2	Measuring and estimating areas of rectilinear shapes using a square unit	<ul style="list-style-type: none"> establish usefulness of using a square unit to find an area as it allows for an array structure and does not have gaps or overlaps compare the same area measured using different sized square unit understand that the larger the unit square, the smaller the number of units needed and likewise the smaller the square unit, the larger the number of units needed
Measure and compare the capacities of pairs of objects using uniform informal units (ACMMG019)			
Explore volume and capacity using informal units	1		<ul style="list-style-type: none"> use the terms 'full', 'empty' and 'about half-full', 'quarter full', 'more than', 'less than' to describe the amount of substance in a container
	2	Exploring and explaining volume and capacity with uniform informal units	<ul style="list-style-type: none"> use uniform informal units to measure the volume of containers;- pack cubic units (eg blocks) into rectangular containers so that there are no gaps recognise and select appropriate uniform informal units to measure the volume/capacity of containers, eg using cups rather than teaspoons to fill a bucket explain the relationship between the size of a unit and the number of units needed, eg more cups than ice cream containers will be needed to fill a bucket
Measure volume and capacity (informal units)	1		<ul style="list-style-type: none"> record volumes/capacities by referring to the number and type of uniform informal unit used
Compare and order volume/ capacity (informal units)	1	Comparing and ordering the volume and capacity of 2 or more containers using uniform informal units	<ul style="list-style-type: none"> compare the capacities of 2 or more containers using appropriate uniform informal units, eg count the number of times a smaller container can be filled and emptied into the containers being measured order containers in terms of capacity
Compare and order volume using blocks	1	Comparing and ordering volumes of models made from blocks	<ul style="list-style-type: none"> compare and order the volumes of 2 or more models by counting the number of blocks used in each model recognise that models with different appearances may have the same volume
Compare and order volume using displacement	1	Comparing and ordering volumes through displacement	<ul style="list-style-type: none"> compare and order the volumes of 2 or more objects by marking the change in water level when each is submerged

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Investigate mass using a pan balance

Quest: Mass (1)

Learning Journey	Steps	Spine Nodes	Subnodes
Compare and order mass using a pan balance	1	Comparing and describing mass of 2 objects using a pan balance	<ul style="list-style-type: none"> establish meaning of a 'level balance' and describe the 2 objects as having 'equal mass/weight' describe the results of imbalance of a pan balance using the terms 'heavier' and 'lighter'
	2	Ordering more than 2 objects by mass using a pan balance	<ul style="list-style-type: none"> order more than 2 objects by mass using a pan balance
Compare and order mass using informal units	1	Comparing and ordering masses using uniform informal units	<ul style="list-style-type: none"> find differences in mass by measuring and comparing, eg 'The pencil has a mass equal to 3 blocks and a pair of plastic scissors has a mass of 6 blocks, so the scissors are 3 blocks heavier than the pencil' compare masses using simple multiples, eg twice and heavy, half as heavy

Name and order months and seasons (ACMMG040)

Quest: Time – using calendars (1)

Months of the year	1	Introducing the months of the year	<ul style="list-style-type: none"> name and order the months of the year determine the month before or after a given month
	2	Months of the year	<ul style="list-style-type: none"> recall the number of days there are in each month
Know the seasons	1	Introducing the seasons	<ul style="list-style-type: none"> know that there are 4 seasons in a year name and order the seasons of the year know and recall the months for each season recognise that the seasons are opposite in the opposite hemisphere of the planet

Use a calendar to identify the date and determine the number of days in each month (ACMMG041)

Use a calendar to identify the date	1	Introducing calendars	<ul style="list-style-type: none"> identify elements of a conventional calendar (month, day, date) identify a day and date using a conventional calendar relate calendars to the parts of a written date
	2	Using a calendar to solve simple problems involving months	<ul style="list-style-type: none"> locate any given month on a calendar use a calendar to determine the number of months between events use a calendar to determine which month comes before/after a given month

Tell time to the half-hour (ACMMG020)

Quest: Time – telling the time (1)

Tell time to the hour and half hour (analogue)	1	Telling time to the hour and half hour (analogue)	<ul style="list-style-type: none"> observe and describe the coordinated movements of the hands on an analogue clock as time progresses in half-hour intervals describe the position or draw of the hands of an analogue clock when reading time to the half hour read time on analogue clocks to the half hour using the terms 'o'clock' and 'half past' position or draw the hands on an analogue clock to show time to the half-hour where the time is given using the terms 'o'clock' or 'half-past' relate hour and half hour times and the duration of a half hour to everyday events;- develop a personal reference for a half hour
--	---	---	--

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Tell time to the half-hour (ACMMG020)

Quest: Time - telling the time (1)

Learning Journey	Steps	Spine Nodes	Subnodes
Tell time to the hour and half hour (digital)	1	Telling time to the hour and half hour (digital)	<ul style="list-style-type: none"> read time on 12-hour digital clocks to the half-hour using the terms 'o'clock' and 'half past' connect 12-hour digital displays for times to the half-hour to their corresponding display on an analogue clock record times on analogue clocks to the half-hour in 12-hour digital format relate hour and half hour times and the duration of a half hour to everyday events;- develop a personal reference for a half hour position or draw the hands on an analogue clock to show time to the half-hour where the time is given in 12-hour digital format

Describe duration using months, weeks, days and hours (ACMMG021)

Quest: Time - telling the time (2)

Choose appropriate units of time	1	Choosing appropriate units for measuring time (day, hour, minute, second)	<ul style="list-style-type: none"> select the most suitable unit of time for a task (day, hour, minute or second)
Use hours to measure time	1	Introducing formal units for time: hours	<ul style="list-style-type: none"> establish the need for formal units (hours) to measure time identify situations where hours are an appropriate unit for measuring the duration of time identify the relationship between half hours and hours know that there are 24 hours in one day introduce the abbreviation h to record time in hours compare durations in hours
Use minutes to measure time	1	Introducing formal units for time: minutes	<ul style="list-style-type: none"> develop a sense of the duration of 1 minute by experiencing activities with this duration identify situations where minutes are an appropriate unit for measuring the duration of time establish the need for formal units (minutes) to measure time identify the relationship between minutes and hours: know that 1 hour is 60 minutes;- that $\frac{1}{2}$ hour is 30 minutes;- that a quarter of an hour is 15 minutes;- and that three-quarters of an hour is 45 minutes read the time on digital clocks using the terms 'thirty' 'fifteen' 'forty-five' etc connect the duration of 1 minute to the coordinated movements of the hands of an analogue clock introduce the abbreviation min to record time in minutes compare and sequence durations in minutes
Use seconds to measure time	1	Introducing formal units for time: seconds	<ul style="list-style-type: none"> identify situations where seconds are an appropriate unit for measuring the duration of time identify the relationship between minutes and seconds: know that 1 minutes is 60 seconds;- that $\frac{1}{2}$ minute is 30 seconds connect the duration of 1 minute to the coordinated movements of the hands of an analogue clock compare and sequence durations in seconds
Compare hours, minutes and seconds	1	Comparing durations in hours, minutes and seconds	<ul style="list-style-type: none"> compare and sequence durations given in a combination hours, minutes and seconds measure and compare time intervals in mixed units (h, min, s)

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Tell time to the quarter-hour using the language of 'past' and 'to' (ACMMG039)

Quest: Time - telling the time (2)

Learning Journey	Steps	Spine Nodes	Subnodes
Tell time to the half and quarter hour	1	Relating halves and quarters to telling time	<ul style="list-style-type: none"> identify quarters and halves on a clock face relate 'past' and 'to' to the halves of a clock face
	2	Telling time to the quarter hour (analogue)	<ul style="list-style-type: none"> observe and describe the coordinated movements of the hands on an analogue clock as time progresses in quarter hour intervals describe the position or draw of the hands of an analogue clock when reading time to the quarter hour read time on analogue clocks to the quarter-hour using the terms 'o'clock', 'half past', 'quarter past' and 'quarter to' and relate to knowledge of fractions
	3	Telling time to the quarter hour (digital)	<ul style="list-style-type: none"> read time on 12-hour digital clocks to the quarter-hour using the terms 'o'clock', 'half past', 'quarter past' and 'quarter to' position or draw the hands on an analogue clock to show time to the quarter-hour where the time is given using the terms 'o'clock' or 'quarter-past' record times on analogue clocks to the quarter-hour in 12-hour digital format position or draw the hands on an analogue clock to show time to the quarter-hour where the time is given in 12-hour digital format

Quest: Time - using calendars (2)

Use calendars to solve simple problems	1	Using calendars to solve problems	<ul style="list-style-type: none"> locate any given date, including today's date, on a calendar use a calendar to locate the date to match a given description, eg if today is Monday 8th April, then what is the date on Thursday?;- find the date of the third Thursday in March use a calendar to determine the number of days, weeks or months until a future event or between events use a calendar to calculate and describe lengths of time in days/weeks
--	---	-----------------------------------	--

Recognise and classify familiar three-dimensional objects using obvious features (ACMMG022)

Quest: Three-dimensional space (1)

Explore surfaces and faces	1	Introducing surfaces	<ul style="list-style-type: none"> manipulate three-dimensional objects and identify the type and number of flat and curved surfaces, eg 'The prism has eight flat surfaces' sort three-dimensional objects by the type and number of flat and curved surfaces
	2	Introducing faces	<ul style="list-style-type: none"> identify and describe the number and shape of faces on a cube, rectangular prism or triangular prism select a three-dimensional object from a description of its faces, eg '6 square faces'
Recognise and describe spheres	1	Introducing spheres	<ul style="list-style-type: none"> recognise spheres in the environment and drawings select spheres from other three-dimensional objects using a description, 'round and rolls';- name the shape
Recognise and describe cones	1	Introducing cones	<ul style="list-style-type: none"> recognise cones in the environment and drawings, including different orientations manipulate and describe cones as having 1 flat surface and 1 curved surface select cones from other three-dimensional objects using a description, '1 flat surface and 1 curved surface';- name the shape
Recognise and describe cubes	1	Introducing cubes	<ul style="list-style-type: none"> recognise cubes in the environment and drawings, including different orientations select cubes from other three-dimensional objects using a description, eg '6 square faces';- name the shape

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Recognise and classify familiar three-dimensional objects using obvious features (ACMMG022)			
Quest: Three-dimensional space (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Recognise and describe cylinders	1	Introducing cylinders	<ul style="list-style-type: none"> recognise cylinders in the environment and drawings, including different orientations manipulate and describe cylinders as having 2 flat surfaces and 1 curved surface select cylinder from other three-dimensional objects using a description, eg '2 flat surfaces and 1 curved surface', name the shape
Recognise, sort and name 3D objects	1	Recognising and naming three-dimensional objects	<ul style="list-style-type: none"> recognise common three-dimensional objects in the environment and drawings, including different orientations name common three-dimensional objects
	2	Sorting familiar three-dimensional objects — cones, cubes, spheres, cylinders, prisms	<ul style="list-style-type: none"> sort familiar three-dimensional objects using given attributes
	3	Comparing three-dimensional objects to everyday objects	<ul style="list-style-type: none"> identify common three-dimensional objects in everyday objects, eg cans, balls, boxes
Recognise and describe prisms (no formal names)	1	Introducing prisms	<ul style="list-style-type: none"> recognise prisms in the environment and drawings, including different orientations manipulate and describe prisms as having identical bases and rectangular faces select prisms from other three-dimensional objects using a description, eg 'rectangular faces';- name the shape (as prism only)
Describe the features of three-dimensional objects (ACMMG043)			
Quest: Three-dimensional space (2)			
Compare 2D shapes and 3D objects	1	Building three-dimensional structures	<ul style="list-style-type: none"> describe the two-dimensional shapes that the structure contains
Identify faces, edges and vertices on 3D objects	1	Introducing edges on three-dimensional objects	<ul style="list-style-type: none"> identify and count the edges on everyday objects and cones, cylinders, prisms, spheres and cubes identify and count the vertices on everyday objects and cones, cylinders, prisms, spheres and cubes
	3	Identifying faces, edges, vertices of cones, cubes, prisms, cylinders and spheres	<ul style="list-style-type: none"> identify and count the faces, edges and vertices on everyday objects and cones, cylinders, prisms, spheres and cubes
Faces, edges, vertices and surfaces of 3D objects	1	Describing the attributes of cones, cubes, cylinders, spheres and prisms	<ul style="list-style-type: none"> manipulate and describe the attributes of basic three-dimensional objects using attributes such as faces, edges, vertices, number and type of surfaces select a three-dimensional object from a description, eg '6 faces, 12 edges and 8 vertices' recognise that flat surfaces of three-dimensional objects are two-dimensional shapes and name the shapes of these surfaces
	2	Sorting three-dimensional objects (cubes, prisms, spheres, cylinders)	<ul style="list-style-type: none"> sort three-dimensional objects according to particular attributes, eg the shape of the surfaces or number of edges

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Recognise and classify familiar two-dimensional shapes using obvious features (ACMMG022)

Quest: Two-dimensional space (1)

Learning Journey	Steps	Spine Nodes	Subnodes
Sort quadrilaterals from other 2D shapes	1	Introducing quadrilaterals	<ul style="list-style-type: none"> recognise all regular and irregular closed 4-sided shapes as quadrilaterals sort quadrilaterals from other two-dimensional shapes
Identify, sort and name octagons	1	Introducing octagons	<ul style="list-style-type: none"> identify, sort and name octagons in different orientations, including octagons in their environment
Identify, sort and name pentagons	1	Introducing pentagons	<ul style="list-style-type: none"> identify, sort and name pentagons in different orientations, including pentagons in their environment
Identify, sort and name hexagons	1	Introducing hexagons	<ul style="list-style-type: none"> identify, sort and name hexagons in different orientations, including hexagons in their environment
Identify and name simple 2D shapes	1	Identifying and naming two-dimensional shapes	<ul style="list-style-type: none"> identify and name two-dimensional shapes including octagons, pentagons, circles, hexagons, triangles and quadrilaterals by their number of sides select a shape from a description of its features, eg number of sides or vertices identify and name shapes in pictures, designs and the environment
	2	Identifying and naming shapes embedded in pictures, designs and the environment	<ul style="list-style-type: none"> identify simple shapes embedded in pictures
Compare, describe and sort simple 2D shapes	1	Comparing and describing two-dimensional shapes	<ul style="list-style-type: none"> manipulate, compare and describe similarities and differences between two-dimensional shapes including octagons, pentagons, circles, hexagons, triangles and quadrilaterals identify and describe the number of sides sort regular and irregular two-dimensional shapes in various orientations including octagons, pentagons, circles, hexagons, triangles, quadrilaterals using a given attribute, eg number of sides or vertices
Identify vertical and horizontal lines	1	Introducing vertical and horizontal lines	<ul style="list-style-type: none"> identify and name vertical and horizontal lines in pictures and the environment
Identify parallel lines	1	Introducing parallel lines	<ul style="list-style-type: none"> identify and name parallel lines in pictures and the environment recognise that parallel lines can occur in orientations other than vertical and horizontal

Describe and draw two-dimensional shapes, with and without the use of digital technologies (ACMMG042)

Quest: Two-dimensional space (2)

Represent and describe regular polygons	1	Representing and describing regular polygons	<ul style="list-style-type: none"> name two-dimensional shapes in different orientations, eg triangles, quadrilaterals, pentagons, hexagons, octagons and describe the number of angles and/or sides
---	---	--	---

Understanding Practice and Fluency (UPF)

Measurement and Geometry

Investigate the effect of one-step slides and flips, with and without the use of digital technologies (ACMMG045)			
Quest: Two-dimensional space (2)			
Learning Journey	Steps	Spine Nodes	Subnodes
Translations of shapes (slides, flips, turns)	1	Introducing transformations of shapes: Slides (translations)	<ul style="list-style-type: none"> identify and describe a 1-step slide of a shape using the term 'slide'
	2		<ul style="list-style-type: none"> identify and describe a one-step flip of a shape using the term 'flip'
	3	Transformations of shapes: Flips and slides	<ul style="list-style-type: none"> identify a one-step slide or flip of a single shape and use the terms 'slide' and 'flip' to describe the movement of the shape identify a one-step slide or flip of a single shape and use the terms 'slide' and 'flip' to describe the movement of the shape recognise that sliding or flipping a shape does not change its size or features recognise that sliding or flipping a shape does not change its size or features
Identify and describe half-turns and quarter-turns (ACMMG046)			
		Introducing transformations of shapes: Turns (rotations)	<ul style="list-style-type: none"> recognise and describe turns as 'clockwise' or 'anti-clockwise' identify and describe half-turns and quarter-turns identify and describe half-turns and quarter-turns
Give and follow directions to familiar locations (ACMMG023)			
Quest: Position (1)			
Position using left, right and ordinal numbers	1	Describing position using more than 1 descriptor	<ul style="list-style-type: none"> describe the location of objects in a given structure using more than 1 descriptor, including 'from the left' and 'from the right' and ordinal number words locate objects in a given structure given a description involving more than 1 descriptor, including 'from the left' and 'from the right' and ordinal number words
	2	Establishing and understanding left and right from opposite direction	<ul style="list-style-type: none"> describe the position of an object as to the left or right of a person facing in the same direction as themselves describe the position of an object as to the left or right of a person facing in the opposite direction to themselves
	3	Following given directions	<ul style="list-style-type: none"> follow directions to position an object in a structure or picture
	4	Describing the path from 1 location to another on drawings#language to include 'left' and 'right'	<ul style="list-style-type: none"> use a diagram to give simple directions using only counting of squares and left or right create a path from 1 location to another
Interpret simple maps of familiar locations and identify the relative positions of key features (ACMMG044)			
Quest: Position (2)			
Read simple maps	1	Interpreting simple maps	<ul style="list-style-type: none"> interpret simple maps of familiar locations and describe the location of specific features relative to other features describe, using landmarks and directional language, a path from 1 feature to another on a simple map
	2	Following pathways on simple maps	<ul style="list-style-type: none"> follow and draw a path on a simple map given directions that use landmarks and directional language

NSW Curriculum Stage 1

Mathletics

Understanding Practice and Fluency (UPF)

Statistics and Probability

Choose simple questions and gather responses (ACMSP262)			
Quest: Data (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Ask suitable questions for data collection	1	Asking questions and collecting simple data with support	<ul style="list-style-type: none"> choose a suitable question for a given matter of interest involving category data, eg 'How did the children in Room 3 come to school?'
Complete tally charts	1	Introducing and completing tally charts	<ul style="list-style-type: none"> collect and sort data using a simple given tally chart
Represent data with objects and drawings where one object or drawing represents one data value and describe the displays (ACMSP263)			
Represent data in a simple display	1	Representing category or discrete data using simple displays	<ul style="list-style-type: none"> use concrete materials or pictures of objects as symbols to create data displays where 1 object or picture represents 1 data value (one-to-one correspondence), eg use different-coloured blocks to represent different-coloured cars record data in prepared graphic organisers such as simple block charts, pictographs or other diagrams
Read simple data displays using objects	1	Interpreting basic data displays including tally charts, tables and data displays with concrete materials	<ul style="list-style-type: none"> describe information presented in tables, lists or other simple data displays using comparative language such as 'more than' and 'less than', eg 'There were more black cars than red cars'
Identify a question of interest based on one categorical variable and gather data relevant to the question (ACMSP048)			
Answer questions related to simple data displays	1	Conducting a well-supported and basic statistical investigation using category data	<ul style="list-style-type: none"> answer questions and make simple statements related to the data gathered
Create displays of data using lists, tables and picture graphs and interpret them (ACMSP050)			
Read and interpret simple picture graphs	1	Introducing and reading picture graphs (up to 4 categories)	<ul style="list-style-type: none"> read and interpret data represented in a picture graph;- pose and answer simple summative and comparative questions, eg 'Which is the least favourite season?' choose an appropriate title for a display;- labels the axis identify misleading representations of data in a picture graph, eg where the symbol used to represent one item is shown in different sizes or where symbols are not equally spaced read and interpret data represented in a picture graph;- pose and answer simple summative and comparative questions, eg 'Which is the least favourite season?'
Represent and read data in tables or lists	1	Representing and reading data displayed in tables or lists	<ul style="list-style-type: none"> display category or numerical data using lists and tables pose questions and answer one-step and two-step questions, eg 'How many more students like reading than art?';- identify basic similarities and differences between categories;- make simple conclusions
Use a tally chart, table, picture graph		Introducing the statistical investigation process (tables, lists or picture graphs)	<ul style="list-style-type: none"> represent category data in a table, list or picture graph (one-to-one correspondence)

NSW Curriculum Stage 1

Mathletics

Understanding Practice and Fluency (UPF)

Statistics and Probability

Identify outcomes of familiar events involving chance and describe them using everyday language, such as 'will happen', 'won't happen' or 'might happen' (ACMSP024)			
Quest: Chance (1)			
Learning Journey	Steps	Spine Nodes	Subnodes
Use the everyday language of chance	1	Exploring possible outcomes of familiar events and activities	<ul style="list-style-type: none"> use everyday language to describe the possible outcomes of familiar activities and events, eg 'will happen', 'might/could happen', 'won't happen', 'probably'
Identify practical activities and everyday events that involve chance (ACMSP047)			
Quest: Chance (2)			
Use basic probability language	1	Using the basic language of probability: impossible, possible, likely, unlikely	<ul style="list-style-type: none"> Identify practical activities and everyday events that involve chance, eg 'I might play with my friend after school' describe outcomes in everyday activities and events as being 'possible', 'impossible', 'likely' or 'unlikely' to happen
Describe outcomes as 'likely' or 'unlikely' and identify some events as 'certain' or 'impossible' (ACMSP047)			
Use basic probability language	2	Using the language of probability: possible and impossible	<ul style="list-style-type: none"> identify and distinguish between 'possible' and 'impossible' events describe familiar events as being 'possible' or 'impossible', eg 'It is possible that it will rain today', 'It is impossible to roll a standard six-sided dice and get a 7'
	3	Using the language of probability: likely and unlikely	<ul style="list-style-type: none"> describe possible outcomes in everyday activities and events as being 'likely' or 'unlikely' to happen compare familiar activities and events and describe them as being 'likely' or 'unlikely' to happen
	4	Using the language of probability: certain and uncertain	<ul style="list-style-type: none"> identify and distinguish between 'certain' and 'uncertain' events describe familiar situations as being certain or uncertain, eg 'It is uncertain what the weather will be like tomorrow', 'It is certain that tomorrow is Saturday'

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-4NA applies place value to order, read and represent numbers of up to five digits

Quest: (1) Numbers up to 5 digits

Learning Journeys Identifying and counting numbers to 4 digits

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.1 Recognise, model, represent and order numbers to at least 10 000	1	Identifying numbers before and after up to 4-digit numbers (within 10000)	<ul style="list-style-type: none"> identify the number that comes before a given 2-, 3- or 4-digit number up to 10000; describe this number as 'one more than' identify the number that comes after a given 2-, 3- or 4-digit number up to 10000; describe this number as 'one less than' identify the number that comes before or after a given 2-, 3- or 4-digit number up to 10000; describe this number as 'one more than' or 'one less than'
	2	Counting by tens and hundreds using models, number lines and charts	<ul style="list-style-type: none"> count forwards and backwards in tens, on and off the decade, with 2-digit, 3-digit and 4-digit numbers using number lines and number charts count forwards and backwards in hundreds, on the decade, with 3-digit and 4-digit numbers using number lines and number charts count forwards and backwards in hundreds, on and off the decade, with 3-digit and 4-digit numbers using number lines and number charts
	3	Counting by tens and hundreds	<ul style="list-style-type: none"> count forwards and backwards in tens, on and off the decade, with 2-digit, 3-digit and 4-digit numbers count forwards and backwards in hundreds, on the decade, with 3-digit and 4-digit numbers count forwards and backwards in hundreds, on and off the decade, with 3-digit and 4-digit numbers
	4	Finding numbers 10 or 100 before and after up to 1000	<ul style="list-style-type: none"> find the number '10 before' or '10 after' a given 2-digit, 3-digit or 4-digit number on or off the decade using number lines and number charts find the number '100 before' or '100 after' a given 3-digit or 4-digit number on or off the decade using number lines and number charts

Learning Journeys Reading and representing numbers: up to 4 digits

NA.A.1 Recognise, model, represent and order numbers to at least 10 000	1	Reading and writing 4-digit numbers using words and numerals	<ul style="list-style-type: none"> write a given 4-digit number in words, eg 4567 as four thousand, four hundred and sixty-seven write the numerals for a 4-digit number given in words
	2	Representing 4-digit numbers using words, numerals and objects	<ul style="list-style-type: none"> model a given 4-digit number using concrete materials, pictures or drawings write the numerals in words, eg 'seven thousand, three hundred and fifty three' for a 4-digit number represented using place value equipment or using pictures, drawings

Learning Journeys Comparing and ordering numbers to 10 000

NA.A.1 Recognise, model, represent and order numbers to at least 10 000	1	Comparing numbers to 10000	<ul style="list-style-type: none"> model and compare two 4-digit numbers using place value equipment compare two numbers of up to 4 digits and describe using the terms and symbols: greater than (>) or less than (<); explain the comparison using place value reasoning
--	---	----------------------------	--

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-4NA applies place value to order, read and represent numbers of up to five digits

Quest: (1) Numbers up to 5 digits

Learning Journeys Comparing and ordering numbers to 10 000

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.1 Recognise, model, represent and order numbers to at least 10 000	2	Ordering numbers to 10000	<ul style="list-style-type: none"> order up to 4 consecutive 2-digit, 3-digit or 4-digit numbers within 1000 in ascending order or descending order; explain the reason for the order given order up to 4 non-consecutive 2-digit, 3-digit or 4-digit numbers within 1000 in ascending or descending order; explain the reason for the order given using place value reasoning

Learning Journeys Using place value to partition: up to 4-digits

NA.A.2 Apply place value to partition, rearrange and regroup numbers to at least 10 000 to assist calculations and solve problems	1	Using place value to partition 4-digit numbers	<ul style="list-style-type: none"> use place value equipment to partition a given 4-digit number into thousands, hundreds, tens and ones describe a 4-digit number using words, eg 9523 as '9 thousands, 5 hundreds, 2 tens and 3 ones' write a 4-digit number in expanded notation, eg 7523 as $7000 + 500 + 20 + 3$ write the numeral for a number represented by expanded notation recognise zero as a placeholder
	2	Identifying the place value of digits in 4-digit numbers	<ul style="list-style-type: none"> write the numeral for a 4-digit number modelled using place value equipment identify the digit in the thousands, hundreds, tens or ones column for a given 4-digit number identify, record and model a number using place value clues, eg 'an 8 in the thousands, 5 in the hundreds and a 2 in the ones' as 8502 recognise the role of zero as a placeholder create the smallest and largest numbers possible using 4 digits
	3	Partitioning 4-digit numbers using non-standard partitioning	<ul style="list-style-type: none"> use place value equipment to partition a given 4-digit number using non-standard partitioning, eg 2375 as 2 thousands, 1 hundred and 275 ones or $2000 + 100 + 275$ model and identify a number from non-standard partitioning, eg recognise 3 hundreds, 4 tens and 27 ones or $300 + 40 + 27$ as 367

Learning Journeys Rounding numbers: 4 digits

NA.A.2 Apply place value to partition, rearrange and regroup numbers to at least 10 000 to assist calculations and solve problems	1	Rounding numbers up to 10000 to the nearest 1000	<ul style="list-style-type: none"> model a 4-digit number and recognise which thousand it is nearer to; explain reasoning round a 4-digit number to the nearest 1000; recognise the digit in the hundreds column as the key digit
	2	Rounding numbers up to 10000 to the nearest 10, 100 or 1000	<ul style="list-style-type: none"> round a 4-digit number to the nearest 10, 100 or 1000; explain the rounding

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-4NA applies place value to order, read and represent numbers of up to five digits

Quest: (2) Numbers up to 5 digits

Learning Journeys Comparing and ordering numbers up to 5 digits

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.3 Recognise, represent and order numbers to at least tens of thousands	1	Comparing 5-digit numbers using words and symbols	<ul style="list-style-type: none"> compare two 5-digit numbers using words and symbols $<$, $=$, $>$
	2	Ordering numbers up to 5 digits	<ul style="list-style-type: none"> arrange numbers of up to 5 digits in ascending and descending order

Learning Journeys Reading and representing numbers: up to 5 digits

NA.A.3 Recognise, represent and order numbers to at least tens of thousands	1	Reading and writing numbers up to 5 digits	<ul style="list-style-type: none"> apply an understanding of place value to read numbers up to 5 digits apply an understanding of place value to write numbers up to 5 digits
	2	Identifying the place value of digits in numbers up to 5 digits	<ul style="list-style-type: none"> state the place value of digits in numbers of up to 5 digits pose and answer questions that extend place value understanding of numbers, eg 'What happens if I rearrange the digits in the number 12 345?', 'How can I rearrange the digits to make the largest number?' represent and describe whole numbers to 10 000 pictorially and symbolically
	3	Finding the number 1000 more or 1000 less than a given number	<ul style="list-style-type: none"> apply an understanding of place value to find the number 1000 more or 1000 less

Learning Journeys Using place value to partition: up to 5 digits

NA.A.3 Recognise, represent and order numbers to at least tens of thousands	1	Using place value to partition 5-digit numbers	<ul style="list-style-type: none"> use place value to partition numbers of up to 5 digits, eg 67 012 is 60 000 + 7000 + 10 + 2
	2	Using non-standard partitioning with 5-digit numbers	<ul style="list-style-type: none"> partition numbers of up to 5 digits in non-standard forms, eg 67 000 as 50 000 + 17 000
	3	Understanding the relationship between place value positions	<ul style="list-style-type: none"> recognise that in a multi-digit number a digit in 1 place represents 10 times as much as it represents in the place to its right recognise that in a multi-digit number a digit in 1 place represents 1/10 of what it represents in the place to its left

Learning Journeys Rounding numbers: 5 digits

NA.A.3 Recognise, represent and order numbers to at least tens of thousands	1	Rounding 5-digit numbers	<ul style="list-style-type: none"> round to the nearest 10, 100, 1000 or 10,000
--	---	--------------------------	--

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/subtract: single digit numbers			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Recalling number bonds to 30	<ul style="list-style-type: none"> use known facts and number patterns to recall bonds to 30 eg $18 + 2 = 20$ so $28 + 2 = 30$
	2	Adding 3 or more single-digit numbers	<ul style="list-style-type: none"> use appropriate strategies to add 3 or more single-digit numbers; including changing the order, doubles if appropriate, bridging to a ten explain and justify strategies used
	3	Adding and subtracting 3 or more single-digit numbers using compatible numbers	<ul style="list-style-type: none"> use compatible numbers , eg $4 + 2 + 8 - 6$ as $6 + 8 - 6 = 8$
	4	Creating and solving addition and subtraction word problems (within 1000)	<ul style="list-style-type: none"> represent a word problem as an addition or subtraction number sentence solve simple addition and subtraction word problems in context including find the difference, find the sum, change unknown, start unknown explain and compare strategies used to solve addition and subtraction word problems create problems in contexts that involve addition and subtraction
Learning Journeys Add/subtract: 2 & 3-digit using jump strategy			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding 2-digit and 3-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the addition of a 2-digit and 3-digit number using an empty number line, eg $823 + 56$ as $823 + 50 = 873$, $873 + 6 = 879$
	2	Subtracting a 2-digit number from a 3-digit number using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the subtraction of a 2-digit number from a 3-digit number using an empty number line, eg $823 - 56$ as $823 - 50 = 773$, $773 - 6 = 767$
	3	Adding and subtracting a 2-digit and 3-digit number using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the addition or subtraction of a 2-digit number from a 3-digit number using an empty number line, eg $823 - 56$ as $823 - 50 = 773$, $773 - 6 = 767$

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/subtract: place value partitioning 2 & 3-digit			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding 2-digit and 3-digit numbers mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> mentally solve addition problems involving 2-digit and 3-digit numbers using a jump strategy, eg $823 + 56$ as $823 + 50 = 873$, $873 + 6 = 879$ record and explain the use of the strategy check calculations using the inverse operation
	2	Subtracting a 2-digit number from a 3-digit number mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> mentally solve subtraction problems involving 2-digit and 3-digit numbers using place value partitioning, eg $823 - 56$ as $823 - 50 = 773$, $773 - 6 = 767$ record and explain the use of the strategy check calculations using the inverse operation
	3	Adding and subtracting a 2-digit and 3-digit number mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> mentally solve addition and subtraction problems involving 2-digit and 3-digit numbers using place value partitioning, eg $823 - 56$ as $823 - 50 = 773$, $773 - 6 = 767$
Learning Journeys Add/subtract: bridging up to 10 using 2 & 3 digits			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Bridging to ten to add two 2-digit numbers using models for support	<ul style="list-style-type: none"> add to the nearest ten first then add the rest, using models for support, eg $28 + 17$ as $28 + 2 = 30$ and $30 + 15 = 45$ record and explain the use of the strategy
		Adding 2 numbers up to 3-digits using bridging to ten	<ul style="list-style-type: none"> add up to two 3-digit numbers where the first number has a 7, 8, or 9 in the ones columns, by first adding to the * nearest ten and then adding the rest, eg $368 + 25$ as $368 + 2 + 23$ record and explain the strategy using numerals, models and/or diagrams
	2	Bridging to ten to subtract two 2-digit numbers using models for support	<ul style="list-style-type: none"> record and explain the use of the strategy
		Subtracting 2 numbers up to 3-digits using bridging to ten	<ul style="list-style-type: none"> subtract two numbers (up to 3-digits) where the first number has a 1, 2 or 3 in the ones columns, by first subtracting to the nearest ten and then subtracting the rest, eg $362 - 25$ as $362 - 2 - 23$ record and explain the strategy using numerals, models and/or diagrams
	3	Bridging to ten to mentally add and subtract two 2-digit numbers	<ul style="list-style-type: none"> add or subtract to the nearest ten first then add or subtract the rest, using models for support, eg $28 + 17$ as $28 + 2 = 30$ and $30 + 15 = 45$ check calculations using the inverse operation
		Adding and subtracting 2 numbers up to 3-digits using bridging to ten	<ul style="list-style-type: none"> add or subtract two numbers (up to 3-digits) where the first number has a 7, 8, or 9 in the ones columns, by first adding to the nearest ten and then adding the rest, eg $368 + 25$ as $368 + 2 + 23$, or $362 - 25$ as $362 - 2 - 23$ record and explain the strategy using numerals, models and/or diagrams

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/Subtract: Bridging			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Using a bridging strategy with start unknown or change unknown problems	<ul style="list-style-type: none"> use a bridging strategy to solve addition and subtraction problems where the change is unknown, eg $29 + ? = 81$ use a bridging strategy to solve addition and subtraction problems where the start is unknown, eg $? + 29 = 81$ becomes $29 + ? = 81$
Learning Journeys Add/subtract: partitioning 3-digits			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding two 3-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the addition of two 3-digit numbers using an empty number line, eg $823 + 356$ as $823 + 300 = 1123$, $1123 + 50 = 1173$, $1173 + 6 = 1179$
	2	Subtracting two 3-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the subtraction of two 3-digit numbers using an empty number line, eg $823 - 356$ as $823 - 300 = 523$, $523 - 50 = 473$, $473 - 6 = 467$
	3	Adding and subtracting two 3-digit numbers using place value partitioning on a number line (jump strategy)	<ul style="list-style-type: none"> model and solve the addition or subtraction of two 3-digit numbers using an empty number line, eg $823 - 356$ as $823 - 300 = 523$, $523 - 50 = 473$, $473 - 6 = 467$
	4	Adding and subtracting multi-digit numbers using place value partitioning	<ul style="list-style-type: none"> partition the second number to add two multi-digit numbers (up to 4 digits), eg $1546 + 625$ as $546 + 600 + 20 + 5$; use standard or non-standard partitioning partition the second number to subtract two multi-digit numbers (up to 4 digits), eg $1546 - 625$ as $546 - 600 - 20 - 5$; use standard or non-standard partitioning
Learning Journeys Adding and subtracting 3-digit numbers			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding up to 3-digit numbers mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> solve the addition of two 3-digit numbers using a jump strategy, eg $823 + 356$ as $823 + 300 = 1123$, $1123 + 50 = 1173$, $1173 + 6 = 1179$ explain and justify the use of the strategy
	2	Subtracting up to 3-digit numbers mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> solve the subtraction of two 3-digit numbers using a jump strategy, eg $823 - 356$ as $823 - 300 = 523$, $523 - 50 = 473$, $473 - 6 = 467$ explain and justify the use of the strategy
	3	Adding or subtracting up to 3-digit numbers mentally using place value understanding (jump strategy)	<ul style="list-style-type: none"> solve the addition or subtraction of two 3-digit numbers using a jump strategy, eg $823 - 356$ as $823 - 300 = 523$, $523 - 50 = 473$, $473 - 6 = 467$

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/subtract: rounding & compensation 2-digit			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Introducing addition using rounding and compensating with two 2-digit numbers	<ul style="list-style-type: none"> add two 2-digit numbers where 1 number is close to a ten (digit in the ones column is 7, 8 or 9) round 1 number to the next 10, carry out the addition and adjust the answer to compensate for the original rounding, eg $35 + 29$ as $35 + 30 - 1$ record the strategy using numerals, models and/or diagrams and explain the need to compensate
		Adding up to two 3-digit numbers using rounding and compensating	<ul style="list-style-type: none"> add up to two 3-digit numbers where 1 number is close to a hundred (ends in 97, 98 or 99) round 1 number to the next 100, carry out the addition and adjust the answer to compensate for the original rounding, eg $398 + 23$ as $400 + 23 - 2$ record the strategy using numerals, models and/or diagrams and explain the need to compensate
	2	Introducing subtraction using rounding and compensating with two 2-digit numbers	<ul style="list-style-type: none"> subtract two 2-digit numbers where 1 number is close to a ten round 1 number to the next 10, carry out the subtraction and adjust the answer to compensate for the original rounding, eg $33 - 19$ as $33 - 20 + 1$ or $81 - 35$ as $80 - 35 + 1$ record the strategy using numerals, models and/or diagrams and explain the need to compensate
		Subtracting up to two 3-digit numbers using rounding and compensating	<ul style="list-style-type: none"> subtract up to two 3-digit numbers where 1 number is close to a hundred (ends in 97, 98 or 99) round 1 number to the next 100, carry out the subtraction and adjust the answer to compensate for the original rounding, eg $398 - 23$ as $400 - 23 + 2$ record the strategy using numerals, models and/or diagrams and explain the need to compensate
	3	Introducing addition and subtraction using rounding and compensating with two 2-digit numbers	<ul style="list-style-type: none"> add or subtract two 2-digit numbers where 1 number is close to a ten (digit in the ones column is 7, 8 or 9) round 1 number to the next 10, carry out the addition or subtraction and adjust the answer to compensate for the original rounding, eg $33 - 19$ as $33 - 20 + 1$ or $81 - 35$ as $80 - 35 + 1$ check calculations using the inverse operation
		Adding and subtracting up to two 3-digit numbers using rounding and compensating	<ul style="list-style-type: none"> add or subtract up to two 3-digit numbers where 1 number is close to a hundred (ends in 97, 98 or 99) round 1 number to the next 100, carry out the addition or subtraction and adjust the answer to compensate for the original rounding, eg $398 + 23$ as $400 + 23 - 2$
	4	Introducing addition using rounding and compensating when the change or start is unknown	<ul style="list-style-type: none"> model with number lines and solve addition problems with two 2-digit numbers where the digits in the ones column for the known addend and result are close together, eg $23 + ? = 81$ becomes $23 + 60 - 2$ explain and justify the use of the strategy

NSW Curriculum Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/subtract: to and from 100			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Modelling pairs that add to 100	<ul style="list-style-type: none"> use place value equipment to model pairs that add to 100, eg 63 and 37 recognise that the ones make an extra ten when added
	2	Adding to make 100	<ul style="list-style-type: none"> find pairs of numbers that add to 100 (multiples of 5), eg 45 and 55 find pairs of numbers that add to 100, eg 42 and 58 find the missing number to add to 100 when 1 number is given
	3	Subtracting from 100	<ul style="list-style-type: none"> subtract 1 number from 100 (multiple of 5), eg $100 - 35 = 65$ subtract 1 number from 100, eg $100 - 29 = 71$
Learning Journeys Add/subtract: 1-digit numbers, 100, 1000 & 10000			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding multiples of 100, 1000 and 10 000	<ul style="list-style-type: none"> model the addition of hundreds and/or thousands using place value equipment or play money; relate these additions to adding ones, eg $4 + 3 = 7$ so 4 thousands + 3 thousands = 7 thousands or $4000 + 3000 = 7000$ use known basic facts, eg $5 + 3$ to add multiples of 100, 1000 or 10 000 using place value knowledge and pattern identification, eg $5 + 3 = 8$, so $500 + 300 = 800$, $5000 + 3000 = 8000$ and $50\ 000 + 30\ 000 = 80\ 000$
	2	Subtracting multiples of 100, 1000 and 10 000	<ul style="list-style-type: none"> model the subtraction of hundreds and/or thousands using place value equipment or play money; relate these additions to subtracting ones, eg $8 - 3 = 5$ so 8 thousands – 3 thousands = 5 thousands or $8000 - 3000 = 5000$ use known basic facts, eg $9 - 5$ to subtract multiples of 100, 1000 or 10 000 using place value knowledge and pattern identification, eg $9 - 5 = 4$, so $900 - 500 = 400$, $9000 - 5000 = 4000$ and $90\ 000 - 50\ 000 = 40\ 000$
	3	Adding multiple single-digit numbers	<ul style="list-style-type: none"> use the associative property of addition to make easier additions when possible, eg doubles or near doubles, pairs that add to a ten
Learning Journeys Add/Subtract: non-standard/place value partitioning			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Adding two 3-digit numbers using non-standard partitioning	<ul style="list-style-type: none"> partition the second number using non-standard partitioning to add two 3-digit numbers, eg $1546 + 625$ as $546 + 500 + 100 + 20 + 5$ record and explain the strategy using numerals, models and/or diagrams
	2	Subtracting two 3-digit numbers using non-standard partitioning	<ul style="list-style-type: none"> partition the second number using non-standard partitioning to subtract two 3-digit numbers, eg $1546 - 625$ as $546 - 500 - 100 - 20 -$ record and explain the strategy using numerals, models and/or diagrams

Quest: (1) Add/sub up to 5 digits			
Learning Journeys Add/Subtract: Choosing efficient strategies			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Choosing efficient addition strategies when adding 2-digit and 3-digit numbers	<ul style="list-style-type: none"> solve 2-digit and 3-digit addition problems using efficient and effective strategies depending on the numbers in the problem, eg use rounding and compensating, jump strategies, split strategies, place value strategies or bridging strategies record and explain the strategy using numerals, models and/or diagrams check the solution using a different strategy; compare with own and others' strategies, discuss and compare the efficiency of strategies
	2	Choosing efficient subtraction strategies when subtracting 2-digit and 3-digit numbers	<ul style="list-style-type: none"> solve 2-digit and 3-digit subtraction problems using efficient and effective strategies depending on the numbers in the problem, eg use rounding and compensating, jump strategies, split strategies, place value strategies or bridging strategies record and explain the strategy using numerals, models and/or diagrams check the solution using a different strategy; compare with own and others' strategies, discuss and compare the efficiency of strategies
	3	Choosing efficient addition and subtraction strategies when adding or subtracting 2-digit and 3-digit numbers	<ul style="list-style-type: none"> solve 2-digit and 3-digit addition and subtraction problems using efficient and effective strategies depending on the numbers in the problem, eg use rounding and compensating, jump strategies, split strategies, place value strategies or bridging strategies record and explain the strategy using numerals, models and/or diagrams check the solution using a different strategy; compare with own and others' strategies, discuss and compare the efficiency of strategies
Learning Journeys Add/Subtract: Estimating			
NA.B.1 Recall addition facts for single-digit numbers and related subtraction facts to develop increasingly efficient mental strategies for computation	1	Estimating additions	<ul style="list-style-type: none"> round numbers to the nearest multiple of 100 to estimate additions, eg $546 + 789$ as $500 + 800$ round numbers to the nearest multiple of 10 or 100 to estimate additions, eg $546 + 789$ as $540 + 80$ explain the reason for the estimation used and whether the estimation is higher or lower than the actual answer
	2	Estimating subtractions	<ul style="list-style-type: none"> round numbers to the nearest multiple of 100 to estimate subtractions, eg $546 - 189$ as $500 - 200$ round numbers to the nearest multiple of 10 or 100 to estimate subtractions, eg $746 - 389$ as $740 - 400$ explain the reason for the estimation used and whether the estimation is higher or lower than the actual answer

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-5NA uses mental and written strategies for addition and subtraction involving two-, three-, four- and five-digit numbers			
Quest: (1) Add/sub up to 5 digits			
Learning Journeys Relationship between addition and subtraction			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.2 Recognise and explain the connection between addition and subtraction	1	Recognising and using the inverse relationship between addition and subtraction	<ul style="list-style-type: none"> determine, through investigation, the inverse relationship between addition and subtraction determine the missing number in addition and subtraction equations using a variety of tools and strategies, such as the inverse relationship between addition and subtraction (up to 2 digit with 2-digit addition or subtraction)
	2	Recognising equivalent number sentences with 1-digit and 2- digit numbers	<ul style="list-style-type: none"> complete number sentences involving addition and subtraction by calculating missing numbers using a variety of tools and strategies use inverse operations to complete number sentences justify solutions when completing number sentences
	3	Judging the reasonableness of addition and subtraction answers (up to 3-digit answers)	<ul style="list-style-type: none"> use benchmarks of 'more than or less than' to help judge the reasonableness of answers
Learning Journeys Representing money values			
NA.B.3 Represent money values in multiple ways and count the change required for simple transactions to the nearest five cents	1	Using money to make purchases	<ul style="list-style-type: none"> calculate the total cost of purchasing two items given their values and record the value in dollars and cents separately (no decimal point) determine the exact notes and coins needed to purchase two items given their values
	2	Calculating change when making purchases	<ul style="list-style-type: none"> determine one or more notes and coins that have enough value to make a purchase of one or more items calculate the change required when making purchases using cash and record values in dollars and cents separately (no decimal point)
Quest: (2) Add/sub up to 5 digits			
Learning Journeys Representing problems using a bar model			
NA.B.4 Apply place value to partition, rearrange and regroup numbers to at least tens of thousands to assist calculations and solve problems	1	Representing addition problems using a bar model (within 1000)	<ul style="list-style-type: none"> represent an addition problem where the result is unknown, eg 'Anna had 58 marbles. Sam gave her 27 more. How many marbles does Anna have now?' represent addition problems where the change or part is unknown, eg 'Anna has 58 marbles, how many more does she need to have 73? or Anna had 53 marbles. 17 were yellow. How many were red?' represent addition problems where the start is unknown, eg 'Anna had some marbles. Sam gave her 17 more. Now she has 53. How many did she have to start with?' solve addition problems represented on a bar model using efficient mental strategies

Learning Journeys Exploring multiplication/division for 9 up to 90

NA.C.3 Recall multiplication facts up to 10×10 and related division facts	1	Exploring multiplication by 9 up to 90	<ul style="list-style-type: none"> use concrete materials, models, drawings, number lines/ charts to skip count by 9 from zero; explore patterns of the multiplication facts for 9 on a number chart relate multiplication by 9 to multiplication by 10 (multiply by 10 and then subtract the extra group)
	2	Recalling and using multiplication facts for 9 (up to 90)	<ul style="list-style-type: none"> recall the multiplication facts for 9 solve multiplication problems with 9 including word problems
	3	Dividing by 9 up to 90	<ul style="list-style-type: none"> model and describe the related multiplication and division facts for 9 using models, drawings or manipulatives, eg $9 \times 3 = 27$ and $27 \div 3 = 9$ relate division to how many (whole) times the divisor goes into the dividend
	4	Recalling and using division facts for 9 up to 90	<ul style="list-style-type: none"> recall the division facts for 9 solve division problems with 9 including word problems
	5	Multiplying and dividing by 9 up to 90	<ul style="list-style-type: none"> recall the multiplication facts and related division facts for 9 solve multiplication and division problems with 9, including word problems

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-6NA uses mental and informal written strategies for multiplication and division

Quest: (2) Mult/div mental strategies

Learning Journeys Using facts to multiply using 2-digits

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and using known facts to solve multiplication and division problems with multiples of 10 and 100	<ul style="list-style-type: none"> represent with models/diagrams and use known facts and place value understanding to solve multiplication problems with multiples of 10 or 100, eg $3 \times 6 = 18$ so $3 \times 600 = 1800$ use known facts and place value understanding to solve division problems with multiples of 10 or 100, eg $18 \div 6 = 3$ so $1800 \div 600 = 3$ explain and justify the use of the strategy
	2	Representing and using known facts to multiply two 2-digit multiples of 100	<ul style="list-style-type: none"> represent with models/diagrams and use known facts and place value understanding to multiply 2 multiples of 100, eg $300 \times 400 = 3 \times 4 = 12$ so $300 \times 400 = 1200$ know that multiplying by 100 shifts the digits 2 places to the left
	3	Representing and using known facts to multiply 2-digit numbers by 100	<ul style="list-style-type: none"> represent with models/diagrams and use known facts and place value understanding to multiply 2-digit numbers by 100, eg $13 \times 100 = 10 \times 100 + 3 \times 100$ know that multiplying by 100 shifts the digits 2 places to the left

Learning Journeys Using facts to divide 3-digit numbers by 10

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and using known facts to divide 3-digit numbers by 10	<ul style="list-style-type: none"> represent with models/diagrams and use known facts and place value understanding to divide 2-digit numbers by 10, eg $460 \div 10 = 46$ know that dividing by 10 shifts the digits 1 place to the right
---	---	--	---

Learning Journeys Multiplication strategies using 1-digit

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and multiplying two 1-digit numbers using rounding and compensating	<ul style="list-style-type: none"> represent with models/diagrams and use known facts to solve multiplication problems by adding on or taking off, eg 5×10 is 50, so 5×9 is 5 less, which is 45 explain and justify the use of the strategy
	2	Representing and multiplying two 1-digit numbers using doubling and related facts	<ul style="list-style-type: none"> represent with models/diagrams and use the relationship between multiplication facts, eg the multiplication facts for 6 are double the multiplication facts for 3 explain and justify the use of the strategy
	3	Representing and multiplying two 1-digit numbers using repeated doubling	<ul style="list-style-type: none"> represent with models/diagrams and use doubling and repeated doubling as a strategy to multiply by 2, 4 and 8, eg 7×8 is double 7, double again and then double again explain and justify the use of the strategy
	4	Representing and multiplying two 1-digit numbers using factorising	<ul style="list-style-type: none"> represent with models/diagrams and split factors, eg 5×8 is the same as $5 \times 2 \times 4$, which becomes 10×4 explain and justify the use of the strategy

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-6NA uses mental and informal written strategies for multiplication and division

Quest: (2) Mult/div mental strategies

Learning Journeys Using the conventions of multiplication

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Using the conventions of multiplication number sentences	<ul style="list-style-type: none"> use the term 'product' to describe the result of multiplying 2 or more numbers use the equals sign to record equivalent number relationships involving multiplication, and to mean 'is the same as', rather than to mean to perform an operation

Learning Journeys Multiples and factors up to 100

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Introducing multiples up to 100	<ul style="list-style-type: none"> find 'multiples' for a given whole number
	2	Introducing factors for numbers up to 100	<ul style="list-style-type: none"> determine 'factors' for a given whole number connect number relationships involving multiplication to factors of a number

Learning Journeys Inverse facts

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Using inverse facts	<ul style="list-style-type: none"> relate multiplication facts to their inverse division facts relate division facts to their inverse multiplication facts
---	---	---------------------	--

Learning Journeys Practising multiplication strategies

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Multiplying 3 or more single-digit numbers using the commutative and associative properties	<ul style="list-style-type: none"> apply the commutative property of multiplication explore and apply the associative property of multiplication, eg $2 \times 3 \times 5 = 2 \times 5 \times 3 = 10 \times 3 = 30$
---	---	---	--

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-6NA uses mental and informal written strategies for multiplication and division

Quest: (2) Mult/div mental strategies

Learning Journeys Multiplying 2-digit numbers by a 1-digit number

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and multiplying a 2-digit number by a 1-digit number using place value understanding and the distributive law	<ul style="list-style-type: none"> represent and use place value to solve a multiplication fact, eg multiplying the tens and then the units, eg 7×19: 7 tens + 7 nines is $70 + 63$, which is 133 explain and justify the use of the strategy
	2	Multiplying a 2-digit number by a 1-digit number using an area model	<ul style="list-style-type: none"> use area model to solve multiplication problems explain and justify the use of the strategy
	3	Representing and multiplying a 2-digit number by a 1-digit number using doubling and related facts	<ul style="list-style-type: none"> represent and use doubling to multiply a 2-digit and 1-digit number, eg 41×6 is 41×3, which is 123, and then double to obtain 246 explain and justify the use of the strategy

Learning Journeys Multiplying 2-digits using repeated addition

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and multiplying a 2-digit number by a 2, 4 or 8 using doubling and repeated doubling	<ul style="list-style-type: none"> represent and use repeated doubling as a strategy to multiply, eg 23×2 is double 23, 23×4 is double 23 and double again, 23×8 is double 23, double again and double again explain and justify the use of the strategy
---	---	---	--

Learning Journeys Multiplying 2-digits using factorising

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Representing and multiplying a 2-digit number by a 1-digit number using factorising (the associative property)	<ul style="list-style-type: none"> represent and use factorising (factorise the larger number), eg $18 \times 4 = 9 \times 2 \times 4 = 9 \times 8 = 72$ explain and justify the use of the strategy
---	---	--	---

Learning Journeys Selecting effective multiplication strategies

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Selecting efficient strategies to solve multiplication problems	<ul style="list-style-type: none"> select and use a variety of mental and informal written strategies to solve multiplication problems apply the inverse relationship of multiplication and division to justify answers check the answer to a word problem using digital technologies record mental strategies accurately
---	---	---	---

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-6NA uses mental and informal written strategies for multiplication and division

Quest: (2) Mult/div mental strategies

Learning Journeys Develop strategies for division with no remainder

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Describing comparisons using the language of multiplication	<ul style="list-style-type: none"> describe comparisons using the language of multiplication, eg $35 = 5 \times 7$ as 35 is 5 times as many as 7 and 7 times as many as 5

Learning Journeys Dividing a 2-digit number by a 1 digit number

NA.C.4 Develop efficient mental and written strategies, and use appropriate digital technologies, for multiplication and for division where there is no remainder	1	Dividing a 2-digit number by a 1-digit number using the inverse relationship of multiplication and division (no remainders)	<ul style="list-style-type: none"> divide a 2-digit number by a 1-digit number using the inverse relationship of multiplication and division, eg $63 \div 9 = 7$ because $7 \times 9 = 63$
	2	Dividing a 2-digit number by a 1-digit number using halving and repeated halving (no remainders)	<ul style="list-style-type: none"> use halve to divide by 2 use halve, halve to divide by 4 use halve, halve, halve to divide by 8
	3	Dividing a 2-digit number by a 1-digit number using related facts (no remainders)	<ul style="list-style-type: none"> use related facts to divide a 2-digit number by a 1-digit number, eg to divide by 5, first divide by 10 and then multiply by 2

Learning Journeys Remainders in division problems

NA.C.5 Use mental strategies and informal recording methods for division with remainders	1	Introducing remainders in division problems	<ul style="list-style-type: none"> model division, including where the answer involves a remainder, using concrete materials explain why a remainder is obtained in answers to some division problems use mental strategies to divide a 2-digit number by a 1-digit number in problems for which answers include a remainder record remainders to division problems in words interpret the remainder in the context of a word problem
--	---	---	--

NSW Curriculum Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-7NA represents, models and compares commonly used fractions and decimals

Quest: (1) Common fractions & decimals

Learning Journeys Using fractions: halves and quarters

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.1 Model and represent unit fractions, including $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{5}$ and their multiples, to a complete whole	1	Finding halves and quarters of objects, shapes or sets (symbols used)	<ul style="list-style-type: none"> find halves and quarters of objects and shapes find halves and quarters of sets find the whole from a part find halves and quarters of uneven partitioned shapes use language 'one half', 'two halves', 'one quarter', 'two quarters' and so on use symbols to represent fractions: $\frac{1}{2}$, $\frac{2}{2}$, $\frac{1}{4}$, $\frac{2}{4}$, $\frac{3}{4}$, $\frac{4}{4}$
	2	Counting up to 10 in halves and quarters (symbols used)	
	3	Finding halves, quarters and eighths of objects or shapes	<ul style="list-style-type: none"> recognise equivalence estimate the size of a fractional part before using, eg paper folding to check or estimate the size of the whole from the part find the whole from a part find halves, quarters and eighths of uneven partitioned shapes use symbols for halves, quarters and eighths recognise larger denominator = smaller parts

Learning Journeys Numerator and demonimator

NA.D.1 Model and represent unit fractions, including $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{5}$ and their multiples, to a complete whole	1	Introducing the terms numerator and denominator	<ul style="list-style-type: none"> read and write symbols to represent fractions use the terms denominator and numerator to describe a fraction
---	---	---	---

Learning Journeys Using fractions: halves, thirds and quarters

NA.D.1 Model and represent unit fractions, including $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{5}$ and their multiples, to a complete whole	1	Introducing thirds	<ul style="list-style-type: none"> find thirds of objects, shapes and lengths find thirds of sets estimate the size of a fractional part before using eg paper folding to check or estimate the size of the whole from the part find the whole from a part use language 'one third', 'two thirds', 'three thirds' use symbols to represent: $\frac{1}{3}$, $\frac{2}{3}$, $\frac{3}{3}$
	2	Finding halves, thirds or quarters of shapes using partitioning	<ul style="list-style-type: none"> recognise that equal shares are not always the same shape

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-7NA represents, models and compares commonly used fractions and decimals

Quest: (1) Common fractions & decimals

Learning Journeys Using fractions: thirds and sixths

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.1 Model and represent unit fractions, including $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{5}$ and their multiples, to a complete whole	1	Introducing sixths	<ul style="list-style-type: none"> find sixths of objects and shapes find sixths of sets estimate the size of a fractional part before using, eg paper folding to check or estimate the size of the whole from the part find the whole from a part use language 'one sixth', 'two sixths', 'three sixths' use symbols to represent: $\frac{1}{6}$, $\frac{2}{6}$, $\frac{3}{6}$ understand the relationship between thirds and sixths
	2	Finding thirds and sixths of objects, shapes and sets	<ul style="list-style-type: none"> recognise equivalence find thirds and sixths of objects, shapes and lengths find thirds and sixths of sets (using models) find the whole from a part find thirds and sixths of uneven partitioned shapes use language 'one third', 'two thirds', 'three thirds' use fractional notation

Learning Journeys Using fractions: fifths

NA.D.1 Model and represent unit fractions, including $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{3}$ and $\frac{1}{5}$ and their multiples, to a complete whole	1	Introducing fifths	<ul style="list-style-type: none"> estimate the size of a fractional part before using, eg paper folding to check or estimate the size of the whole from the part find fifths of objects, shapes and lengths find fifths of sets find the whole from a part use language 'one fifth', 'two fifths', 'three fifths' and so on use symbols to represent fractions $\frac{1}{5}$, $\frac{2}{5}$...
---	---	--------------------	--

Learning Journeys Counting in thirds

NA.D.2 Count by quarters, halves and thirds, including with mixed numerals; locate and represent these fractions on a number line	1	Counting in thirds on a number line up to 1	<ul style="list-style-type: none"> represent fractions on a number line (in simple cases, eg identify $\frac{2}{3}$ on a number line that already shows divisions in thirds)
	2	Counting in thirds on a number line up to 3	<ul style="list-style-type: none"> count in proper and improper fractions on a number line identify whole number equivalence $\frac{3}{3} = 1$, $\frac{6}{3} = 2$

Learning Journeys Using mixed numbers on a number line

NA.D.2 Count by quarters, halves and thirds, including with mixed numerals; locate and represent these fractions on a number line	1	Counting and representing mixed numerals on a number line up to 3 (thirds)	<ul style="list-style-type: none"> count in mixed numerals on a number line up to 3 locate and represent mixed numerals on a number line, including on a partially-completed number line
---	---	--	--

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-7NA represents, models and compares commonly used fractions and decimals

Quest: (2) Common fractions & decimals

Learning Journeys Investigating fractions

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.3 Investigate equivalent fractions used in contexts	1	Investigating simple equivalent fractions less than 1 using concrete materials and/or models (denominators 2, 3, 4, 5, 6, 8, 10)	<ul style="list-style-type: none"> use models such as number lines, fraction strips, fraction walls to identify equivalent fractions use concrete materials or models to show equivalent fractions, eg folding a strip of paper
	2	Investigating equivalent fractions up to and including 1 whole using area models (denominators 2, 4 and 8; 3 and 6; 5 and 10 and 100)	<ul style="list-style-type: none"> model, compare and represent the equivalence of fractions with related denominators by redividing the whole, * using identical area models fraction walls and bar models

Learning Journeys Using decimal tenths

NA.D.4 Recognise that the place value system can be extended to tenths and hundredths, and make connections between fractions and decimal notation	1	Introducing decimal notation	<ul style="list-style-type: none"> identify decimal fractions in everyday use understand that the decimal point is a mark that identifies the ones place, and indicates the change from whole numbers to parts of a whole read decimal fractions correctly, ie 'six point nine' understand that any numbers after the decimal point represent part of a whole
	2	Introducing decimal tenths	<ul style="list-style-type: none"> recognise that the place value system can be extended to tenths represent tenths using concrete materials and written representations recognise that tenths arise from dividing an object into 10 equal parts recognise that tenths arise from dividing a one-digit number or quantity by 10 identify decimals on a number line represent decimals using models and place value equipment such as base ten and arrow cards, place value grid, hundred square
	3	Comparing and ordering decimal tenths	<ul style="list-style-type: none"> compare and order tenths using $>$, $<$ and $=$
	4	Counting in decimal tenths	<ul style="list-style-type: none"> count forwards and backwards by tenths from any decimal number expressed to 1 decimal place, using concrete materials and number lines, eg use base ten materials to represent 3.7 and count forward: 3.8, 3.9, 4.0, 4.1, ...

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-7NA represents, models and compares commonly used fractions and decimals

Quest: (2) Common fractions & decimals

Learning Journeys Using decimal hundredths

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.4 Recognise that the place value system can be extended to tenths and hundredths, and make connections between fractions and decimal notation	1	Introducing decimal hundredths	<ul style="list-style-type: none"> recognise that the place value system can be extended to tenths and hundredths recognise that hundredths arise when dividing an object by 100 and dividing tenths by 10 state the place value of digits in decimal numbers of up to 2 decimal places read decimal fractions correctly, ie 'six point one nine' rather than 'six point nineteen'
	2	Counting in decimal hundredths	<ul style="list-style-type: none"> count forwards and backwards by hundredths from any decimal number expressed to 2 decimal place, using concrete materials and number lines
	3	Modelling and representing decimal fractions up to 2 decimal places	<ul style="list-style-type: none"> model decimal fractions using concrete materials represent decimal fractions, eg as fractions (tenths and hundredths), on number lines, using hundreds grids, in place value models and charts
	4	Comparing and ordering decimal hundredths	<ul style="list-style-type: none"> compare numbers with the same number of decimal places up to 2 decimal places
		Comparing decimal fractions up to 2 decimal places	<ul style="list-style-type: none"> compare numbers with a different number of decimal places up to 2 decimal places using $>$, $<$ and $=$
	5	Connecting decimal fractions to common fractions involving hundredths	<ul style="list-style-type: none"> understand the relationship between decimal fractions and common fractions involving hundredths

Learning Journeys Partitioning decimal hundredths

NA.D.4 Recognise that the place value system can be extended to tenths and hundredths, and make connections between fractions and decimal notation	1	Partitioning decimal hundredths less than 1	<ul style="list-style-type: none"> use place value to partition decimals of up to 2 decimal places, eg $5.37 = 5 + 3/10 + 7/100$ use place value charts and expanders to link decimal fractions to place value, eg base 10 blocks, hundreds grids
	2	Partitioning decimal hundredths more than 1	<ul style="list-style-type: none"> partition decimals of up to 2 decimal places in non-standard forms, eg $5.37 = 5 + 37/100$ use place value charts and expanders to link decimal fractions to place value, eg base 10 blocks, hundreds grids

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-7NA represents, models and compares commonly used fractions and decimals

Quest: (2) Common fractions & decimals

Learning Journeys Connecting decimal fractions and common fractions

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.4 Recognise that the place value system can be extended to tenths and hundredths, and make connections between fractions and decimal notation	1	Connecting decimal fractions to common fractions involving tenths	<ul style="list-style-type: none"> understand the relationship between decimal fractions and common fractions involving tenths recognise and apply decimal notation to express whole numbers and tenths as decimals, eg 0.1 is the same as $\frac{1}{10}$ investigate equivalences using various methods, eg use a number line or a calculator to show that $\frac{1}{2}$ is the same as 0.5 and $\frac{5}{10}$
	2	Connecting decimal fractions to common fractions involving tenths and hundredths	<ul style="list-style-type: none"> understand the relationship between decimal fractions and common fractions involving tenths and hundredths recognise and apply decimal notation to express whole numbers, tenths and hundredths as decimals, eg 0.1 is the same as $\frac{1}{10}$ investigate equivalences using various methods, eg use a number line or a calculator to show that $\frac{1}{2}$ is the same as 0.5 and $\frac{5}{10}$
	3	Connecting decimal fractions to common fractions involving halves, fifths, tenths and hundredths	<ul style="list-style-type: none"> understand the relationship between decimal fractions and common fractions involving halves, fifths, tenths and hundredths
	4	Connecting decimal fractions to common fractions	<ul style="list-style-type: none"> understand the relationship between decimal fractions and common fractions

MA2-8NA generalises properties of odd and even numbers, generates number patterns, and completes simple number sentences by calculating missing values

Quest: (1) Patterns & missing values

Learning Journeys Describing, continuing & creating number patterns

NA.E.1 Describe, continue and create number patterns resulting from performing addition or subtraction	1	Identifying and creating additive number patterns (3s, 4s, 6s, 7s, 8s, 9s, from any starting point within 100)	<ul style="list-style-type: none"> identify additive number patterns, eg patterns that increase in 3s, 4s, 6s, 7s, 8s and 9s from any starting point describe the rule for a forwards (additive) number pattern, eg 'It goes up by 3s' continue and create an additive number pattern
	2	Identifying and creating subtractive number patterns (3s, 4s, 6s, 7s, 8s, 9s, from any starting point within 100)	<ul style="list-style-type: none"> identify subtractive number patterns, eg patterns that decrease by 3s, 4s, 6s, 7s, 8s and 9s from any starting point describe the rule for a backwards (subtractive) number pattern, eg 'It goes down by 3s' continue and create a subtractive number pattern represented in numbers, on a number line or expressed in words, eg 'make a pattern that starts at 20 and shrinks by subtracting 2 each time'

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-8NA generalises properties of odd and even numbers, generates number patterns, and completes simple number sentences by calculating missing values

Quest: (1) Patterns & missing values

Learning Journeys Describing, continuing & creating number patterns

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.1 Describe, continue and create number patterns resulting from performing addition or subtraction	3	Identifying and creating additive and subtractive number patterns (3s, 4s, 6s, 7s, 8s, 9s, from any starting point within 100)	<ul style="list-style-type: none"> identify additive or subtractive number patterns on a number line, hundreds chart or calendar, eg patterns that increase in 3s, 4s, 6s, 7s, 8s and 9s from any starting point describe the rule for a forwards (additive) or backwards (subtractive) number pattern, eg 'It goes up by 3s' continue and create an additive or subtractive number pattern represented in numbers, on a number line or expressed in words, eg 'make a pattern that starts at 0 and grows by adding 7 each time'

Learning Journeys Exploring odd and even numbers

NA.E.2 Investigate the conditions required for a number to be even or odd and identify even and odd numbers	1	Investigating odd and even numbers	<ul style="list-style-type: none"> model odd and even numbers of up to 2 digits using arrays with 2 rows compare and describe the difference between models of even numbers and models of odd numbers recognise the connection between even numbers and the multiplication facts for 2
	2	Identifying odd and even numbers	<ul style="list-style-type: none"> recognise the significance of the final digit of a whole number in determining whether a given number is even or odd identify even or odd numbers of up to 4 digits
	3	Identifying odd and even number patterns (add in number lines and number charts)	<ul style="list-style-type: none"> model even and odd numbers of up to 20 using arrays with 2 rows compare and describe the difference between the models of odd and even numbers recognise the connection between even numbers, doubles and the 2 times-tables; demonstrate the connection with words, models or numerals use the final digit of a whole number to determine whether a given number is even or odd (up to four digits)

Quest: (2) Patterns & missing values

Learning Journeys Using number sentences to find unknown quantities

NA.E.3 Use equivalent number sentences involving addition and subtraction to find unknown quantities	1	Using inverse operations to complete addition and/or subtraction number sentences (2-digit numbers)	<ul style="list-style-type: none"> complete number sentences involving addition and subtraction by calculating missing numbers, eg find the missing numbers: $\square + 55 = 83$, $\square - 15 = 19$ use inverse operations to complete number sentences justify solutions when completing number sentences
	2	Finding missing numbers where there are addition and/or subtraction operations on both sides of the equals sign	<ul style="list-style-type: none"> find the missing number in a number sentence involving operations of addition or subtraction on both sides of the equals sign, eg $8 + \square = 6 + 7$

NSW Curriculum Stage 2

Mathletics

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-8NA generalises properties of odd and even numbers, generates number patterns, and completes simple number sentences by calculating missing values

Quest: (2) Patterns & missing values

Learning Journeys Odd and even numbers

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.4 Investigate and use the properties of even and odd numbers	1	Using the properties of odd and even numbers	<ul style="list-style-type: none"> investigate and generalise the result of adding, subtracting and multiplying pairs of even numbers, pairs of odd numbers, or one even and one odd number, eg $\text{even} + \text{odd} = \text{odd}$, $\text{odd} \times \text{odd} = \text{odd}$ explain why the result of a calculation is even or odd with reference to the properties of the numbers used in the calculation predict whether the answer to a calculation will be even or odd by using the properties of the numbers in the calculation investigate the place value of digits within odd and even numbers

Learning Journeys Investigating multiple sequences

NA.E.5 Investigate number sequences involving multiples of 3, 4, 6, 7, 8 and 9	1	Investigating number sequences involving multiples of 3, 4, 6, 7, 8 and 9	<ul style="list-style-type: none"> generate number patterns using multiples of 3, 4, 6, 7, 8 and 9 investigate visual number patterns on a number chart find missing terms in a number sequence
--	---	---	--

Learning Journeys Exploring number patterns

NA.E.6 Explore and describe number patterns resulting from performing multiplication	1	Exploring number patterns resulting from performing multiplication	<ul style="list-style-type: none"> find a higher term in a number pattern resulting from performing multiplication, given the first few terms, eg determine the next term in the pattern 4, 8, 16, 32, 64, ... describe how the next term in a number pattern is calculated, eg 'Each term in the pattern is double the previous term' find missing terms in a number sequence
--	---	--	---

Learning Journeys Expressing equations as word problems

NA.E.7 Solve word problems by using number sentences involving multiplication or division where there is no remainder	1	Expressing given one-step word problems as a multiplication or division number sentences and solving	<ul style="list-style-type: none"> represent and solve multiplication and division word problems (up to 10×10 multiplication and division facts) using number sentences with a symbol for the unknown, eg 'Anne spent \$28 dollars on tickets to a show for her friends. If 7 friends are coming to the show, what was the cost of each ticket?' discuss whether it is more appropriate to represent the problem using \times or \div in order to calculate the solution
	2	Expressing given one-step equations as word problems	<ul style="list-style-type: none"> express given addition or subtraction equations as word problems (up to 2 digit with 2-digit addition or subtraction) express given multiplication or division equations as word problems (using multiplication facts up to 10×10)

NSW Curriculum Stage 2

Mathletics

Understanding Practice and Fluency (UPF)

Number and Algebra

MA2-8NA generalises properties of odd and even numbers, generates number patterns, and completes simple number sentences by calculating missing values

Quest: (2) Patterns & missing values

Learning Journeys Solving word problems involving mult and div

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.7 Solve word problems by using number sentences involving multiplication or division where there is no remainder	1	Solving two-step multiplication and/or division word problems, including correspondence problems	<ul style="list-style-type: none"> solve two-step word problems in context involving multiplication and division; choose the appropriate operation
	2	Solving multi-step multiplication and/or division word problems	<ul style="list-style-type: none"> solve multi-step word problems involving multiplication and division represent unknown with a letter
	3	Selecting efficient strategies to solve division problems	<ul style="list-style-type: none"> select and use a variety of mental and informal written strategies to solve division problems apply the inverse relationship of multiplication and division to justify answers check the answer to a word problem using digital technologies record mental strategies accurately

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-9MG measures, records, compares and estimates lengths, distances and perimeters in metres, centimetres and millimetres, and measures, compares and records temperatures

Quest: (1) Measuring length and temperature

Learning Journeys Comparing, ordering and measuring length

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.A.1 Measure, order and compare objects using familiar metric units of length	1	Comparing lengths in metres and centimetres	<ul style="list-style-type: none"> compare lengths and distances using metres and centimetres
	2	Ordering lengths in metres and centimetres	<ul style="list-style-type: none"> order lengths and distances using metres and centimetres
	3	Estimating and measuring to the nearest centimetre	<ul style="list-style-type: none"> estimate lengths and check by measuring; explain strategies used to estimate lengths and distances, such as by * referring to a known length, eg 'My handspan is 10 cm and my desk is 8 handspans long, so my desk is about 80 cm long' measure lengths and distances to the nearest centimetre using a centimetre ruler record lengths and distances using the abbreviation for centimetres (cm)
	4	Measuring in metres and centimetres	<ul style="list-style-type: none"> estimate and measure lengths and distances using metres and centimetres explain strategies used to estimate lengths and distances, such as by referring to a known length, eg 'My handspan is 10 cm and my desk is 8 handspans long, so my desk is about 80 cm long' record lengths and distances using abbreviations for metres and centimetres, eg 1 m 25 cm
	5	Introducing formal units for length: millimetres	<ul style="list-style-type: none"> recognise the need for a formal unit smaller than the centimetre to measure length develop a personal reference for the approximate length of 1 mm recognise and model that there are 10 mm in 1 cm, ie $10 \text{ mm} = 1 \text{ cm}$ estimate and use the millimetre as a unit to measure lengths to the nearest millimetre using a ruler record lengths using the abbreviation for millimetres (mm), eg 5 cm 3 mm or 53 mm compare lengths with the same standard unit

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-9MG measures, records, compares and estimates lengths, distances and perimeters in metres, centimetres and millimetres, and measures, compares and records temperatures

Quest: (2) Measuring length and temperature

Learning Journeys Using metric units to measure length

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.A.2 Use scaled instruments to measure and compare lengths	1	Using scaled instruments to measure length	<ul style="list-style-type: none"> select and use an appropriate device to measure lengths and check accuracy of estimations explain why 2 students may obtain different measures for the same length
	2	Selecting appropriate units of measurement: metres, centimetres, millimetres	<ul style="list-style-type: none"> explore the appropriateness of units when measuring length select and justify the most appropriate metric unit to measure given lengths and distances
	3	Converting between metres and centimetres (whole numbers only)	<ul style="list-style-type: none"> describe 1 m as 100 cm convert between metres and centimetres using whole numbers, eg 3 m is the same as 300 cm record measurement equivalents in a table explain the relationship between the size of a unit and the number of units needed
	4	Converting between centimetres and millimetres (whole numbers only)	<ul style="list-style-type: none"> describe 1 m as 100 cm convert between metres and centimetres using whole numbers, eg 3 m is the same as 300 cm record measurement equivalents in a table explain the relationship between the size of a unit and the number of units needed

Learning Journeys Length and 3D objects

MG.A.2 Use scaled instruments to measure and compare lengths	1	Applying length to attributes of three-dimensional objects	<ul style="list-style-type: none"> recognise the features of a three-dimensional object associated with length that can be measured describe the length, height and width of a three-dimensional object
--	---	--	---

Learning Journeys Introducing perimeter

MG.A.2 Use scaled instruments to measure and compare lengths	1	Introducing perimeter	<ul style="list-style-type: none"> use the term 'perimeter' to describe the total distance around a two-dimensional shape estimate and measure the perimeters of two-dimensional shapes describe when a perimeter measurement might be used in everyday situations
--	---	-----------------------	---

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-9MG measures, records, compares and estimates lengths, distances and perimeters in metres, centimetres and millimetres, and measures, compares and records temperatures

Quest: (2) Measuring length and temperature

Learning Journeys Reading temperature

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.A.3 Use scaled instruments to measure and compare temperatures	1	Using the language of temperature	<ul style="list-style-type: none"> identify benchmarks for freezing, cold, cool, warm, hot and boiling temperatures (water) identify benchmarks for cold, cool, warm and hot temperatures (air)
	2	Introducing thermometers	<ul style="list-style-type: none"> estimate temperature using personal reference use a standard thermometer to determine whether temperature is rising or falling relate thermometers to the number line introduce the unit of degrees to record temperatures recognise and read temperatures in everyday situations, eg weather report, cooking
	3	Measuring temperature	<ul style="list-style-type: none"> recognise the need for formal units to measure temperature use a thermometer to measure and compare temperatures to the nearest degree Celsius record temperatures to the nearest degree Celsius using the symbol for degrees (°) use a digital or analogue thermometer to take and record daily temperature readings

MA2-10MG measures, records, compares and estimates areas using square centimetres and square metres

Quest: (1) Area: square cm and m

Learning Journeys Using formal units for area

MG.B.1 Recognise and use formal units to measure and estimate the areas of rectangles	1	Introducing formal units for area: the square centimetre	<ul style="list-style-type: none"> establish the need for a formal unit to measure area and introduce square centimetres develop a sense of the area of 1 square centimetre and identify surfaces that have area 'about 1 square centimetre', 'less than 1 square centimetre' and 'greater than 1 square centimetre' identify everyday situations where square centimetres are an appropriate unit for measuring area introduce the abbreviation cm^2 for recording area in square centimetres
	2	Introducing formal units for area: the square metre	<ul style="list-style-type: none"> recognise the need for a larger formal unit to measure area and introduce square metres develop a sense of the area of 1 square metre and identify surfaces that have area 'about 1 square metre', 'less than 1 square metre' and 'greater than 1 square metre' identify everyday situations where square metres are an appropriate unit for measuring the area, eg floor of a room recognise that a square metre need not be square in shape, eg cut a piece of cardboard that is 1 metre by 1 metre in half and join the shorter ends to make an area that is 2 metres by half a metre introduce the abbreviation m^2 for measuring area in square metres

NSW Curriculum Stage 2

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-10MG measures, records, compares and estimates areas using square centimetres and square metres

Quest: (1) Area: square cm and m

Learning Journeys Using formal units for area

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.B.1 Recognise and use formal units to measure and estimate the areas of rectangles	3	Estimating and measuring areas of rectangles using efficient strategies and counting in square centimetres or metres	<ul style="list-style-type: none"> measure the area of rectangles (including squares) using square centimetres and/or square metres (both tiling and using grid overlay) using whole number side lengths only estimate areas of rectangles (including squares) in square centimetres and/or square metres and then check by measuring develop efficient strategies for counting square centimetres/ metres when measuring areas of rectangles draw possible rectangles on a grid to represent a given whole number rectangular area

Quest: (2) Area: square cm and m

Learning Journeys Solving word problems involving mult and div

MG.B.2 Compare the areas of regular and irregular shapes by informal means	1	Measuring areas of rectilinear figures by decomposing into rectangles and counting units	<ul style="list-style-type: none"> recognise area as additive decompose rectilinear figures into rectangles to find their area by tiling or using a grid overlay
	2	Estimating and comparing areas of non-rectilinear shapes using a square grid	<ul style="list-style-type: none"> use a square grid to approximate and compare the areas of non-rectilinear shapes compare how different placements of the grid make approximation easier or more difficult find and explain the area of irregular shapes by counting squares or part squares
	3	Approximating and comparing areas of non-rectilinear shapes using a square centimetre grid	<ul style="list-style-type: none"> use a square-centimetre grid to approximate and compare the areas of non-rectilinear shapes compare how different placements of the grid make approximation easier or more difficult find and explain the area of irregular shapes by counting squares or part squares

Learning Journeys Comparing objects using familiar metric units

MG.B.3 Compare objects using familiar metric units of area	1	Comparing and ordering rectangular areas using counting of standard metric units	<ul style="list-style-type: none"> compare two areas by measuring using standard metric units order three or more areas by measuring using standard metric units choose the most appropriate unit cm^2 or m^2 and justify selection
--	---	--	--

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-11MG measures, records, compares and estimates volumes and capacities using litres, millilitres and cubic centimetres			
Quest: (1) Volume/capacity: L, mL, cubic cm			
Learning Journeys Measure, order and compare units of volume			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.C.1 Measure, order and compare objects using familiar metric units of capacity	1	Introducing formal units for volume and capacity: litres	<ul style="list-style-type: none"> recognise and explain the need for formal units to measure volume and capacity develop a personal reference for one litre and fractions of 1 litre (quarters and halves); relate the litre to familiar everyday containers, eg milk cartons recognise that one-litre containers can be a variety of shapes record volumes and capacities using the abbreviation for litres (L)
	2	Estimating, comparing and measuring in litres	<ul style="list-style-type: none"> estimate and measure capacities to the nearest litre compare and order 2 or more containers by capacity measured in litres, including the capacity of commercially packaged objects whose capacity is stated in litres record volumes and capacities using the abbreviation for litres (L)
Learning Journeys Measuring volume			
MG.C.1 Measure, order and compare objects using familiar metric units of capacity	1	Using unit cubes to measure volume	<ul style="list-style-type: none"> measure volumes by counting unit cubes, using cubic centimetres, cubic inches, cubic feet and improvised units
	2	Estimating and measuring volume using cubic centimetre blocks	<ul style="list-style-type: none"> use the cubic centimetre as a unit to measure volumes by packing small containers with cubic-centimetre blocks and describing in terms of layers, eg '2 layers of 10 cubic-centimetre blocks' construct three-dimensional objects using cubic-centimetre blocks and count the blocks to determine the volumes of the objects; devise and explain strategies for counting blocks compare the volumes of 2 or more objects made from cubic-centimetre blocks by counting blocks record volumes using the abbreviation for cubic centimetres (cm³)
	3	Using cubic centimetres to measure volume	<ul style="list-style-type: none"> measure the volumes of rectangular containers by packing them with cubic-centimetre blocks explain the advantages and disadvantages of using cubic-centimetre blocks as a unit to measure volume describe arrangements of cubic-centimetre blocks in containers in terms of layers connect the layers of blocks with multiplying the dimensions

NSW Curriculum Stage 2

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-11MG measures, records, compares and estimates volumes and capacities using litres, millilitres and cubic centimetres

Quest: (2) Volume/capacity: L, mL, cubic cm

Learning Journeys Measuring capacity in millilitres

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.C.3 Use scaled instruments to measure and compare capacities	1	Introducing standard measurements in millilitres	<ul style="list-style-type: none"> know that a standard cup is 250 ml and a standard teaspoon is 5 ml recognise standard measurements in everyday contexts such as cooking
	2	Introducing formal units for volume and capacity: millilitres	<ul style="list-style-type: none"> recognise the need for a formal unit smaller than the litre to measure volume and capacity recognise that there are 1000 millilitres in 1 litre, ie 1000 millilitres = 1 litre relate the millilitre to familiar everyday containers and familiar informal units, eg 250 mL fruit juice containers, 1 teaspoon is approximately 5 mL
	3	Reading scales with 100 millilitre markings	<ul style="list-style-type: none"> read a scale where every 100 ml is marked and labelled read a scale where every 100 ml is marked and half and 1 litre are labelled read a scale where every 100 ml is marked and every other 100 ml is labelled
	4	Measuring with millilitres to the nearest 100 ml	<ul style="list-style-type: none"> use the millilitre as a unit to measure volume and capacity, using a device calibrated in millilitres (read to the nearest 100ml with every 100ml or every other 100ml marked) record volumes and capacities using the abbreviation for millilitres (mL) estimate the capacity of a container in millilitres and check by measuring (measure to the nearest 100ml with every 100ml or every other 100ml marked) compare and order the capacities of 2 or more containers measured in millilitres

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-12MG measures, records, compares and estimates the masses of objects using kilograms and grams

Quest: (1) Mass: kg and g

Learning Journeys Using the kilogram to measure mass

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.D.1 Measure, order and compare objects using familiar metric units of mass	1	Introducing formal units for mass: the kilogram	<ul style="list-style-type: none"> establish the need for formal units to measure mass and introduce the kilogram develop a sense of the mass of 1 kilogram and identify objects that have mass 'about 1 kilogram', 'less than 1 kilogram', 'greater than 1 kilogram', eg a litre of milk is about 1 kilogram, a standard pack of flour is 1 kilogram identify everyday situations where kilograms are an appropriate unit for measuring the mass introduce the abbreviation 'kg' for recording mass in kilograms
	2	Measuring mass in kilograms	<ul style="list-style-type: none"> compare and order 2 or more objects by mass measured to the nearest kilogram using carried scales estimate the number of objects that have a total mass of 1 kilogram and check by measuring estimate mass using a personal reference for a kilogram record mass using the abbreviation 'kg' compare masses using uniform informal units and the symbols $>$, $=$, $<$ compare masses using simple scaling by integers, eg 'five times as heavy'

Quest: (2) Mass: kg and g

Learning Journeys Measuring in grams and kilograms

MG.D.2 Use scaled instruments to measure and compare masses	1	Investigating mass in packaging	<ul style="list-style-type: none"> interpret information about mass on commercial packaging estimate the mass of a substance in a partially-filled container/packet from the information on the label
	2	Introducing formal units for mass: the gram	<ul style="list-style-type: none"> establish the need for a smaller unit of mass and introduce the gram, including that 1000 grams = 1 kilogram develop a sense of the mass of standard everyday objects in grams, eg an egg is about 50 grams identify everyday situations where grams are an appropriate unit for measuring the mass introduce the abbreviation 'g' for recording mass in grams and record masses calculate the number of grams in a whole number of kilograms interpret simple fractions ($\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$) of a kilogram and relate these to the number of grams
	3	Measuring in grams	<ul style="list-style-type: none"> estimate mass using personal references for grams and 'guess and check' measure mass in grams by using and interpreting varied scales and images of scales record mass in grams using the appropriate abbreviation (g)
	4	Measuring in grams and kilograms	<ul style="list-style-type: none"> estimate mass using personal references for grams and kilograms choose appropriate standard units to estimate and measure (g/kg) measure mass in grams and kilograms by using and interpreting varied scales record mass in grams, kilograms and mixed units using the appropriate abbreviations (g), (kg), eg 5 kg and 500 g

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-13MG reads and records time in one-minute intervals and converts between hours, minutes and seconds			
Quest: (1) Time: minutes, hours, seconds			
Learning Journeys Telling the time to the minute			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.E.1 Tell time to the minute and investigate the relationship between units of time	1	Telling time to the minute (analogue)	<ul style="list-style-type: none"> read time on analogue clocks to the minute using the terms 'o'clock', 'past' and 'to', including 'half-past', 'quarter past' and 'quarter to' observe and describe the position or draw of the hands of an analogue clock when reading time to the minute, including the hour hand, minute hand and second hand position or draw the hands on an analogue clock to show time to the minute where the time is given using the terms 'o'clock', 'past' and 'to', including 'half-past', 'quarter past' and 'quarter to'
	2	Telling time to the minute (digital)	<ul style="list-style-type: none"> read time on 12-hour digital clocks to the minute using the terms 'o'clock', 'past' and 'to', including 'half-past', 'quarter past' and 'quarter to' and write in words record times on analogue clocks to the minute in 12-hour digital format position or draw the hands on an analogue clock to show time to the minute where the time is given in 12-hour digital format connect 12-hour digital displays for times the minute to their corresponding display on an analogue clock
Quest: (2) Time: minutes, hours, seconds			
Learning Journeys Converting time and solving time problems			
MG.E.2 Convert between units of time	1	Converting between units of time (multiplicative conversions only)	<ul style="list-style-type: none"> calculate the number of seconds in a whole number of minutes calculate the number of minutes in a whole number of hours calculate the number of days in a whole number of weeks calculate the number of months in a whole number of years solve problems involving conversion between units of time
Learning Journeys Using AM and PM			
MG.E.3 Use am and pm notation and solve simple time problems	1	Using am and pm notation	<ul style="list-style-type: none"> know that there are 24 hours in a day recognise that midday/noon divides the day into two equal parts of 12 hours each establish the need to distinguish between times in the first 12 hours of the day and the second 12 hours of the day, and introduce am and pm notation know and record midday/noon as 12 pm and 12:00 pm, and midnight as 12 am and 12:00 am use am and pm notation to record times in relation to midday/noon and midnight read times written using am and pm notation using 'past', 'to', morning, afternoon, evening and night appropriately', eg 3:40 pm is 'twenty to four in the afternoon'
	2	Solving problems relating to elapsed time involving the four operations (to five minutes)	<ul style="list-style-type: none"> use the 4 operations to solve word problems involving intervals of time including problems involving simple fractions or decimals, and problems that require expressing measurements given in a larger unit in terms of a smaller unit

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-13MG reads and records time in one-minute intervals and converts between hours, minutes and seconds			
Quest: (2) Time: minutes, hours, seconds			
Learning Journeys Read and interpret timetables			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.E.4 Read and interpret simple timetables, timelines and calendars	1	Using timetables (12-hour time)	<ul style="list-style-type: none"> use real-world timetables (12-hour time only) to determine arrival time given the desired departure time, * including when the exact departure time is not listed exactly in the timetable, ie needing to use an earlier departure time use real-world timetables (12-hour time only) to determine departure time given the desired arrival time, including when the arrival time is not listed exactly in the timetable create timetables using given information
	2	Introducing timelines	<ul style="list-style-type: none"> interpret the sequence of events on a timeline (understanding of scale not expected)
Learning Journeys Writing dates			
MG.E.4 Read and interpret simple timetables, timelines and calendars	1	Writing dates	<ul style="list-style-type: none"> identify a day/date on a calendar and write the date using the appropriate notation eg 11/5/17
MA2-14MG makes, compares, sketches and names three-dimensional objects, including prisms, pyramids, cylinders, cones and spheres, and describes their features			
Quest: (1) Features of 3D objects			
Learning Journeys Exploring prisms and nets			
MG.F.1 Make models of three-dimensional objects and describe key features	1	Introducing rectangular prisms	<ul style="list-style-type: none"> manipulate and describe the attributes of rectangular prisms recognise that a cube is a special kind of rectangular prism recognise rectangular prisms in the environment and drawings
	2	Exploring prisms	<ul style="list-style-type: none"> manipulate and describe the attributes of prisms recognise that a cube is a special kind of prism recognise prisms in the environment and drawings
	3	Comparing, sorting and naming prisms and pyramids	<ul style="list-style-type: none"> compare and sort prisms and pyramids by their geometric properties, eg number of edges, number of vertices describe and name prisms and pyramids by the shape of their base
		Comparing three-dimensional objects including pyramids, prisms, cones, spheres and cylinders	<ul style="list-style-type: none"> describe similarities and differences between prisms (including cubes), pyramids, cylinders, cones and spheres, eg surfaces, faces, edges and vertices recognise and describe the use of three-dimensional objects in a variety of contexts, eg buildings, packaging identify and name three-dimensional objects as prisms (including cubes), pyramids, cylinders, cones and spheres
	4	Making basic models of three-dimensional objects	<ul style="list-style-type: none"> use a variety of materials to make models of prisms (including cubes), pyramids, cylinders, cones and spheres, given a three-dimensional object, picture or photograph to view identify and describe the two-dimensional shapes that can be found in a three-dimensional object, eg build a structure using concrete materials and describe it using geometric terms so that a partner will be able to build it

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-14MG makes, compares, sketches and names three-dimensional objects, including prisms, pyramids, cylinders, cones and spheres, and describes their features

Quest: (1) Features of 3D objects

Learning Journeys Rectangular prism nets

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.1 Make models of three-dimensional objects and describe key features	1	Introducing nets of rectangular prisms	<ul style="list-style-type: none"> deconstruct everyday packages that are prisms (including cubes) to create nets, eg cut up tissue boxes make connections between nets and the two-dimensional shapes of the faces recognise that a net requires each face to be connected to at least 1 other face investigate, make and identify the variety of nets that can be used to create a particular prism, such as the variety of nets that can be used to make a cube
	2	Introducing nets of prisms	<ul style="list-style-type: none"> deconstruct everyday packages that are prisms (including cubes) to create nets, eg cut up tissue boxes make connections between nets and the two-dimensional shapes of the faces recognise that a net requires each face to be connected to at least 1 other face investigate, make and identify the variety of nets that can be used to create a particular prism, such as the variety of nets that can be used to make a cube compare two-dimensional shapes to parts of three-dimensional objects in the environment

Quest: (2) Features of 3D objects

Learning Journeys Identifying prisms

MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Identifying prisms in the environment	<ul style="list-style-type: none"> identify prisms (including cubes) in the environment and from drawings, photographs and descriptions investigate types of prisms used in commercial packaging and give reasons for some being more commonly used
	2	Drawing prisms	<ul style="list-style-type: none"> sketch prisms (including cubes), attempting to show depth compare their own drawings of prisms (including cubes), with other drawings and photographs draw prisms (including cubes), using a computer drawing tool, attempting to show depth draw different views of an object constructed from connecting cubes on isometric grid paper
	3	Representing prisms with models	<ul style="list-style-type: none"> interpret given isometric drawings to make models of three-dimensional objects using connecting cubes
	4	Introducing nets of prisms	<ul style="list-style-type: none"> draw and describe nets for rectangular and triangular prisms

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-14MG makes, compares, sketches and names three-dimensional objects, including prisms, pyramids, cylinders, cones and spheres, and describes their features

Quest: (2) Features of 3D objects

Learning Journeys Identifying pyramids

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Identifying pyramids in the environment	<ul style="list-style-type: none"> identify pyramids in the environment and from drawings, photographs and descriptions investigate types of pyramids used in commercial packaging and give reasons for some being more commonly used
	2	Drawing pyramids	<ul style="list-style-type: none"> sketch pyramids, attempting to show depth compare their own drawings of pyramids, with other drawings and photographs draw pyramids, using a computer drawing tool, attempting to show depth

Learning Journeys Prisms and pyramids

MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Constructing prisms and pyramids from given nets	<ul style="list-style-type: none"> construct prisms and pyramids from given nets
---	---	--	---

Learning Journeys Identifying cylinders

MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Identifying cylinders in the environment	<ul style="list-style-type: none"> identify cylinders in the environment and from drawings, photographs and descriptions investigate types of cylinders used in commercial packaging and give reasons for some being more commonly used
	2	Drawing cylinders	<ul style="list-style-type: none"> sketch cylinders, attempting to show depth compare their own drawings of cylinders, with other drawings and photographs draw cylinders, using a computer drawing tool, attempting to show depth

Learning Journeys Identifying cones

MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Identifying cones in the environment	<ul style="list-style-type: none"> identify cones in the environment and from drawings, photographs and descriptions investigate types of cones used in commercial packaging and give reasons for some being more commonly used
	2	Drawing cones	<ul style="list-style-type: none"> sketch cones, attempting to show depth compare their own drawings of cones, with other drawings and photographs draw cones, using a computer drawing tool, attempting to show depth

Learning Journeys Identifying spheres

MG.F.2 Investigate and represent three-dimensional objects using drawings	1	Identifying spheres in the environment	<ul style="list-style-type: none"> identify spheres in the environment and from drawings, photographs and descriptions investigate types of spheres used in commercial packaging and give reasons for some being more commonly used
	2	Drawing spheres	<ul style="list-style-type: none"> sketch spheres, attempting to show depth compare their own drawings of spheres, with other drawings and photographs draw spheres, using a computer drawing tool, attempting to show depth

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-15MG manipulates, identifies and sketches two-dimensional shapes, including special quadrilaterals, and describes their features

Quest: (1) Features of 2D shapes

Learning Journeys Comparing and identifying two-dimensional shapes

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.1 Compare and describe features of two-dimensional shapes, including the special quadrilaterals	1	Comparing and describing two-dimensional shapes, including special quadrilaterals	<ul style="list-style-type: none"> identify and name a shape given a description of its features sort two-dimensional shapes using given attributes, eg number of sides, number of parallel sides compare similarities and differences between two-dimensional shapes, including the special quadrilaterals
	2	Identifying regular and irregular two-dimensional shapes	<ul style="list-style-type: none"> identify a regular shape from a group of irregular shapes, eg a regular pentagon in a group of irregular pentagons explain the difference between regular and irregular two-dimensional shapes identify and name two-dimensional shapes presented as either regular or irregular shapes in different orientations
	3	Drawing and constructing regular and irregular two-dimensional shapes	<ul style="list-style-type: none"> draw regular and irregular two-dimensional shapes in different orientations construct regular and irregular two-dimensional shapes from a variety of materials, eg cardboard, straws, pattern blocks recognise that a triangle cannot be constructed from 3 lengths of a material if the sum of the lengths of the 2 shorter sides is less than the length of the longest side solve problems requiring the greatest or least number of two-dimensional shapes needed to compose a larger shape in a variety of ways

Learning Journeys Comparing features of two-dimensional shapes

MG.G.1 Compare and describe features of two-dimensional shapes, including the special quadrilaterals	1	Comparing the strengths of two-dimensional constructions	<ul style="list-style-type: none"> construct 3-sided and 4-sided frames using various materials; compare the rigidity of the frames explore the use of a brace in a 4-sided frame; explain how the brace makes the frame more rigid
	2	Classifying plane shapes by their spatial features	<ul style="list-style-type: none"> classify plane shapes by the nature and number of sides, angles and symmetry; including parallel/perpendicular sides, right, obtuse, acute angles
	3	Sorting plane shapes by their spatial features	<ul style="list-style-type: none"> sort a group of plane shapes by their spatial features identify how a group of plane shapes has been sorted/classified

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-15MG manipulates, identifies and sketches two-dimensional shapes, including special quadrilaterals, and describes their features

Quest: (1) Features of 2D shapes

Learning Journeys Recognising lines of symmetry

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.2 Identify symmetry in the environment	1	Recognising line symmetry in the environment	<ul style="list-style-type: none"> observe and describe symmetry informally in everyday objects, pictures, designs and shapes identify shapes that are symmetrical and are not symmetrical by folding to test for symmetry sort objects, pictures, designs and/or shapes according to whether they are symmetrical or not draw a single line of symmetry on given pictures, designs and shapes
	2	Recognising line symmetry of shapes	<ul style="list-style-type: none"> define the line of symmetry of a two-dimensional shape as a line across which the shape can be folded into 2 matching parts identify a line of symmetry in two-dimensional shapes sort two-dimensional shapes according to whether they are symmetrical or not
	3	Drawing lines of symmetry on given designs and shapes	<ul style="list-style-type: none"> recognise that some designs and shapes may have more than 1 line of symmetry identify and draw all lines of symmetry on designs and shapes determine the total number of lines of symmetry on designs and shapes determine whether or not a given line through designs and shapes is a line of symmetry

Quest: (2) Features of 2D shapes

Learning Journeys Composing and decomposing 2D shapes

MG.G.3 Compare and describe two-dimensional shapes that result from combining and splitting common shapes, with and without the use of digital technologies	1	Composing and decomposing two-dimensional shapes	<ul style="list-style-type: none"> create two-dimensional shapes by combining and splitting common shapes follow instructions to create a common shape using a specified set of 2 or more common shapes describe and/or name the shape formed by combining and splitting common shapes compare the area of combined and split shapes and their components investigate the range of combinations that can be used to combine or split common shapes
---	---	--	---

Learning Journeys Introducing transformations

MG.G.4 Create symmetrical patterns, pictures and shapes, with and without the use of digital technologies	1	Introducing transformations: Slides (translations)	<ul style="list-style-type: none"> describe the process of performing a 'slide' and the similarities and differences between the original shape and the shape after it has undergone a 'slide' identify and describe a one-step slide of a shape using the term 'slide' perform a one-step slide of a shape using physical materials and record the result without the use of digital technology perform a one-step slide of a shape and record the result using digital technology predict and draw the result of a one-step slide on a given shape
---	---	--	---

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-15MG manipulates, identifies and sketches two-dimensional shapes, including special quadrilaterals, and describes their features

Quest: (2) Features of 2D shapes

Learning Journeys Introducing transformations

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.4 Create symmetrical patterns, pictures and shapes, with and without the use of digital technologies	2	Introducing transformations: Flips (reflections)	<ul style="list-style-type: none"> describe the process of performing a 'flip' and the similarities and differences between the original shape and the shape after it has undergone a 'flip' identify and describe a one-step flip of a shape using the term 'flip' perform a one-step flip of a shape using physical materials and record the result without the use of digital technology perform a one-step flip of a shape and record the result using digital technology predict and draw the result of a one-step flip on a given shape
	3	Introducing transformations: Turns (rotations)	<ul style="list-style-type: none"> describe the process of performing a 'turn' and the similarities and differences between the original shape and the shape after it has undergone a 'turn' about a centre of rotation recognise and describe turns as 'clockwise' or 'anti-clockwise' identify and describe one-step quarter turns, half turns and three-quarter turns of a shape using the terms 'quarter turn', 'half turn', 'three-quarter turn' perform one-step quarter turns, half turns and three-quarter turns of shapes using physical materials and record the results without the use of digital technology perform one-step quarter turns, half turns and three-quarter turns of a shape and perform a one-step flip of a shape, recording the results using digital technology predict and draw the result of one-step quarter turns, half turns and three-quarter turns on a given shape explore and describe the number of half turns and quarter turns required for a full-turn

Learning Journeys Creating and drawing summertical designs

MG.G.4 Create symmetrical patterns, pictures and shapes, with and without the use of digital technologies	1	Creating and drawing symmetrical designs and shapes	<ul style="list-style-type: none"> create symmetrical designs using physical materials create symmetrical shapes using physical materials draw symmetrical designs and shapes without the use of digital technology create symmetrical designs and shapes using digital technology
	2	Completing symmetrical designs	<ul style="list-style-type: none"> complete symmetrical designs and shapes given their line of symmetry and one half of the design or shape

Learning Journeys Recognising tessellations

MG.G.4 Create symmetrical patterns, pictures and shapes, with and without the use of digital technologies	1	Recognising tessellations	<ul style="list-style-type: none"> recognise and describe transformations in tessellating designs consisting of a single shape create and record tessellating designs using transformations on a single shape determine whether a shape will or will not tessellate
---	---	---------------------------	--

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-16MG identifies, describes, compares and classifies angles

Quest: (1) Angle introduction

Learning Journeys Identifying and comparing angles

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.H.1 Identify angles as measures of turn and compare angle sizes in everyday situations	1	Introducing right angles	<ul style="list-style-type: none"> identify right angles on two-dimensional shapes and three-dimensional objects identify right angles in pictures, designs and the environment identify right angles in line diagrams use and interpret the symbol \square in diagrams to represent a right angle define perpendicular lines and identify them in pictures, designs and the environment recognise that a pair of perpendicular lines form 4 right angles
	2	Comparing angles informally	<ul style="list-style-type: none"> compare angles directly by placing 1 angle over another compare angles indirectly by using a hinged angle measurer

Learning Journeys Introducing angles

MG.H.1 Identify angles as measures of turn and compare angle sizes in everyday situations	1	Introducing the concept of angles up to 180°	<ul style="list-style-type: none"> understand and describe angles as an amount of turning, openings identify angles in everyday situations, eg door openings, designs, between the arms of a clock recognise that angles are formed whenever 2 lines meet or when 2 rays meet at a common endpoint
---	---	---	---

Quest: (2) Angle introduction

Learning Journeys Classifying angles

MG.H.2 Compare angles and classify them as equal to, greater than or less than a right angle	2	Classifying angles in relation to a right angle	<ul style="list-style-type: none"> classify angles as 'less than a right angle', 'about the same as a right angle', 'greater than a right angle'
	3	Classifying angles as acute, right or obtuse	<ul style="list-style-type: none"> identify and name angles as acute, right or obtuse categorise angles as acute, right or obtuse draw and create angles of a given size: acute, right, obtuse (no protractors)
	4	Classifying angles as acute, right, obtuse, straight, reflex or a revolution	<ul style="list-style-type: none"> understand and describe angles greater than or equal to 180° identify and name angles as acute, right, obtuse, straight, reflex and revolution categorise angles as acute, right, obtuse, straight, reflex and revolution draw and create angles of a given size: acute, right, obtuse, straight, reflex and revolution (no protractors)

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-17MG uses simple maps and grids to represent position and follow routes, including using compass directions

Quest: (1) Simple maps & grids

Learning Journeys Interpreting and creating referenced maps

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.I.1 Create and interpret simple grid maps to show position and pathways	1	Interpreting grid referenced maps	<ul style="list-style-type: none"> establish that grid referencing on maps allows for more accurate description of features/locations understand the structure (letter then number, horizontal then vertical) and meaning of grid references (everything in that grid square) use grid references to describe features/locations on maps identify features/locations on maps given their grid reference
	2	Creating grid referenced maps	<ul style="list-style-type: none"> draw grid referenced maps of familiar locations such as the classroom, school or local area use technology to create grid referenced maps of familiar locations such as the classroom, school or local area
	3	Drawing pathways on grid referenced maps	<ul style="list-style-type: none"> draw a path from 1 feature to another on a grid referenced map given the grid reference of each feature use grid references to describe a path from 1 feature to another on a grid referenced map

Quest: (2) Simple maps & grids

Learning Journeys Using legends and reading maps

MG.I.2 Use simple scales, legends and directions to interpret information contained in basic maps	1	Using legends on maps	<ul style="list-style-type: none"> establish the need for legends on maps with and without grid referencing use the legend of a map to determine the feature located at a given grid reference use the legend of a map to determine the grid reference for a given feature
	2	Introducing cardinal compass directions	<ul style="list-style-type: none"> understand, locate and label the 4 cardinal compass directions on a compass rose: north (N), south (S), east (E) and west (W) connect the 4 cardinal compass directions to features of the local area from their particular location determine the direction of other cardinal compass directions when given one of the cardinal compass directions
	3	Describing locations on maps using cardinal compass directions	<ul style="list-style-type: none"> recognise that north (N) is typically represented by an arrow on a map use the 4 cardinal compass directions to describe the location of one feature in relation to another on a map that has an arrow representing north
	4	Following and giving cardinal compass directions	<ul style="list-style-type: none"> follow a sequence of 2 or more directions to find a location within a safe zone of the school give a sequence of 2 or more directions for a another person to find a location within a safe zone of the school
	5	Drawing routes on maps using cardinal compass directions	<ul style="list-style-type: none"> draw a route on a map given a sequence of directions involving cardinal directions and landmarks use cardinal directions and landmarks to describe a route between 2 locations on a map

NSW Curriculum

Stage 2

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA2-17MG uses simple maps and grids to represent position and follow routes, including using compass directions

Quest: (2) Simple maps & grids

Learning Journeys Solving measurement problems

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.I.2 Use simple scales, legends and directions to interpret information contained in basic maps	1	Using multiplication and division to solve measurement and scaling problems (within 100)	<ul style="list-style-type: none"> solve simple rates problems using multiplication and division (within 100), eg 'Teesha made 3 cards in 1 hour. How many cards can she make in 3 hours?' write equations using a symbol, eg a box or a blank, to represent the unknown number compare their own and others' methods of solution

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA2-18SP selects appropriate methods to collect data, and constructs, compares, interprets and evaluates data displays, including tables, picture graphs and column graphs

Quest: (1) Display & interpret data

Learning Journeys Introducing the statistical investigation process

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.1 Identify questions or issues for categorical variables; identify data sources and plan methods of data collection and recording	1	Introducing the statistical investigation process (including line plots)	<ul style="list-style-type: none"> determine what data to gather in order to investigate a question of interest, eg colour, mode of transport, gender, type of animal, sport collect data through questioning and record the data using tally marks identify categories of data and use them to sort data, eg sort data collected on attendance by day of the week and into boys and girls present represent numerical or category data in a table, list or picture graph (one-to-one correspondence) record observations based on data collected and displayed in a list, table, picture graph or line plot
	2	Introducing the statistical investigation process (tables, lists, picture graphs or bar graphs)	<ul style="list-style-type: none"> determine what data to gather in order to investigate a question of interest, eg colour, mode of transport, gender, type of animal, sport collect data through questioning and record the data using tally marks identify categories of data and use them to sort data, eg sort data collected on attendance by day of the week and into boys and girls present represent category data in a table, list, bar graph or picture graph (one-to-one correspondence) record observations based on data collected and displayed in a list, table, picture graph, or simple bar graph

Learning Journeys Category data

SP.A.1 Identify questions or issues for categorical variables; identify data sources and plan methods of data collection and recording	1	Posing questions related to category data	<ul style="list-style-type: none"> pose questions about a matter of interest to obtain information that can be recorded in categories adjust statistical questions to ensure their suitability recognise that data can be collected by the user or others; identify possible sources of data collected by others, eg newspapers, government data-collection agencies, sporting agencies, environmental groups pose questions based on category data recorded by others
	2	Collecting and recording category data	<ul style="list-style-type: none"> predict and create a list of categories for efficient data collection in relation to a matter of interest, eg 'Which breakfast cereal is the most popular with members of our class?' collect data by conducting a simple survey and create a list or table (with and without digital technology) to organise the data, eg collect data on the number of each colour of lollies in a packet compare collection and recording methods

Learning Journeys Statistical Investigations

SP.A.2 Collect data, organise it into categories, and create displays using lists, tables, picture graphs and simple column graphs, with and without the use of digital technologies	1	Constructing and interpreting tables	<ul style="list-style-type: none"> represent given or collected categorical data in tables using appropriate headings and structure interpret data in tables to solve problems; answer comparative and summative questions
	2	Conducting a simple statistical investigation (tables, lists, picture graphs, bar graphs)	<ul style="list-style-type: none"> determine what data to gather in order to investigate a statistical question collect, record and sort data represent category data in a table, list, picture graph or column graph (including many-to-one correspondence) make a simple concluding statement based on data collected

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA2-18SP selects appropriate methods to collect data, and constructs, compares, interprets and evaluates data displays, including tables, picture graphs and column graphs

Quest: (1) Display & interpret data

Learning Journeys Representing and interpreting information

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.2 Collect data, organise it into categories, and create displays using lists, tables, picture graphs and simple column graphs, with and without the use of digital technologies	1	Introducing and reading data in column graphs with one-to-one correspondence	<ul style="list-style-type: none"> become familiar with the structure and layout of a basic column graph including title, labels on each axis, equal spacing answer one-step and two-step questions, eg, 'How many more students like reading than art?'; identify basic similarities and differences between categories; make simple conclusions recognise and remedy errors in column graphs
	2	Representing and reading data in a given column graph with one-to-one correspondence	<ul style="list-style-type: none"> complete a vertical or horizontal column graph (one-to-one correspondence); choose the correct title for a bar graph answer one-step and two-step questions, eg, 'How many more students like reading than art?'; identify basic similarities and differences between categories; make simple conclusions agree or disagree with simple statements made by others related to data in a column graph
	3	Representing and reading data displayed in tables or lists	<ul style="list-style-type: none"> display category or numerical data using lists and tables pose questions and answer one-step and two-step questions, eg 'How many more students like reading than art?'; identify basic similarities and differences between categories; make simple conclusions
	4	Representing and reading category data in a table	<ul style="list-style-type: none"> represent primary or secondary data in a given table using appropriate headings and layout interpret data in a table; ask and answer summative and comparative questions

Learning Journeys Comparing data displays

SP.A.3 Interpret and compare data displays	1	Comparing basic data displays (tables, lists, picture graphs, column graphs)	<ul style="list-style-type: none"> represent the same data set using more than one type of display (tables, lists, picture graphs or column graphs) and compare the displays discuss the advantages and/or disadvantages of different representations of the same data describe information and make conclusions about data presented in different data displays, eg 'Football is the most popular sport for students in Year 3 at our school'
--	---	--	---

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA2-18SP selects appropriate methods to collect data, and constructs, compares, interprets and evaluates data displays, including tables, picture graphs and column graphs

Quest: (2) Display & interpret data

Learning Journeys Select and trial methods for data collection

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.4 Select and trial methods for data collection, including survey questions and recording sheets	1	Creating and refining a survey	<ul style="list-style-type: none"> create a survey and related recording sheet, considering the appropriate organisation of categories for data collection; predict possible responses identify questions and issues relevant to given categorical data, matches statistical questions with given data sets; recognises statistical questions that are clearly unsuitable choose effective ways to collect and record data for an investigation, eg creating a survey with a scale of 1 to 5 to indicate preferences refine survey questions as necessary after a small trial discuss and decide the most suitable question to investigate a particular matter of interest, eg by narrowing the focus of a question
	2	Conducting and evaluating a survey	<ul style="list-style-type: none"> conduct a survey to collect categorical data discuss and determine possible improvements to the questions or recording sheet compare the effectiveness of different methods of collecting and recording data discuss the advantages and/or disadvantages of open-ended questions in a survey, compared to questions with predetermined categories
	3	Collecting and sorting data	<ul style="list-style-type: none"> plan methods of data collection (eg, surveying or questioning, when to ask, who to ask) and efficient ways of * recording data (eg, tables and tally charts); identify issues with data collection and refines the process as appropriate recognise that data can come from other sources, eg governmental agencies, sports, environmental agencies sort data into the correct categories; enter data into the correct cells in a table; create a table in a spreadsheet (digital recording); recognise when data has been sorted incorrectly

Learning Journeys Column graphs using many-to-one correspondence

SP.A.5 Construct suitable data displays, with and without the use of digital technologies, from given or collected data; include tables, column graphs and picture graphs where one picture can represent many data values	1	Introducing column graphs with many-to-one correspondence	<ul style="list-style-type: none"> determine the scale on a column graph read and interpret data in a column graph with many-to-one correspondence recognise and remedy errors or unsuitable scales in a column graph
	2	Representing data in column graphs using many-to-one correspondence	<ul style="list-style-type: none"> represent given or collected categorical data in column graphs discuss and determine a suitable scale of many-to-one correspondence to draw graphs for large data sets and state the key used use grid paper to assist in drawing graphs that represent data using a scale of many-to-one correspondence use data in a spreadsheet to create column graphs with appropriately labelled axes mark equal spaces on axes, name and label axes, and choose appropriate titles for graphs interpret data in column graph; ask and answer questions related to the data in the display; draw conclusions

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA2-18SP selects appropriate methods to collect data, and constructs, compares, interprets and evaluates data displays, including tables, picture graphs and column graphs

Quest: (2) Display & interpret data

Learning Journeys Picture graphs with many-to-one correspondence

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.5 Construct suitable data displays, with and without the use of digital technologies, from given or collected data; include tables, column graphs and picture graphs where one picture can represent many data values	1	Introducing picture graphs with many-to-one correspondence	<ul style="list-style-type: none"> interpret the key on a picture graph with many-to-one correspondence read and interpret data in a picture graph with many-to-one correspondence recognise and remedy errors or unsuitable scales in a picture graph
	2	Representing data in picture graphs using many-to-one correspondence	<ul style="list-style-type: none"> represent given or collected categorical data in picture graphs discuss and determine a suitable scale of many-to-one correspondence to draw graphs for large data sets and state the key used use grid paper to assist in drawing graphs that represent data using a scale of many-to-one correspondence mark equal spaces on axes, name and label axes, and choose appropriate titles for graphs interpret data in a picture graph; ask and answer questions related to the data in the display; draw conclusions

Learning Journeys Evaluating and comparing data displays

SP.A.6 Evaluate the effectiveness of different displays in illustrating data features, including variability	1	Evaluating and comparing data displays	<ul style="list-style-type: none"> interpret and evaluate the effectiveness of various data displays found in media and in factual texts, where displays represent data using a scale of many-to-one correspondence identify and discuss misleading representations of data discuss and compare features of data displays, including considering the number and appropriateness of the categories used, eg a display with only three categories (blue, red, other) for car colour is not likely to be useful discuss the advantages and disadvantages of different representations of the same categorical data, eg column graphs compared to picture graphs that represent data using scales of many-to-one correspondence
--	---	--	---

MA2-19SP describes and compares chance events in social and experimental contexts

Quest: (1) Explore chance events

Learning Journeys Conducting chance experiments

SP.B.1 Conduct chance experiments, identify and describe possible outcomes, and recognise variation in results	1	Introducing chance experiments (with equal outcomes)	<ul style="list-style-type: none"> use the term 'outcome' to describe any possible result of a chance experiment predict and list all possible outcomes in a chance experiment, eg list the outcomes when 3 pegs are randomly selected from a bag containing an equal number of pegs of 2 colours predict the number of times each outcome should occur in a chance experiment involving a set number of trials
	2	Conducting chance experiments (with equal outcomes)	<ul style="list-style-type: none"> predict and list all possible outcomes in a chance experiment, eg list the outcomes when 3 pegs are randomly selected from a bag containing an equal number of pegs of 2 colours keep a tally and graph the results of a chance experiment explain any differences between expected results and actual results in a chance experiment; make statements that acknowledge 'randomness' in a situation, eg 'The spinner could stop on any colour'

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA2-19SP describes and compares chance events in social and experimental contexts

Quest: (1) Explore chance events

Learning Journeys Conducting chance experiments

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.B.1 Conduct chance experiments, identify and describe possible outcomes, and recognise variation in results	3		<ul style="list-style-type: none"> use the term 'outcome' to describe any possible result of a chance experiment predict and list all possible outcomes in a chance experiment, eg describe the probability of spinning red when you spin a spinner that has 1/2 shaded yellow, 1/4 shaded blue and 1/4 shaded red predict the number of times each outcome should occur in a chance experiment involving a set number of trials
	4	Conducting chance experiments (with unequal outcomes)	<ul style="list-style-type: none"> predict and list all possible outcomes in a chance experiment, eg describe the probability of spinning red when you spin a spinner that has 1/2 shaded yellow, 1/4 shaded blue and 1/4 shaded red keep a tally and graph the results of a chance experiment explain any differences between expected results and actual results in a chance experiment; make statements that acknowledge 'randomness' in a situation, eg 'The spinner could stop on any colour'
	5	Introducing chance situations	<ul style="list-style-type: none"> predict and record all possible combinations in a chance situation, eg list all possible outfits when choosing from three different T-shirts and 2 different pairs of shorts record and explain possible combinations using a list, table or diagram repeat a chance experiment several times and discuss why the results vary

Quest: (2) Explore chance events

Learning Journeys Describing the chance of events occurring

SP.B.2 Describe possible everyday events and order their chances of occurring	1	Describing the chances of everyday events occurring	<ul style="list-style-type: none"> use the terms 'equally likely', 'likely' and 'unlikely' to describe the chance of everyday events occurring compare the chance of familiar events occurring and describe the events as being 'more likely' or 'less likely' to occur than each other order events from least likely to most likely to occur
	2	Describing the chances of events occurring in simple chance experiments	<ul style="list-style-type: none"> compare the likelihood of obtaining particular outcomes in a simple chance experiment

Learning Journeys Exploring everyday events occurring

SP.B.3 Identify everyday events where one occurring cannot happen if the other happens	1	Exploring everyday events that cannot occur simultaneously	<ul style="list-style-type: none"> identify and discuss everyday events that cannot occur at the same time
--	---	--	---

Learning Journeys Identifying the chance of events occurring

SP.B.4 Identify events where the chance of one occurring will not be affected by the occurrence of the other	1	Identifying events where the chances of occurring are independent of other events	<ul style="list-style-type: none"> identify and discuss events where the chance of 1 event occurring will not be affected by the occurrence of the other explain why subsequent events are independent compare independent events with dependent events
--	---	---	--

NSW Curriculum

Stage 3

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-4NA orders, reads and represents integers of any size and describes properties of whole numbers			
Quest: (1) Number properties & integers			
Learning Journeys Recognise, represent and order numbers			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.1 Recognise, represent and order numbers to at least tens of millions	1	Reading and writing numbers of any size	<ul style="list-style-type: none"> • apply an understanding of place value to read numbers of any size • apply an understanding of place value to write numbers of any size
	2	Comparing 2 numbers of any size	<ul style="list-style-type: none"> • compare 2 numbers of any size using words and symbols $<$, $=$, $>$
		Ordering numbers of any size	<ul style="list-style-type: none"> • arrange numbers of any size in ascending and descending order
	3	Identifying the place value of numbers of any size	<ul style="list-style-type: none"> • state the place value of digits in numbers of any size • recognise different abbreviations of numbers used in everyday contexts, eg \$35 M represents \$35 000 000 • use place value understanding to count by 10,000 and 100,000
	4	Using place value to partition numbers of any size	<ul style="list-style-type: none"> • use place value understanding and models to partition numbers of any size
		Using non-standard partitioning with numbers of any size	<ul style="list-style-type: none"> • partition numbers of any size in non-standard forms
	5	Rounding numbers to a specified place value	<ul style="list-style-type: none"> • round numbers to a specified place value, eg round 5 461 883 to the nearest million
Learning Journeys Multiples and Factors			
NA.A.2 Identify and describe factors and multiples of whole numbers and use them to solve problems	1	Finding factors for whole numbers up to 100	<ul style="list-style-type: none"> • determine all 'factors' of a given whole number up to 100 • determine the 'highest common factor' (HCF) of 2 whole numbers
	2	Finding multiples up to 100	<ul style="list-style-type: none"> • determine 'multiples' of a given whole number • determine the 'lowest common multiple' (LCM) of 2 whole numbers
	3	Solving problems using factors and multiples	<ul style="list-style-type: none"> • solve problems using knowledge of factors and multiples, eg 'There are 48 people at a party. In how many ways can you set up the tables and chairs, so that each table seats the same number of people and there are no empty chairs?'
Quest: (2) Number properties & integers			
Learning Journeys Square and Triangular numbers			
NA.A.4 Identify and describe properties of prime, composite, square and triangular numbers	1	Describing square numbers	<ul style="list-style-type: none"> • model square numbers and record each number group in numerical and diagrammatic form
	2	Describing triangular numbers	<ul style="list-style-type: none"> • model triangular numbers and record each number group in numerical and diagrammatic form

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-4NA orders, reads and represents integers of any size and describes properties of whole numbers			
Quest: (2) Number properties & integers			
Learning Journeys Investigating Integers			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.3 Investigate everyday situations that use integers; locate and represent these numbers on a number line	1	Investigating integers in context	<ul style="list-style-type: none"> interpret integers in everyday contexts, eg temperature count forwards and backwards with positive and negative whole numbers, including through 0 (in context)
	2	Investigating integers	<ul style="list-style-type: none"> recognise the location of negative whole numbers in relation to zero and place them on a number line
	3	Interpreting integers in context	<ul style="list-style-type: none"> use a model to interpret intervals across zero (in context)
Learning Journeys Prime and composite numbers			
NA.A.4 Identify and describe properties of prime, composite, square and triangular numbers	1	Introducing prime and composite numbers	<ul style="list-style-type: none"> know and recall all prime numbers up to 19
	2	Identifying prime and composite numbers	<ul style="list-style-type: none"> determine whether a number is prime, composite or neither
MA3-5NA selects and applies appropriate strategies for addition and subtraction with counting numbers of any size			
Quest: (1) Add/sub numbers of any size			
Learning Journeys Adding numbers of any size			
NA.B.1 Use efficient mental and written strategies and apply appropriate digital technologies to solve problems	1	Using a formal written algorithm for addition calculations involving numbers of any size (no regrouping)	<ul style="list-style-type: none"> apply algorithms to solve problems without regrouping, with the same number of places and with a different number of places; include opportunities for students to write their own algorithms with digits in correct place value positions; include word problems
	2	Using a formal written algorithm for addition calculations involving numbers of any size (with regrouping)	<ul style="list-style-type: none"> apply algorithms to solve problems with regrouping in 1 or more places, with the same number of places and with a different number of places; include opportunities for students to write their own algorithms with digits in correct place value positions; include word problems
	3	Using a formal written algorithm for addition calculations of 3 or more addends up to any size (with and without regrouping)	<ul style="list-style-type: none"> apply algorithms with 3 or more addends with the same number of places and with a different number of places; include opportunities for students to write their own algorithms with digits in correct place value positions; include word problems
Learning Journeys Subtracting numbers of any size			
NA.B.1 Use efficient mental and written strategies and apply appropriate digital technologies to solve problems	1	Using a formal written algorithm to record subtraction calculations involving numbers of any size (without decomposing)	<ul style="list-style-type: none"> apply algorithms to solve problems without trading (decomposing), with the same number of places for both numbers, with fewer places in the second number (subtrahend) and with and without 1 or more zeros in the first number (minuend); include opportunities for students to write their own algorithms with digits in correct place value positions and with the larger number first; include word problems

Understanding Practice and Fluency (UPF)

Learning Journeys Subtracting numbers of any size			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Use efficient mental and written strategies and apply appropriate digital technologies to solve problems	2	Using a formal written algorithm to record subtraction calculations involving numbers of any size (with decomposing)	<ul style="list-style-type: none"> apply algorithms to solve problems with trading (decomposing) in 1 or more places, with the same number of places for both numbers, with fewer places in the second number (subtrahend) and with and without 1 or more zeros in the first number (minuend); include opportunities for students to write their own algorithms with digits in correct place value positions and with the larger number first; include word problems
	3	Using equal adjustments to subtract up to 3-digit numbers	<ul style="list-style-type: none"> model and solve subtraction problems using equal adjustments
Learning Journeys Adding and subtracting numbers of any size			
NA.B.1 Use efficient mental and written strategies and apply appropriate digital technologies to solve problems	1	Representing addition or subtraction problems using a bar model	<ul style="list-style-type: none"> use a bar model as a tool to represent an addition or subtraction problem
	2	Applying efficient strategies for addition and subtraction calculations involving numbers of any size	<ul style="list-style-type: none"> add 3 or more numbers with different numbers of digits
Learning Journeys Checking with estimation and rounding			
NA.B.2 Use estimation and rounding to check the reasonableness of answers to calculations	1	Checking accuracy of addition and subtraction calculations	<ul style="list-style-type: none"> check solutions to problems by using the inverse operation use estimation to check the reasonableness of answers to addition and subtraction calculations
Quest: (2) Add/sub numbers of any size			
Learning Journeys Addition and subtraction word problems			
NA.B.4 Select and apply efficient mental and written strategies and appropriate digital technologies to solve problems involving addition and subtraction with whole numbers	1	Solving addition word problems involving numbers of any size	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve word problems select and apply efficient written strategies to solve word problems use a calculator to solve word problems interpret words that indicate the required operation justify the choice of strategy for a given calculation
	2	Solving subtraction word problems involving numbers of any size	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve word problems select and apply efficient written strategies to solve word problems use a calculator to solve word problems
	3	Solving word problems requiring both addition and subtraction involving numbers of any size	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve word problems select and apply efficient written strategies to solve word problems

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (1) Mult/div & order of operations

Learning Journeys Multiplication using multiples of 10

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Using known facts to multiply 1-digit numbers with multiples of 1000	<ul style="list-style-type: none"> use known facts and place value understanding to solve multiplication problems with multiples of 1000, eg $3 \times 6 = 18$ so $3 \times 6000 = 18\ 000$
	2	Using known facts to multiply 1-digit numbers with multiples of 10 000	<ul style="list-style-type: none"> use known facts and place value understanding to solve multiplication problems with multiples of 1000, eg $3 \times 6 = 18$ so $3 \times 60\ 000 = 180\ 000$

Learning Journeys Mult: rounding, compensating and partitioning

NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying 1-digit and 2-digit numbers using rounding and compensating	<ul style="list-style-type: none"> use known facts to solve multiplication problems by adding on or taking off, eg 5×100 is 500, so 5×99 is 5 less, which is 495
	2	Using partitioning to double or halve any number (up to 4-digits)	<ul style="list-style-type: none"> use models and diagrams to support partitioning to double or halve any number (up to 4-digits), eg 58 halved as half of 50 + half of 8, or double 58 as double 50 + double 8
	3	Using compensation to double or halve any number (up to 4-digits)	<ul style="list-style-type: none"> use models and diagrams to support the use of compensation to double or halve any number (up to 4-digits), eg double 398 as double 400 and subtract 4, or half of 398 as half of 400 and subtract 1
	4	Using partitioning or compensation to double or halve any number (up to 4-digits)	<ul style="list-style-type: none"> use partitioning or compensation to double or halve any number (up to 4-digits)

Learning Journeys Mult: doubling, halving and thirding

NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying using doubling	<ul style="list-style-type: none"> use the relationship between multiplication facts, eg the multiplication facts for 6 are double the multiplication facts for 3
		Multiplying by 2, 4 or 8 using repeated doubling	<ul style="list-style-type: none"> use doubling as a strategy to multiply by 2, eg 70×2 is double 70 use double-double as a strategy to multiply by 4, eg 70×4 is double-double 70 which is 280 use doubling as a strategy to multiply by 8, eg 70×8 is double-double-double 70 which is 560
	2	Using doubling and halving to solve multiplication problems with 2-digit and 1-digit numbers	<ul style="list-style-type: none"> mentally adjust a multiplication problem by doubling one factor and halving the other, eg 24×6 as 12×12
	3	Using doubling and halving to solve multiplication problems with a 1-digit number and a 1 or 2-digit number	<ul style="list-style-type: none"> mentally adjust a multiplication problem by doubling one factor and halving the other, eg 24×50 as 12×100
	4	Using doubling and halving or thirding and trebling to solve multiplication problems	<ul style="list-style-type: none"> mentally adjust a multiplication problem using doubling and halving or thirding and trebling where appropriate, eg 18×3 as 6×9 or 24×6 as 12×12

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (1) Mult/div & order of operations

Learning Journeys Multiplying using the split method

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying 3-digit numbers by 1-digit numbers using split method	• multiply the hundreds, then the tens and then the ones
	2	Multiplying 4-digit numbers by 1-digit numbers using split method	• multiply the thousands, then the hundreds, then the tens and then the ones

Learning Journeys Multiplying by factorising

NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying by factorising (using the distributive property)	• split factors, eg 50×8 is the same as $50 \times 2 \times 4$, which becomes 100×4
	2	Factorising to multiply a 2-digit number by a 2-digit number	• factorise to multiply a 2-digit number by a 2-digit number, eg $12 \times 25 = 3 \times 4 \times 25 = 3 \times 100 = 300$

Learning Journeys Multiplying using an area model

NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying 3-digit numbers by 1-digit numbers using an area model	• use an area model for 3-digit by 1-digit multiplication
	2	Multiplying 4-digit numbers by 1-digit numbers using an area model	• use an area model for 4-digit by 1-digit multiplication
	3	Multiplying 2-digit numbers by 2-digit numbers using an area model	• use an area model for 2-digit by 2-digit multiplication

Learning Journeys Multiplying using formal algorithms

NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Multiplying 2-digit numbers by 1-digit numbers using the expanded algorithm	• multiply the ones, then the tens, with and without regrouping
		Multiplying 3-digit numbers by 1-digit numbers using the expanded algorithm	• multiply the ones, then the tens, then the hundreds, with and without regrouping
		Multiplying 4-digit numbers by 1-digit numbers using the expanded algorithm	• multiply the ones, then the tens, then the hundreds and then the thousands, with and without regrouping
	2	Multiplying 2-digit numbers by 1-digit numbers using the contracted algorithm	• multiply the ones, then the tens, with and without regrouping
		Multiplying 3-digit numbers by 1-digit numbers using the contracted algorithm	• multiply the ones, then the tens, then the hundreds, with and without regrouping
		Multiplying 4-digit numbers by 1-digit numbers using the contracted algorithm	• multiply the ones, then the tens, then the hundreds and then the thousands, with and without regrouping
	3	Multiplying 2-digit numbers by 2-digit numbers using the extended form of the formal algorithm	• multiply 2-digit by 2-digit numbers using extended form, with and without regrouping
		Multiplying 3-digit numbers by 2-digit numbers using the extended form of the formal algorithm	• multiply 3-digit by 2-digit numbers using extended form, with and without regrouping

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (1) Mult/div & order of operations

Learning Journeys Multiplication word problems

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.C.1 Solve problems involving multiplication of large numbers by one- or two-digit numbers using efficient mental and written strategies and appropriate digital technologies	1	Solving multiplication word problems	<ul style="list-style-type: none"> • apply appropriate mental strategies to solve multiplication word problems • apply appropriate written strategies to solve multiplication word problems

Learning Journeys Division using partitioning

NA.C.2 Solve problems involving division by a one-digit number, including those that result in a remainder	1	Dividing a 3-digit number by a 1-digit number using partitioning	<ul style="list-style-type: none"> • partition a 3-digit number to divide
--	---	--	--

Learning Journeys Extended division - no remainders or zeros

NA.C.2 Solve problems involving division by a one-digit number, including those that result in a remainder	1	Dividing a 2-digit number by a 1-digit divisor using the extended algorithm, no remainders or zeros in answers	<ul style="list-style-type: none"> • apply the written algorithm to divide a 2-digit number by a 1-digit number, without remainders and without zeros in the answer
	2	Dividing a 3-digit number by a 1-digit divisor using the extended algorithm, no remainders or zeros in answers	<ul style="list-style-type: none"> • apply the written algorithm to divide a 3-digit number by a 1-digit number, without remainders and without zeros in the answer
	3	Dividing a 4-digit number by a 1-digit divisor using the extended algorithm, no remainders or zeros in answers	<ul style="list-style-type: none"> • apply the written algorithm to divide a 4-digit number by a 1-digit number, without remainders and without zeros in the answer
	4	Solving problems involving division of a 2-digit number by a one-digit number, with no remainders	<ul style="list-style-type: none"> • recognise and use different notations to indicate division

Learning Journeys Extended division - remainders

NA.C.2 Solve problems involving division by a one-digit number, including those that result in a remainder	1	Dividing a 2-digit number by a 1-digit divisor using the extended algorithm, with remainders but without zeros in answers	<ul style="list-style-type: none"> • apply the written algorithm to divide a 2-digit number by a 1-digit number, with remainders but without zeros in the answer

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages			
Quest: (1) Fractions, decimals, percentages			
Learning Journeys Place value using thousandths			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.3 Recognise that the place value system can be extended beyond hundredths	1	Introducing decimal thousandths	<ul style="list-style-type: none"> express thousandths as decimals interpret decimal notation for thousandths, eg $0.123 = 123/1000$ state the place value of digits in decimal numbers of up to 3 decimal places
	2	Partitioning decimal thousandths	<ul style="list-style-type: none"> use place value to partition decimals of up to 3dp partition decimals of up to 3d.p. in non-standard forms partition fractions up to thousandths into decimals and fractions
Learning Journeys Compare and order decimals			
NA.D.4 Compare, order and represent decimals	1	Interpreting zeros at the end of a decimal	<ul style="list-style-type: none"> understand that a zero at the end of a decimal does not change its value
	2	Knowing common fraction and decimal equivalences	<ul style="list-style-type: none"> know fraction and decimal equivalences for thirds, quarters, fifths and eighths
	3	Comparing and ordering decimal fractions of up to 3 decimal places	<ul style="list-style-type: none"> place decimal numbers of up to 3 decimal places on a number line between 0 and 1 compare and order decimals with 3 decimal places using $>$, $<$ and $=$ compare and order decimals with a different number of decimal places, up to 3 decimal places
Quest: (2) Fractions, decimals, percentages			
Learning Journeys Working with fractions			
NA.D.5 Compare fractions with related denominators and locate and represent them on a number line	1	Comparing and ordering proper fractions with different numerators and denominators (denominators of 2, 3, 4, 5, 6, 8, 10, 12 and 100)	<ul style="list-style-type: none"> compare and order proper fractions using a benchmark fraction for support, eg half or quarter record comparisons using $>$, $<$ or $=$ (reference for other subnodes)
	2	Recognising and finding equivalent simple fractions with related denominators using multiplicative thinking (denominators of 2, 3, 4, 5, 6, 8, 10, 12 and 100)	<ul style="list-style-type: none"> develop mental strategies for generating equivalent fractions, such as multiplying or dividing the numerator and the denominator by the same number apply knowledge of equivalent fractions to convert between units of measurement
	3	Using common factors to simplify proper fractions to their simplest form	<ul style="list-style-type: none"> determine a common factor of the numerator and denominator of a fractions and use to find an equivalent fraction. Repeat until the fraction is reduced to its simplest form write a fraction in its simplest form using the highest common factor

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (2) Fractions, decimals, percentages

Learning Journeys Add & subtract proper fractions - related denoms

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.6 Solve problems involving addition and subtraction of fractions with the same or related denominators	1	Adding proper fractions with related denominators and answers less than 1 whole	• add proper fractions where the denominators are related
	2	Adding and subtracting simple proper fractions in which 1 denominator is a multiple of another (denominators 2, 3, 4, 5, 6, 7, 8, 10, 12, 100)	• add and subtract proper fractions where 1 denominator is the same as, or a multiple of, the other
		Adding simple fractions with related denominators	• add fractions where the denominators are related
	3	Subtracting proper fractions with related denominators and answers less than 1 whole	• subtract proper fractions where the denominators are related
	4	Subtracting simple fractions with related denominators	• subtract fractions where the denominators are related
	5	Adding and subtracting proper fractions with related denominators and answers less than 1 whole	• add and subtract proper fractions where the denominators are related

Learning Journeys Add & subtract mixed numerals - related denoms

NA.D.6 Solve problems involving addition and subtraction of fractions with the same or related denominators	1	Adding fractions, including mixed numerals, with related denominators	• add fractions, including mixed numerals, where the denominators are related
	2	Subtracting fractions, including mixed numerals, with related denominators	• subtract fractions, including mixed numerals, where the denominators are related
	3	Adding and subtracting fractions including mixed numerals, with related denominators	• add and subtract fractions where the denominators are related
	4	Solving word problems involving fractions and mixed numerals with the related denominators	• solve word problems involving the addition and subtraction of fractions where 1 denominator is the same as, or a multiple of, the other

Learning Journeys Finding a fraction of a quantity

NA.D.7 Find a simple fraction of a quantity where the result is a whole number, with and without the use of digital technologies	1	Finding a simple fraction of a quantity with and without the use of digital technologies	• calculate a simple fraction of a collection/quantity, with and without the use of digital technologies
	2	Solving word problems involving non-unit fractions	<ul style="list-style-type: none"> • find the whole given the non-unit fraction of a set • solve word problems in different contexts, eg measurement • solve word problems involving fractions with different denominators eg 2/5 of the children have blue eyes, 2/6 have green eyes, if there are 30 children altogether how many children have brown eyes?

NSW Curriculum

Stage 3

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (2) Fractions, decimals, percentages

Learning Journeys Adding decimals

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.8 Add and subtract decimals, with and without the use of digital technologies, and use estimation and rounding to check the reasonableness of answers	1	Adding decimals to 2 decimal places using mental strategies	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve addition problems, including compensation, bridging to 1, using place value estimate sums
	2	Adding decimals to 3 decimal places using mental strategies	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve addition problems, including compensation, bridging to 1, using place value
	3	Adding decimals using digital technologies	<ul style="list-style-type: none"> add decimals using digital technologies
	4	Adding decimals using written method	<ul style="list-style-type: none"> use a standard algorithm to add decimals with the same number of decimal places use a standard algorithm to add decimals with a different number of decimal places

Learning Journeys Subtracting decimals

NA.D.8 Add and subtract decimals, with and without the use of digital technologies, and use estimation and rounding to check the reasonableness of answers	1	Subtracting decimals using mental strategies	<ul style="list-style-type: none"> select and apply efficient mental strategies to solve subtraction problems, including compensation, bridging to 1, using place value
	2	Subtracting decimals using digital technologies	<ul style="list-style-type: none"> subtract decimals using digital technologies
	3	Subtracting decimals using written method	<ul style="list-style-type: none"> use a standard algorithm to subtract decimals with the same number of decimal places use a standard algorithm to subtract decimals with a different number of decimal places
	4	Rounding decimal hundredths	<ul style="list-style-type: none"> round hundredths to the nearest whole number round hundredths to the nearest tenth

Learning Journeys Multiplying decimals

NA.D.9 Multiply decimals by whole numbers and perform divisions by non-zero whole numbers where the results are terminating decimals, with and without the use of digital technologies	1	Multiplying decimals	<ul style="list-style-type: none"> use mental strategies to multiply simple decimals by single-digit numbers, eg 3.5×2 multiply decimals of up to 3 decimal places by whole numbers of up to 2 digits, with and without the use of digital technologies, eg 'I measured 3 desks. Each desk was 1.25 m in length, so the total length is $3 \times 1.25 = 3.75$ m'
	2	Multiplying decimals using written method	<ul style="list-style-type: none"> multiply decimals up to thousandths using a standard algorithm

Learning Journeys Dividing decimals

NA.D.9 Multiply decimals by whole numbers and perform divisions by non-zero whole numbers where the results are terminating decimals, with and without the use of digital technologies	1	Dividing decimals	<ul style="list-style-type: none"> divide decimals by a one-digit whole number where the result is a terminating decimal, eg $5.25 \div 5 = 1.05$
	2	Dividing decimals using written method	<ul style="list-style-type: none"> divide decimals up to thousandths using a standard algorithm

NSW Curriculum

Stage 3

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (2) Fractions, decimals, percentages

Learning Journeys Multiplying and dividing decimals by powers of 10

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.10 Multiply and divide decimals by powers of 10	1	Multiplying decimals by powers of 10	<ul style="list-style-type: none"> use PV equipment to multiply decimals by 10
	2	Dividing decimals by powers of 10	<ul style="list-style-type: none"> use PV equipment to divide decimals by 10

Learning Journeys Representing fractions, decimals and percentages

NA.D.11 Make connections between equivalent fractions, decimals and percentages	1	Introducing percentages	<ul style="list-style-type: none"> write fractions with a denominator of 100 as percentages and vice versa find a percent of a quantity as a rate per 100, eg 30% of a quantity means 30/100 times the quantity
	2	Representing percentages and decimals	<ul style="list-style-type: none"> write decimals (< 1) to 2 decimal places as percentages write decimals as percentages and vice versa
	3	Representing simple fractions as percentages	<ul style="list-style-type: none"> represent simple fractions as percentages and vice versa
		Representing common fractions as percentages	<ul style="list-style-type: none"> represent common fractions as percentages and vice versa

Learning Journeys Fraction, decimal and percentage equivalence

NA.D.11 Make connections between equivalent fractions, decimals and percentages	1	Investigating the relationships between fractions, decimals and percentages	<ul style="list-style-type: none"> record relationships between decimals, percentages and fractions (with denominators 2, 4, 5, 10, 20, 25, 50, 100) demonstrate understanding using symbolic representation
	2	Representing common equivalent fractions, decimals and percentages	<ul style="list-style-type: none"> recall the relationships between decimals, percentages and fractions with denominators of 2, 4, 5, 10, 20, 25, 50 and 100 recognise fractions, decimals and percentages as different representations of the same value
	3	Representing equivalent fractions, decimals and percentages	<ul style="list-style-type: none"> write percentages as fractions in their simplest form write fractions with denominators that are factors of 100 as percentages by multiplying the numerator and denominator by a common value write fractions with denominators that are not factors of 100 as percentages by writing as a decimal first, eg using short division, then $\times 100$ to write as a percentage write percentages as decimals and vice versa
	4	Solving problems relating to percentage and decimal equivalence	<ul style="list-style-type: none"> solve problems which require knowing percentage and decimal equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator or multiple of 10 or 25

NSW Curriculum Stage 3

Mathletics

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-7NA compares, orders and calculates with fractions, decimals and percentages

Quest: (2) Fractions, decimals, percentages

Learning Journeys Calculating percentages

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.12 Investigate and calculate percentage discounts of 10%, 25% and 50% on sale items, with and without the use of digital technologies	1	Converting common fractions to percentages using mental strategies	<ul style="list-style-type: none"> use mental strategies to convert fractions to percentages
	2	Converting common fractions to percentages using a calculator	<ul style="list-style-type: none"> use calculator strategies to convert fractions to percentages
	3	Calculating simple percentages	<ul style="list-style-type: none"> estimate 0%, 1%, 10%, 25%, 50% and 100% of an amount including examples in context (exclude discounts), explain estimation calculate 10%, 25% and 50% of an amount including examples in context (exclude discounts)
	4	Calculating simple percentage discounts	<ul style="list-style-type: none"> investigate and calculate percentage discounts of 10%, 25% and 50% on sale items estimate quantities using benchmarks of 10%, 25% and 50% calculate sale price by subtracting the proportion from the original amount calculate common percentages of quantities
	5	Calculating simple percentages of quantities	<ul style="list-style-type: none"> equate 10% to $\frac{1}{10}$, 25% to $\frac{1}{4}$ and 50% to $\frac{1}{2}$ use mental strategies to estimate discounts of 10%, 25% and 50% calculate the sale price of an item after a discount of 10%, 25% and 50%, recording the strategy and result

MA3-8NA analyses and creates geometric and number patterns, constructs and completes number sentences, and locates points on the Cartesian plane

Quest: (1) Number Patterns

Learning Journeys Number patterns - addition and subtraction

NA.E.1 Describe, continue and create patterns with fractions, decimals and whole numbers resulting from addition and subtraction	1	Describing, continuing and creating patterns resulting from addition and subtraction including fractions	<ul style="list-style-type: none"> identify, continue and create simple number patterns involving addition and subtraction including fractions describe patterns using the terms 'increase' and 'decrease', eg 'The terms decrease by $\frac{1}{4}$' find missing terms in a number sequence
	2	Describing, continuing and creating patterns resulting from addition and subtraction including decimals	<ul style="list-style-type: none"> identify, continue and create simple number patterns involving addition and subtraction including decimals describe patterns using the terms 'increase' and 'decrease', eg for the pattern 4.8, 4.1, 3.4, 2.7, ..., 'The terms decrease by 0.7'

NSW Curriculum

Stage 3

Understanding Practice and Fluency (UPF)

Number and Algebra

MA3-8NA analyses and creates geometric and number patterns, constructs and completes number sentences, and locates points on the Cartesian plane			
Quest: (1) Number Patterns			
Learning Journeys Number sentences -multiplication and division			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.2 Use equivalent number sentences involving multiplication and division to find unknown quantities	1	Using equivalent number sentences that involve more than 1 operation to find unknown quantities	<ul style="list-style-type: none"> complete number sentences that involve more than 1 operation by calculating missing numbers, eg $5 \times \square = 4 \times 10$, $5 \times \square = 30 - 10$
	2	Describing and using inverse operations to solve number sentences with whole numbers and any of the 4 operations	<ul style="list-style-type: none"> identify and use inverse operations to assist with the solution of number sentences, eg $125 \div 5 = \square$ becomes $\square \times 5 = 125$
	3	Finding the missing number in multiplication and division number sentences involving simple fractions or decimals	<ul style="list-style-type: none"> complete number sentences involving multiplication and division, including those involving simple fractions or decimals, eg $7 \times \square = 7.7$
Quest: (2) Number Patterns			
Learning Journeys Continuing and creating number sequences			
NA.E.3 Continue and create sequences involving whole numbers, fractions and decimals; describe the rule used to create the sequence	1	Continuing and creating sequences involving whole numbers, fractions and decimals	<ul style="list-style-type: none"> describe the rule used to create the sequence continue and create number patterns, with and without the use of digital technologies, using whole numbers, fractions and decimals, eg $1/4$, $1/8$, $1/16$, ... or 1.25, 2.5, 5, ... find missing terms in a number sequence
Learning Journeys The Cartesian plane			
NA.E.4 Introduce the Cartesian coordinate system using all four quadrants	1	Locating points on the Cartesian plane	<ul style="list-style-type: none"> plot and label points, given coordinates, in all 4 quadrants of the number plane identify and label each quadrant on a number plane identify and record the coordinates of given points in all 4 quadrants of the number plane

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-9MG selects and uses the appropriate unit and device to measure lengths and distances, calculates perimeters, and converts between units of length			
Quest: (1) Length, distance, perimeter			
Learning Journeys Comparing and ordering metric lengths			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.A.1 Choose appropriate units of measurement for length	1	Introducing formal units for length: kilometres	<ul style="list-style-type: none"> recognise the need for a formal unit longer than the metre for measuring distance, eg distance between known places or visible landmarks recognise that there are 1000 m in 1 km, ie $1000\text{ m} = 1\text{ km}$ describe 1 m as one thousandth of a kilometre develop a personal reference for the approximate length of 1 km and half a kilometre record distances using the abbreviation for kilometres (km)
	2	Comparing lengths in metres and kilometres	compare lengths and distances using metres and kilometres
		Ordering lengths in metres and kilometres	order lengths and distances using metres and kilometres
	3	Comparing lengths in millimetres, centimetres, metres and kilometres	compare lengths and distances using millimetres, centimetres, metres and kilometres
		Ordering lengths in millimetres, centimetres, metres and kilometres	order lengths and distances using millimetres, centimetres, metres and kilometres
	4	Recording lengths using mixed units	record lengths and distances using combinations of millimetres, centimetres, metres and kilometres
Learning Journeys Calculating perimeter of rectangles			
MG.A.2 Calculate the perimeters of rectangles using familiar metric units	1	Calculating the perimeters of rectangles	explore different methods of finding the perimeter of rectangles
	2	Calculating the side length of a rectangle given the perimeter	<ul style="list-style-type: none"> find the length of 1 unknown side of a rectangle given the perimeter find possible length combinations of 2 unknown sides of a rectangle given the perimeter
Quest: (2) Length, distance, perimeter			
Learning Journeys Decimal notation and the metric system			
MG.A.3 Connect decimal representations to the metric system 3424348	1	Recording kilometres and metres using decimal notation	record lengths and distances using decimal notation to 3 decimal places
	2	Connecting decimal representations to the metric system	<ul style="list-style-type: none"> recognise the equivalence of whole-number and decimal representations of measurements of length interpret decimal notation for lengths and distances involving millimetres, centimetres, metres and kilometres

NSW Curriculum Stage 3

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-9MG selects and uses the appropriate unit and device to measure lengths and distances, calculates perimeters, and converts between units of length			
Quest: (1) Length, distance, perimeter			
Learning Journeys Converting standard metric units of length			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.A.4 Convert between common metric units of length	1	Converting between standard metric units of length to 1 decimal place	<ul style="list-style-type: none"> convert between centimetres and metres and vice versa convert between centimetres and millimetres and vice versa convert between metres and kilometres and vice versa convert among millimetres, centimetres, metres and kilometres
	2	Converting between common metric units of length up to 2 decimal places	<ul style="list-style-type: none"> convert between metres and kilometres convert between millimetres, centimetres and metres to compare lengths and distances
	3	Converting between common metric units of length up to 3 decimal places	<ul style="list-style-type: none"> convert between metres and kilometres convert between millimetres, centimetres and metres to compare lengths and distances
Learning Journeys Length problems			
MG.A.5 Solve problems involving the comparison of lengths using appropriate units	1	Solving one-step problems involving length	<ul style="list-style-type: none"> solve a variety of one-step problems involving length and perimeter, including different units of length
	2	Solving two-step problems involving length	<ul style="list-style-type: none"> solve a variety of two-step problems involving length and perimeter, including different units of length
MA3-10MG selects and uses the appropriate unit to calculate areas, including areas of squares, rectangles and triangles			
Quest: (1) Calculating area			
Learning Journeys Selecting appropriate units for measuring			
MG.B.1 Choose appropriate units of measurement for area	1	Introducing formal units for area: square kilometres and hectares	<ul style="list-style-type: none"> measure the dimensions of a large rectangular piece of land and calculate its area in hectares, eg school playground or local park relate one square kilometre and one hectare to known standard areas such as sports fields, courts and tracks of land determine side lengths of different rectangles with area of one hectare, eg 200 metres by 50 metres identify everyday situations where square kilometres or hectares are an appropriate unit for measuring the area
Learning Journeys Calculating the area of rectangles			
MG.B.2 Calculate the areas of rectangles using familiar metric units	1	Developing a multiplicative formula for area of a rectangle using metric units	<ul style="list-style-type: none"> calculate the area of a rectangle by multiplying the length and width of the rectangle calculate a side length of the rectangle given its area and one other side length

NSW Curriculum

Stage 3

Mathletics

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-10MG selects and uses the appropriate unit to calculate areas, including areas of squares, rectangles and triangles			
Quest: (2) Calculating area			
Learning Journeys Calculating the area of triangles			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.B.3 Solve problems involving the comparison of areas using appropriate units	1	Calculating area of a right-angled triangle without a formula	<ul style="list-style-type: none"> calculate the area of right-angled triangles using the relationship that the area is half the area of a rectangle with the same base and perpendicular height calculate the area of right-angled triangles where all three side lengths are given, using the relationship that the area is half the area of a rectangle with the same base and perpendicular height
	2	Calculating area of any triangle	<ul style="list-style-type: none"> calculate the area of triangles where more dimensions than are necessary are given, using the relationship that the area is half the area of a rectangle with the same base and perpendicular height
	3	Applying the formula for the area of a rectangle	<ul style="list-style-type: none"> apply the formula for area of a rectangle to find the area of rectangles given 2 side lengths measured in the same or different units apply the formula for area of a rectangle to find the area of composite rectilinear figures, such as an L-shape, U-shape
MA3-11MG selects and uses the appropriate unit to estimate, measure and calculate volumes and capacities, and converts between units of capacity			
Quest: (1) Calculating volume & capacity			
Learning Journeys Measuring volume			
MG.C.1 Choose appropriate units of measurement for volume and capacity	1	Selecting and justifying appropriate metric units to measure volume and capacity (ml and l)	<ul style="list-style-type: none"> select and use appropriate units to measure the capacities of a variety of containers select and use appropriate units to estimate the volumes of a variety of objects
	2	Introducing formal units for volume: cubic metres	<ul style="list-style-type: none"> recognise the need for a formal unit larger than the cubic centimetre construct and use the cubic metre as a unit to measure larger volumes explain why volume is measured in cubic metres in certain situations, eg wood bark, soil or concrete ; select and justify referents for cubic cm recognise that a cubic metre can have dimensions other than a cube of side 1 metre record volumes using the abbreviation for cubic metres (m^3) estimate the size of a cubic metre, half a cubic metre and 2 cubic metres

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-11MG selects and uses the appropriate unit to estimate, measure and calculate volumes and capacities, and converts between units of capacity			
Quest: (2) Calculating volume & capacity			
Learning Journeys Volume and capacity			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.C.2 Connect volume and capacity and their units of measurement	1	Connecting volume and capacity	<ul style="list-style-type: none"> select the appropriate unit to measure volume and capacity demonstrate that a cube of side 10 centimetre will displace 1 litre of water demonstrate, by using a medicine cup, that a cube of side 1 centimetre will displace 1 millilitres of water equate 1 cubic centimetre to 1 millilitre and 1000 cubic centimetres to 1 litre find the volumes of irregular solids in cubic centimetres using a displacement strategy
Learning Journeys Decimal representation in capacity			
MG.C.3 Connect decimal representations to the metric system	1	Connecting decimal representations to the metric systems (to 3 decimal places)	<ul style="list-style-type: none"> recognise the equivalence of whole-number and decimal representations of measurements of capacities interpret decimal notation for volumes and capacities record volume and capacity using decimal notation to 3 decimal places
Learning Journeys Converting common units of capacity			
MG.C.4 Convert between common metric units of capacity	1	Converting between common metric units of capacity including fractions and decimals (to 2 decimal places)	<ul style="list-style-type: none"> convert between millilitres and litres using fractions eg 1 and 1/10 litres as 1100 ml or 3.8 l as 3800 ml explain and use the relationship between the size of a unit and the number of units needed to assist in determining whether multiplication or division is required when converting between units
	2	Converting between common metric units of capacity (to 3 decimal places)	<ul style="list-style-type: none"> convert between millilitres and litres explain and use the relationship between the size of a unit and the number of units needed to assist in determining whether multiplication or division is required when converting between units
Learning Journeys Volume of rectangular prisms			
MG.C.5 Calculate the volumes of rectangular prisms	1	Calculating the volumes of rectangular prisms using additive and multiplicative strategies	<ul style="list-style-type: none"> describe rectangular prisms in terms of layers use repeated addition to find the volumes of rectangular prisms establish the relationship between the number of cubes in 1 layer, the number of layers, and the volume of a rectangular prism explain that the volume of a rectangular prism can be found by finding the number of cubes in 1 layer and multiplying by the number of layers record, using words, the method for finding the volumes of rectangular prisms calculate the volumes of rectangular prisms in cubic centimetres and cubic metres including calculating the volume given the net for the shape record calculations used to find the volumes of rectangular prisms

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-12MG selects and uses the appropriate unit and device to measure the masses of objects, and converts between units of mass			
Quest: (1) Measure & convert mass			
Learning Journeys Working with mass			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.D.1 Choose appropriate units of measurement for mass	1	Introducing formal units for mass: the tonne	<ul style="list-style-type: none"> establish the need for formal units for very large masses and introduce tonnes, including that $1000 \text{ kg} = 1 \text{ tonne}$ identify everyday situations where tonnes are an appropriate unit for measuring the mass apply place value understanding to modelling, describing and recording metric units of measurement introduce the abbreviation 't' for recording mass in tonnes and record masses using tonnes and kilograms, eg $1 \text{ t } 750 \text{ kg}$ calculate the number of kilograms in a whole number of tonnes interpret simple fractions ($\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$) of a tonne and relate these to the number of kilograms
	2	Selecting and using the appropriate metric unit and device to measure mass	<ul style="list-style-type: none"> select and use the appropriate metric unit and device to measure mass
	3	Recognising gross mass and net mass	<ul style="list-style-type: none"> select and use the appropriate customary unit and device to measure mass
	4	Solving multi-step problems involving mass	<ul style="list-style-type: none"> solve a variety of problems involving masses of the same unit
Quest: (2) Measure & convert mass			
Learning Journeys Decimal representation in mass			
MG.D.2 Connect decimal representations to the metric system	1	Understanding decimal representation of metric measurements of mass	<ul style="list-style-type: none"> connect measurements of mass with their decimal representations recognise the equivalence of whole number and decimal representations, eg $3 \text{ kg } 250 \text{ g} = 3.25 \text{ kg}$ record mass using decimal notation of up to 3 decimal places refer to SI units of mass
Learning Journeys Converting units of mass			
MG.D.3 Convert between common metric units of mass	1	Converting between standard metric units of mass to 1 decimal place	<ul style="list-style-type: none"> understand the meaning of metric prefixes, eg kilo-, centi-, milli- convert between grams and kilograms and vice versa convert between kilograms and tonnes and vice versa convert among grams, kilograms and tonnes
		Converting between standard metric units of mass up to 2 decimal places	<ul style="list-style-type: none"> understand the meaning of metric prefixes, eg kilo-, centi-, milli- convert between grams and kilograms and vice versa convert between kilograms and tonnes and vice versa convert among grams, kilograms and tonnes
		Converting between standard metric units of mass up to 3 decimal places	<ul style="list-style-type: none"> understand the meaning of metric prefixes, eg kilo-, centi-, milli- convert between grams and kilograms and vice versa convert between kilograms and tonnes and vice versa convert among grams, kilograms and tonnes solve problems using different units of mass

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-13MG uses 24-hour time and am and pm notation in real-life situations, and constructs timelines

Quest: (1) 24-hour time & timelines

Learning Journeys Using 24-hour time

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.E.1 Compare 12- and 24-hour time systems and convert between them	1	Using 24-hour notation	<ul style="list-style-type: none"> convert between 24-hour time notation and 12-hour time notation convert between analogue and 24-hour digital clocks record 24-hour time using necessary conventions

Learning Journeys Understanding elapsed time

MG.E.2 Determine and compare the duration of event	1	Calculating elapsed time	<ul style="list-style-type: none"> solve problems involving elapsed time given the starting or finishing time
--	---	--------------------------	--

Quest: (2) 24-hour time & timelines

Learning Journeys Using timetables

MG.E.3 Interpret and use timetables	1	Using timetables (12-hour and 24-hour time)	<ul style="list-style-type: none"> use real-world timetables (12-hour and 24-hour time) to determine arrival time given the desired departure time, including when the departure time is not listed exactly in the timetable use real-world timetables (12-hour and 24-hour time) to determine departure time given the desired arrival time, including when the arrival time is not listed exactly in the timetable use real-world timetables (12-hour and 24-hour time) to determine the duration of a journey solve real-world problems involving timetables
-------------------------------------	---	---	---

Learning Journeys Timelines

MG.E.4 Draw and interpret timelines using a given scale	1	Introducing timelines	<ul style="list-style-type: none"> interpret the sequence of events on a timeline (understanding of scale not expected)
---	---	-----------------------	--

MA3-14MG identifies three-dimensional objects, including prisms and pyramids, on the basis of their properties, and visualises, sketches and constructs them given drawings of different views

Quest: (1) Properties of 3D objects

Learning Journeys Prisms and pyramids

MG.F.1 Compare, describe and name prisms and pyramids	1	Comparing, describing and naming prisms	<ul style="list-style-type: none"> identify and determine the number of pairs of parallel faces of three-dimensional objects, eg 'A rectangular prism has three pairs of parallel faces' identify the 'base' of prisms recognise that the base of a prism is not always the face where the prism touches the ground name prisms according to the shape of their base, eg rectangular prism recognise a cube as a special type of prism
	2	Comparing, describing and naming pyramids	<ul style="list-style-type: none"> identify and determine the number of pairs of parallel faces of three-dimensional objects identify the 'base' of pyramids recognise that the base of a pyramid is not always the face where the prism touches the ground name pyramids according to the shape of their base, eg square pyramid

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-14MG identifies three-dimensional objects, including prisms and pyramids, on the basis of their properties, and visualises, sketches and constructs them given drawings of different views

Quest: (1) Properties of 3D objects

Learning Journeys Prisms and pyramids

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.1 Compare, describe and name prisms and pyramids	3	Investigating cross-sections of prisms and pyramids	<ul style="list-style-type: none"> recognise that prisms have a 'uniform cross-section' when the section is parallel to the base recognise that the base of a prism is identical to the uniform cross-section of the prism recognise that pyramids do not have a uniform cross-section when the section is parallel to the base
	4	Investigating properties of prisms and pyramids	<ul style="list-style-type: none"> identify, describe and compare the properties of prisms and pyramids, including: number of faces, shape of faces, number and type of identical faces, number of vertices, number of edges describe similarities and differences between prisms and pyramids, eg between a triangular prism and a hexagonal prism, between a rectangular prism and a rectangular(-based) pyramid determine that the faces of prisms are always rectangles except the base faces, which may not be rectangles determine that the faces of pyramids are always triangles except the base face, which may not be a triangle use the term 'apex' to describe the highest point above the base of a pyramid or cone

Learning Journeys Nets

MG.F.2 Connect three-dimensional objects with their nets and other two-dimensional representations	1	Connecting three-dimensional objects with two-dimensional representations	<ul style="list-style-type: none"> visualise and sketch three-dimensional objects from different views, including top, front and side views reflect on their own drawing of a three-dimensional object and consider how it can be improved show simple perspective in drawings by showing depth
	2	Connecting prisms and pyramids with their nets	<ul style="list-style-type: none"> examine a diagram to determine whether it is or is not the net of a prism or pyramid explain why a given net will not form a prism or pyramid visualise and sketch nets for a given prism or pyramid recognise whether a diagram is a net of a particular prism or pyramid visualise and name prisms and pyramids, given diagrams of their nets select the correct diagram of a net for a given prism or pyramid from a group of similar diagrams where the others are not valid nets of the object
	3	Connecting three-dimensional objects with their nets	<ul style="list-style-type: none"> examine a diagram to determine whether it is or is not the net of a closed three-dimensional object explain why a given net will not form a closed three-dimensional object visualise and sketch nets for given three-dimensional objects recognise whether a diagram is a net of a particular three-dimensional object visualise and name prisms and pyramids, given diagrams of their nets select the correct diagram of a net for a given prism or pyramid from a group of similar diagrams where the others are not valid nets of the object

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-14MG identifies three-dimensional objects, including prisms and pyramids, on the basis of their properties, and visualises, sketches and constructs them given drawings of different views

Quest: (2) Properties of 3D objects

Learning Journeys Constructing prisms and pyramids

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.3 Construct simple prisms and pyramids	1	Constructing simple right prisms	<ul style="list-style-type: none"> create prisms using a variety of materials, eg plasticine, paper or cardboard nets, connecting cubes create skeletal models of prisms, eg using toothpicks and modelling clay or straws and tape connect the edges of prisms with the construction of their skeletal models construct three-dimensional models of prisms and sketch the front, side and top views describe to another student how to construct or draw a prism construct three-dimensional models of prisms, given drawings of different views
	2	Constructing simple pyramids	<ul style="list-style-type: none"> create pyramids using a variety of materials create skeletal models of pyramids connect the edges of pyramids with the construction of their skeletal models construct three-dimensional models of pyramids and sketch the front, side and top views describe to another student how to construct or draw a pyramid construct three-dimensional models of pyramids, given drawings of different views

MA3-15MG manipulates, classifies and draws two-dimensional shapes, including equilateral, isosceles and scalene triangles, and describes their properties

Quest: (1) Properties of 2D shapes

Learning Journeys Classifying 2D shapes

MG.G.1 Classify two-dimensional shapes and describe their features	1	Classifying triangles by their sides and angles	<ul style="list-style-type: none"> identify and name right-angled, equilateral, isosceles and scalene triangles compare and describe features of the sides of equilateral, isosceles and scalene triangles identify triangles that are right-angled as well as scalene or isosceles explore, by measurement, side and angle properties of equilateral, isosceles and scalene triangles
	2	Classifying quadrilaterals by their features	<ul style="list-style-type: none"> explore, by measurement angle properties of squares, rectangles, parallelograms and rhombuses select and classify a two-dimensional shape from a description of its features including parallel and perpendicular lines recognise that two-dimensional shapes can be classified in more than 1 way explain the difference between regular and irregular shapes
	3	Classifying quadrilaterals using a variety of strategies	<ul style="list-style-type: none"> classify two-dimensional figures in a hierarchy based on properties interpret a hierarchy diagram of two-dimensional shapes and their properties use Venn diagrams to record classifications interpret classifications represented using Venn diagrams

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-15MG manipulates, classifies and draws two-dimensional shapes, including equilateral, isosceles and scalene triangles, and describes their properties

Quest: (1) Properties of 2D shapes

Learning Journeys Drawing 2D shapes

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.1 Classify two-dimensional shapes and describe their features	1	Drawing triangles	<ul style="list-style-type: none"> draw triangles from descriptions of their side and angle properties use tools such as templates, rulers, set squares and protractors to draw triangles use computer drawing tools to construct a triangle from a description of its side and angle properties
	2	Drawing quadrilaterals	<ul style="list-style-type: none"> draw quadrilaterals from descriptions of their side and angle properties; use conventional markings for parallel sides and right angles use tools such as templates, rulers, set squares and protractors to draw quadrilaterals use computer drawing tools to construct a quadrilateral from a description of its side and angle properties
	3	Drawing regular and irregular two-dimensional shapes	<ul style="list-style-type: none"> draw regular and irregular two-dimensional shapes from descriptions of their side and angle properties use conventional markings for parallel sides and right angles use tools such as templates, rulers, set squares and protractors to draw regular and irregular two-dimensional shapes use computer drawing tools to construct a shape from a description of its side and angle properties

Learning Journeys Rigid transformations

MG.G.2 Describe translations, reflections and rotations of two-dimensional shapes	1	Defining transformations: One-step translations, reflections and rotations	<ul style="list-style-type: none"> define translations, reflections and rotations of shapes and describe the similarities and differences between the original shape and the transformed shape identify the one-step transformation used to move a shape from 1 position to another
---	---	--	---

Learning Journeys Symmetry

MG.G.3 Identify line and rotational symmetries	1	Drawing lines of symmetry on given designs and shapes	<ul style="list-style-type: none"> recognise that some designs and shapes may have more than 1 line of symmetry identify and draw all lines of symmetry on designs and shapes determine the total number of lines of symmetry on designs and shapes determine whether or not a given line through designs and shapes is a line of symmetry
	2	Recognising rotational symmetry in shapes and designs	<ul style="list-style-type: none"> establish and define that rotational symmetry occurs when a shape looks identical to the original after being turned less than a full turn determine whether or not given shapes and designs have rotational symmetry sort shapes according to whether they are rotationally symmetrical or not
	3	Ordering of rotational symmetry	<ul style="list-style-type: none"> define the order of rotational symmetry as the number of times the shape looks identical to the original as it rotates around the centre of symmetry determine the order of rotational symmetry for given shapes and designs compare order of rotational symmetry for odd and even sided regular polygons

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-15MG manipulates, classifies and draws two-dimensional shapes, including equilateral, isosceles and scalene triangles, and describes their properties			
Quest: (1) Properties of 2D shapes			
Learning Journeys Enlarging 2D shapes			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.4 Apply the enlargement transformation to familiar two-dimensional shapes and explore the properties of the resulting image compared with the original	1	Enlarging 2D shapes	<ul style="list-style-type: none"> enlarge a simple 2D shape using a centre of enlargement and a simple scale factor, eg 2, 3, 4, 5, 10 recognise the simple scale factor used in an enlargement of a 2D shape.
Quest: (2) Properties of 2D shapes			
Learning Journeys Diagonals of 2D shapes			
MG.G.5 Investigate the diagonals of two-dimensional shapes	1	Investigating diagonals of special quadrilaterals	<ul style="list-style-type: none"> identify and name 'diagonals' of special quadrilaterals recognise the endpoints of the diagonals of a quadrilateral as the vertices of the shape determine and draw all the diagonals of quadrilaterals compare and describe diagonals of different quadrilaterals use measurement to determine which of the special quadrilaterals have diagonals that are equal in length determine whether any of the diagonals of a particular shape are also lines (axes) of symmetry of the shape
Learning Journeys Circles			
MG.G.5 Investigate the diagonals of two-dimensional shapes	1	Investigating diagonals of special quadrilaterals	<ul style="list-style-type: none"> identify and name 'diagonals' of special quadrilaterals recognise the endpoints of the diagonals of a quadrilateral as the vertices of the shape determine and draw all the diagonals of quadrilaterals compare and describe diagonals of different quadrilaterals use measurement to determine which of the special quadrilaterals have diagonals that are equal in length determine whether any of the diagonals of a particular shape are also lines (axes) of symmetry of the shape
Learning Journeys Rigid transformations			
MG.G.7 Investigate combinations of translations, reflections and rotations, with and without the use of digital technologies	1	Creating patterns that result from rotating shapes	<ul style="list-style-type: none"> extend and create repeating patterns that result from rotations, through investigation using a variety of tools, eg pattern blocks, dynamic geometry software, geoboards, dot paper describe the pattern predict the next term/s in the pattern
	2	Creating patterns that result from translations	<ul style="list-style-type: none"> extend and create repeating patterns that result from translations through investigation using a variety of tools, eg pattern blocks, dynamic geometry software, dot paper describe the pattern predict the next term/s in the pattern
	3	Identifying combinations of transformations	<ul style="list-style-type: none"> classify two-dimensional figures in a hierarchy based on properties interpret a hierarchy diagram of two-dimensional shapes and their properties use Venn diagrams to record classifications interpret classifications represented using Venn diagrams

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-16MG measures and constructs angles, and applies angle relationships to find unknown angles

Quest: (1) Angles & angle relationships

Learning Journeys Identifying and measuring angles

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.H.1 Estimate, measure and compare angles using degrees	1	Identifying hidden angles	<ul style="list-style-type: none"> identify angles in everyday situations where one arm of the angle is not visible, eg the angle of the door to the frame where one arm is the imaginary line across the bottom of the doorway identify angles in everyday situations where both arms are not visible, eg a ball rebounding on a billiard table
	2	Introducing formal units for measuring angles	<ul style="list-style-type: none"> establish the need for a formal unit to measure angles and introduce the degree and its symbol ($^{\circ}$)
	3	Measuring and estimating angles of up to 180° in degrees	<ul style="list-style-type: none"> measure angles of up to 180° using a protractor estimate angles of up to 180° and check by measuring measure angles of up to 360° using a protractor estimate angles of up to 360° and check by measuring

Learning Journeys Constructing and classifying angles

MG.H.2 Construct angles using a protractor	1	Classifying angles by their size in degrees	<ul style="list-style-type: none"> connect the term 'right angle' with 90°, 'straight angle' with 180° and 'angle of revolution' with 360° establish and recall the angle size in degrees for each of the classifications: acute, obtuse and reflex classify angles with a specified size in degrees as acute, right, obtuse, straight, reflex or a revolution draw angles that are acute, right, obtuse, straight, reflex or a revolution using a ruler only
	2	Constructing angles	<ul style="list-style-type: none"> sketch angles of a specified size up to 360° use a protractor to construct angles of up to 360° accurately

Quest: (2) Angles & angle relationships

Learning Journeys Adjacent and vertically opposite angles

MG.H.3 Investigate, with and without the use of digital technologies, angles on a straight line, angles at a point, and vertically opposite angles; use the results to find unknown angles	1	Introducing adjacent angles	<ul style="list-style-type: none"> define adjacent angles as angles that share a common arm and a common vertex and recognise the larger angle created recognise adjacent angles as additive and calculate the size of an unknown angle given the whole and its other parts and find the size of the whole given the size of the parts
	2	Exploring adjacent angles that form a right angle	<ul style="list-style-type: none"> explore the relationship between angles that form a right angle calculate an unknown angle within a right angle given the other parts
	3	Exploring adjacent angles that form a straight angle	<ul style="list-style-type: none"> explore the relationship between angles that form a straight angle calculate an unknown angle within a straight angle given the other parts
	4	Exploring adjacent angles that form an angle of revolution	<ul style="list-style-type: none"> explore the relationship between angles that form an angle of revolution calculate an unknown angle within an angle of revolution given the other parts
	5	Exploring vertically opposite angles	<ul style="list-style-type: none"> explore the relationship between angles formed when 2 straight lines intersect and identify these as 'vertically opposite angles' use the equality of vertically opposite angles to find the size of unknown angles in diagrams use the equality of vertically opposite angles to find the size of unknown angles represented by variables in diagrams

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA3-17MG locates and describes position on maps using a grid-reference system

Quest: (1) Maps & grid references

Learning Journeys Grid-referenced maps

Content Descriptor	Steps	Spine Nodes	Subnodes
MG.I.1 Use a grid-reference system to describe locations	1	Interpreting grid referenced maps	<ul style="list-style-type: none"> establish that grid referencing on maps allows for more accurate description of features/locations understand the structure (letter then number, horizontal then vertical) and meaning of grid references (everything in that grid square) use grid references to describe features/locations on maps identify features/locations on maps given their grid reference
	2	Creating grid referenced maps	<ul style="list-style-type: none"> draw grid referenced maps of familiar locations such as the classroom, school or local area use technology to create grid referenced maps of familiar locations such as the classroom, school or local area
	3	Drawing pathways on grid referenced maps	<ul style="list-style-type: none"> draw a path from 1 feature to another on a grid referenced map given the grid reference of each feature use grid references to describe a path from 1 feature to another on a grid referenced map

Learning Journeys Using landmarks and directional language

MG.I.2 Describe routes using landmarks and directional language	1	Introducing intercardinal compass directions	<ul style="list-style-type: none"> understand, locate and label the 4 intercardinal compass directions on a compass rose: north-east (NE), south-east (SE), south-west (SW) and north-west (NW) connect the 4 intercardinal compass directions to features of the local area from their particular location determine the direction of other cardinal and intercardinal compass directions when given one of the cardinal or intercardinal compass directions
	2	Describing locations on maps using cardinal and intercardinal compass directions	<ul style="list-style-type: none"> use the cardinal and intercardinal compass directions to describe the location of one feature in relation to another on a map that has an arrow representing north
	3	Following and giving directions involving cardinal and intercardinal compass directions	<ul style="list-style-type: none"> follow a sequence of 2 or more directions to find a location within a safe zone of the school give a sequence of 2 or more directions for a another person to find a location within a safe zone of the school
	4	Drawing routes on maps using cardinal and intercardinal compass directions	<ul style="list-style-type: none"> draw a route on a map given a sequence of directions involving cardinal and intercardinal directions, and landmarks use cardinal and intercardinal directions, and landmarks, to describe a route between 2 locations on a map

Quest: (2) Maps & grid references

Learning Journeys NO INFO - BOTH SECTIONS ARE IN PART 1

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA3-18SP uses appropriate methods to collect data and constructs, interprets and evaluates data displays, including dot plots, line graphs and two-way tables

Quest: (1) Data investigations

Learning Journeys Categorical and numerical data

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.1 Pose questions and collect categorical or numerical data by observation or survey	1	Conducting surveys to obtain category and numerical data	<ul style="list-style-type: none"> pose and refine questions to construct a survey to obtain categorical and numerical data about a matter of interest collect categorical and numerical data through observation or by conducting surveys sort category and numerical data and display in a table
	2	Conducting a statistical investigation using discrete or continuous data	<ul style="list-style-type: none"> ask and investigate statistical questions that may require sampling; demonstrate an understanding that sets of data may be samples of a larger population distinguish between discrete data and continuous data collect data by conducting a survey or an experiment to do with themselves, their environment, issues in their school or community, or content from another subject, and record observations or measurements organise discrete or continuous data and display the data in charts, tables, and graphs that have appropriate titles, labels and scales that suit the range and distribution of the data

Learning Journeys Constructing data displays

SP.A.2 Construct displays, including column graphs, dot plots and tables, appropriate for data type, with and without the use of digital technologies	1	Constructing a line graph using a scale of many-to-one correspondence	<ul style="list-style-type: none"> construct a line graph using a scale of many-to-one correspondence, with and without the use of digital technologies name and label the horizontal and vertical axes when constructing graphs choose an appropriate title to describe the data represented in a data display determine an appropriate scale of many-to-one correspondence to represent the data in a data display mark equal spaces on the axes when constructing graphs, and use the scale to label the markers interpret data in line graph representing primary data; ask and answer questions related to the data in the display; draw conclusions
	2	Constructing a dot plot	<ul style="list-style-type: none"> represent numerical data in a dot plot interpret data in a dot plot; ask and answer questions related to the data in the display; draw conclusions
	3	Choosing appropriate data displays	<ul style="list-style-type: none"> consider the data type to determine and draw the most appropriate display(s), such as column graphs, dot plots and line graphs discuss and justify the choice of data display used recognise that line graphs are used to represent data that demonstrates continuous change recognise which types of data display are most appropriate to represent categorical data

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA3-18SP uses appropriate methods to collect data and constructs, interprets and evaluates data displays, including dot plots, line graphs and two-way tables

Quest: (1) Data investigations

Learning Journeys Describing and interpreting data sets

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.3 Describe and interpret different data sets in context	1	Interpreting primary and secondary data in a column graph with many-to-one correspondence	<ul style="list-style-type: none"> describe and interpret data presented in column graphs; ask and answer questions related to data in a column graph determine the total number of data values represented in column graphs identify and describe relationships that can be observed in a column graph; compare column graphs with other data displays
	2	Interpreting primary and secondary data in a line graph	<ul style="list-style-type: none"> interpret line graphs using the scales on the axes describe and interpret data presented in line graphs identify and describe relationships that can be observed in data displays
	3	Reading and interpreting data in a dot plot	<ul style="list-style-type: none"> describe and interpret data in a dot plot; ask and answer questions related to the data in the display; draw conclusions determine the total number of data values represented in dot plots identify and describe relationships that can be observed in data displays compare dot plots to other types of displays
	4	Interpreting data and solving problems using data in tables	<ul style="list-style-type: none"> describe and interpret data presented in tables, eg maximum and minimum values; total number of responses; differences between values identify and describe relationships; draw conclusions and ask questions

Quest: (2) Data investigations

Learning Journeys Two-way tables

SP.A.4 Interpret and compare a range of data displays, including side-by-side column graphs for two categorical variables	1	Introducing and interpreting bivariate data and two-way tables	<ul style="list-style-type: none"> interpret data presented in two-way tables that represent two categorical variables ask and answer comparative and relational questions related to data in a two-way table
	2	Representing bivariate data in a two-way table	<ul style="list-style-type: none"> create a two-way table to organise data involving 2 categorical variables ask and answer comparative and relational questions related to data in a two-way table

Learning Journeys Side-by-side column graphs

SP.A.4 Interpret and compare a range of data displays, including side-by-side column graphs for two categorical variables	1	Introducing and interpreting side-by-side column graphs	<ul style="list-style-type: none"> interpret side-by-side column graphs for 2 categorical variables ask and answer comparative and relational questions related to data in a side-by-side column graph
	2	Representing bivariate data in a side-by-side column graph	<ul style="list-style-type: none"> construct a side by side column graph for two categorical variables ask and answer comparative and relational questions related to data in a side by side column graph

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA3-18SP uses appropriate methods to collect data and constructs, interprets and evaluates data displays, including dot plots, line graphs and two-way tables

Quest: (2) Data investigations

Learning Journeys Comparing & selecting bivariate data displays

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.4 Interpret and compare a range of data displays, including side-by-side column graphs for two categorical variables	1	Comparing different displays of the same data set	<ul style="list-style-type: none"> interpret and compare different displays of the same data set to determine the most appropriate display for the data set compare the effectiveness of different student-created data displays discuss the advantages and disadvantages of different representations of the same data explain which display is the most appropriate for interpretation of a particular data set compare representations of the same data set in a side-by-side column graph and in a two-way table
	2	Selecting appropriate data displays	<ul style="list-style-type: none"> select an appropriate type of graph to represent a set of data graph data using technology, and justify the choice of graph from types of graphs already studied

Learning Journeys Interpreting and evaluating secondary data

SP.A.5 Interpret secondary data presented in digital media and elsewhere	1	Interpreting discrete and continuous secondary data	<ul style="list-style-type: none"> differentiate between first-hand and second-hand data read, interpret, and draw conclusions from secondary data presented in charts, tables, and graphs (including broken-line graphs)
	2	Interpreting secondary data	<ul style="list-style-type: none"> interpret data representations found in digital media and in factual texts interpret tables and graphs from the media and online sources identify and describe conclusions that can be drawn from a particular representation of data
	3	Evaluating data collection for bias and misleading information	<ul style="list-style-type: none"> identify sources of possible bias in representations of data in the media by discussing various influences on data collection and representation determine, through investigation, how well a set of data represents a population, on the basis of the method that was used to collect the data discuss the messages that those who created a particular data representation might have wanted to convey
	4	Evaluating data displays for bias and misleading information	<ul style="list-style-type: none"> critically evaluate data representations found in digital media and related claims identify misleading representations of data in the media explain how different scales used on graphs can influence conclusions drawn from the data demonstrate, through investigation, an understanding of how data from charts, tables, and graphs can be used to make inferences and convincing arguments

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA3-19SP conducts chance experiments and assigns probabilities as values between 0 and 1 to describe their outcomes

Quest: (1) Probability values

Learning Journeys Outcomes of Chance Experiments

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.B.1 List outcomes of chance experiments involving equally likely outcomes and represent probabilities of those outcomes using fractions	1	Investigating equally likely outcomes of chance experiments	<ul style="list-style-type: none"> recognise that outcomes are described as 'equally likely' when any one outcome has the same chance of occurring as any other outcome list all outcomes in chance experiments where each outcome is equally likely to occur use the term 'probability' to describe the numerical value that represents the likelihood of an outcome of a chance experiment represent probabilities of outcomes of chance experiments using fractions determine the likelihood of winning simple games by considering the number of possible outcomes
	2	Describing the chances of simple events occurring using familiar language and numeric benchmarks	<ul style="list-style-type: none"> create, order, describe and explain the likelihood of simple events using the language of probability and numeric benchmarks of 0, $\frac{1}{2}$ and 1

Learning Journeys Probabilities from 0 to 1

SP.B.2 Recognise that probabilities range from 0 to 1	1	Ordering chance outcomes in a probabilities range from 0 to 1	<ul style="list-style-type: none"> establish that the sum of the probabilities of the outcomes of any chance experiment is equal to 1 understand that the probability ranges cannot be less than 0 and greater than 1 order commonly used chance words on an interval from zero ('impossible') to one ('certain') describe events that are impossible and events that are certain describe the likelihood of a variety of events as being more or less than a half (or 0.5) and order the events on an interval
---	---	---	--

Quest: (2) Probability values

Learning Journeys Frequency and Fairness in Chance Experiments

SP.B.3 Compare observed frequencies across experiments with expected frequencies	1	Comparing observed frequencies with expected frequencies in chance experiments	<ul style="list-style-type: none"> use the term 'frequency' to describe the number of times a particular outcome occurs in a chance experiment distinguish between the 'frequency' of an outcome and the 'probability' of an outcome in a chance experiment record and compare the expected frequencies of outcomes of chance experiments with observed frequencies, including where the outcomes are not equally likely explain why observed frequencies of outcomes in chance experiments may differ from expected frequencies recognise that some random generators have outcomes that are not equally likely and discuss the effect on expected outcomes
	2	Exploring fair and unfair chance experiments	<ul style="list-style-type: none"> discuss the 'fairness' of simple games involving chance design a spinner or label a die so that a particular outcome is more likely than another and discuss the probabilities of the outcomes list all possible outcomes using tables, lists and tree diagrams (with or without digital technology) where outcomes are not equally likely to occur record results of chance experiments using appropriate methods

NSW Curriculum Stage 3

Mathletics

Understanding Practice and Fluency (UPF)

Statistics and Probability

MA3-19SP conducts chance experiments and assigns probabilities as values between 0 and 1 to describe their outcomes

Quest: (2) Probability values

Learning Journeys Probability as a Fraction, Decimal or Percent

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.B.4 Describe probabilities using fractions, decimals and percentages	1	Describing probability of a single event using fractions, decimals and percentages	<ul style="list-style-type: none"> list the outcomes for chance experiments where the outcomes are not equally likely to occur and assign probabilities to the outcomes using fractions use knowledge of equivalent fractions, decimals and percentages to assign probabilities to the likelihood of outcomes explain real-life events in the context of probabilities use the terminology 'theoretical probability' and/or 'relative frequency' as the value given by the formula: number of times named outcome (s) did happen/total number of trials

Learning Journeys Chance Experiments with Trials and Sampling

SP.B.5 Conduct chance experiments with both small and large numbers of trials using appropriate digital technologies	1	Using digital technologies to conduct chance experiments	<ul style="list-style-type: none"> assign expected probabilities to outcomes in chance experiments with random generators, including digital simulators, and compare the expected probabilities with the observed probabilities after both small and large numbers of trials determine and discuss the differences between the expected probabilities and the observed probabilities after both small and large numbers of trials explain what happens to the observed probabilities as the number of trials increases
	2	Making generalisations from chance samples	<ul style="list-style-type: none"> use sample results to make predictions about a larger sample discuss whether a prediction about a larger population, from which a sample comes, would be the same if a different sample were used

NSW Curriculum

Stage 4

Understanding Practice and Fluency (UPF)

Number and Algebra

MA4-4NA compares, orders and calculates with integers, applying a range of strategies to aid computation

Quest: Working with integers

Learning Journeys Laws of multiplication and division

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.1 Apply the associative, commutative and distributive laws to aid mental and written computation	1	Using factors of a number to aid mental computation involving multiplication and division	<ul style="list-style-type: none"> use factors of a number to aid mental computation involving multiplication and division
	2	Showing the connection between division and multiplication, including where there is a remainder	<ul style="list-style-type: none"> show the connection between division and multiplication, including where there is a remainder
	3	Applying the distributive law to aid in mental computation to expand expressions containing 2 terms within the grouping symbols	<ul style="list-style-type: none"> apply the distributive law to aid in mental computation to expand expressions containing 2 terms within the grouping symbols
		Applying the commutativity law of multiplication to aid mental computation	<ul style="list-style-type: none"> apply the commutativity law to aid mental computation apply the associativity law of multiplication to aid in mental computation
	4	Applying the distributive law to aid in mental computation to expand expressions containing 3 or more terms within the grouping symbols	<ul style="list-style-type: none"> apply the distributive law to aid in mental computation to expand expressions containing 3 or more terms within the grouping symbols
	5	Solving problems within a given context by applying the distributive law	<ul style="list-style-type: none"> solve problems within a given context by applying the distributive law
	1	Describing the direction and magnitude of integers	<ul style="list-style-type: none"> describe the direction and magnitude of integers when applied to the number line
	2	Describing the direction and magnitude of integers	<ul style="list-style-type: none"> describe the direction and magnitude of integers when applied to the number line
		Ordering integers	<ul style="list-style-type: none"> order integers of any size in ascending and descending order including negative numbers
	3	Understanding addition and subtraction of integers pictorially	<ul style="list-style-type: none"> understand addition and subtraction of integers pictorially
		Understanding addition and subtraction of integers symbolically	<ul style="list-style-type: none"> understand addition and subtraction of integers symbolically
	4	Representing addition and subtraction on a horizontal or vertical number line diagram	<ul style="list-style-type: none"> represent addition and subtraction on a horizontal or vertical number line diagram
	5	Adding and subtracting negative integers	<ul style="list-style-type: none"> add and subtract negative integers

Number and Algebra

MA4-4NA compares, orders and calculates with integers, applying a range of strategies to aid computation			
Quest: Working with integers			
Learning Journeys Solving temperature problems			
Content Descriptor	Steps	Spine Nodes	Subnodes
NA.A.2 Compare, order, add and subtract integers	1	Measuring temperature scales	<ul style="list-style-type: none"> interpret scales on thermometers to accurately read temperatures
	2	Calculating change in temperature	<ul style="list-style-type: none"> calculate the difference in temperature between all ranges including between 0 and a negative or positive, both positive, both negative, 1 positive and 1 negative
	3	Solving problems within a given context involving a change in temperature	<ul style="list-style-type: none"> solve problems within a given context involving a change in temperature solve problems within a given context involving a change in temperature using temperature specific terminology, eg warmer
	4	Describing the difference between a given minimum and maximum temperature using terms such as 'temperature range'	<ul style="list-style-type: none"> describe the difference between a given minimum and maximum temperature using terms such as 'temperature range'
Learning Journeys Applying the four operations to integers			
NA.A.3 Carry out the four operations with rational numbers and integers, using efficient mental and written strategies and appropriate digital technologies	1	Using the 4 operations with integers	<ul style="list-style-type: none"> use the 4 operations to solve problems involving integers
	2	Applying the order of operations to evaluate expressions involving integers with no exponents or radicals	<ul style="list-style-type: none"> apply the order of operations to evaluate expressions involving integers with no exponents or radicals
	3	Applying the order of operations to evaluate expressions involving integers where the operator is contained within the numerator or denominator of a fraction	<ul style="list-style-type: none"> apply the order of operations to evaluate expressions involving integers, where an operator is contained within the numerator or denominator of a fraction and the result is a whole number apply the order of operations to evaluate expressions involving integers where the operator is contained within the numerator or denominator of a fraction
MA4-5NA operates with fractions, decimals and percentages			
Quest: Fractions, decimals & percentages			
Learning Journeys Fractions: improper and proper fractions			
NA.B.1 Compare fractions using equivalence; locate and represent positive and negative fractions and mixed numerals on a number line	1	Generating equivalent fractions with denominators (denominators 1-100, 1000)	<ul style="list-style-type: none"> generate equivalent fractions
	2	Expressing a fraction in its simplest form	<ul style="list-style-type: none"> determine the highest common factor of a pair of integers express a fraction in its simplest form
	3	Expressing improper fractions as mixed numerals	<ul style="list-style-type: none"> express improper fractions as mixed numerals that do not require simplification of the proper fraction express improper fractions as mixed numerals that require simplification of the proper fraction
	4	Expressing mixed numerals as improper fractions	<ul style="list-style-type: none"> express mixed numerals as improper fractions

Understanding Practice and Fluency (UPF)

Number and Algebra

MA4-5NA operates with fractions, decimals and percentages

Quest: Fractions, decimals & percentages

Learning Journeys Fractions: comparing and ordering

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.1 Compare fractions using equivalence; locate and represent positive and negative fractions and mixed numerals on a number line	1	Comparing and ordering proper fractions	<ul style="list-style-type: none"> compare and order proper fractions where the denominators are not always multiples of the same number record comparisons using $=$, \neq, $<$, $>$, \leq, \geq symbols
	2	Comparing and ordering improper fractions	<ul style="list-style-type: none"> compare and order improper fractions where the denominators are not always multiples of the same number record comparisons using $=$, \neq, $<$, $>$, \leq, \geq symbols
	3	Comparing and ordering proper fractions, improper fractions and mixed numerals	<ul style="list-style-type: none"> compare and order proper fractions, improper fractions and mixed numerals where the denominators are not always multiples of the same number record comparisons using $=$, \neq, $<$, $>$, \leq, \geq symbols
	4	Placing positive and negative fractions, decimals and mixed numbers on a number line in order to compare	<ul style="list-style-type: none"> place positive and negative fractions, decimals and mixed numbers on a number line in order to compare

Learning Journeys Fractions: adding fractions

NA.B.2 Solve problems involving addition and subtraction of fractions, including those with unrelated denominators	1	Adding proper fractions with common denominators	<ul style="list-style-type: none"> add proper fractions with common denominators
		Adding improper fractions with common denominators	<ul style="list-style-type: none"> add improper fractions with common denominators add improper fractions with common denominators expressing answers as a mixed numeral
	2	Adding proper fractions with unlike denominators	<ul style="list-style-type: none"> add proper fractions with unlike denominators
	3	Adding improper fractions with unlike denominators	<ul style="list-style-type: none"> add improper fractions with unlike denominators add improper fractions with unlike denominators expressing answers as a mixed numeral

Learning Journeys Fractions: subtracting fractions

NA.B.2 Solve problems involving addition and subtraction of fractions, including those with unrelated denominators	1	Subtracting proper fractions with common denominators	<ul style="list-style-type: none"> subtract proper fractions with common denominators
	2	Subtracting improper fractions with common denominators	<ul style="list-style-type: none"> subtract improper fractions with common denominators subtract improper fractions with common denominators, expressing answers as a mixed numeral
		Subtracting mixed numbers with common denominators	<ul style="list-style-type: none"> subtract mixed numbers with common denominators
	4	Subtracting proper fractions with unlike denominators	<ul style="list-style-type: none"> subtract proper fractions with unlike denominators
	5	Subtracting improper fractions with unlike denominators	<ul style="list-style-type: none"> subtract improper fractions with unlike denominators subtract improper fractions with unlike denominators expressing answers as a mixed numeral
		Subtracting mixed numbers with unlike denominators	<ul style="list-style-type: none"> subtract mixed numbers with unlike denominators

Understanding Practice and Fluency (UPF)

MA4-5NA operates with fractions, decimals and percentages

Quest: Fractions, decimals & percentages

Learning Journeys Fractions: adding and subtracting fractions

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.B.2 Solve problems involving addition and subtraction of fractions, including those with unrelated denominators	1	Performing addition or subtraction with fractions where fractions can be in different forms	• perform addition or subtraction with fractions where fractions can be in different forms
	2	Subtracting a fraction from an integer	• subtract a fraction from a whole number using written methods
	3	Demonstrating an understanding of adding and subtracting positive fractions and mixed numerals, with like and unlike denominators, concretely, pictorially and symbolically	• demonstrate an understanding of adding and subtracting positive fractions and mixed numerals, with like and unlike denominators, concretely, pictorially and symbolically
	4	Recognising and explaining incorrect operations with fractions	• recognise and explain incorrect operations with fractions

Learning Journeys Multiplying decimals & finding quantities

NA.B.3 Multiply and divide fractions and decimals using efficient written strategies and digital technologies	1	Multiplying decimals using a calculator	• multiply decimals using a calculator
	2	Multiplying decimals using written/mental methods	• multiply decimals using mental/written methods
	3	Calculating decimals of quantities using a calculator	• calculate decimals of quantities using a calculator
	4	Calculating decimals of quantities using mental/written methods	• calculate decimals of quantities using mental, written and calculator methods

Learning Journeys Multiplying fractions & finding quantities

NA.B.3 Multiply and divide fractions and decimals using efficient written strategies and digital technologies	1	Multiplying proper fractions by a whole number greater than 1	• multiply proper fractions by a whole number greater than 1
		Multiplying improper fractions by a whole number greater than 1, expressing answer as a mixed numeral	• multiply improper fractions by a whole number greater than 1
	2	Multiplying 2 proper fractions	• multiply 2 proper fractions using written methods
	3	Multiplying 2 improper fractions	• multiply improper fractions using written methods
		Multiplying 2 improper fractions, expressing the answer as a mixed numeral	• multiply 2 improper fractions expressing the answer as a mixed numeral
	4	Multiplying 2 mixed numerals	• multiply mixed numerals using written methods
		Multiplying mixed numerals by a whole number greater than 1	• multiply mixed numerals by a whole number greater than 1
	5	Multiplying proper fractions, improper fractions and mixed numerals using written methods	• multiply proper fractions, improper fractions and mixed numerals using written methods
		Calculating fractions of quantities using mental or written strategies	• calculate fractions of quantities using mental or written strategies

Quest: Rates and ratios

Learning Journeys Using simple ratios

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.D.1 Recognise and solve problems involving simple ratios	1	Comparing quantities measured in the same units using ratios	• compare quantities measured in the same units using ratios
		Dividing an interval into a given ratio on a number line	• divide an interval into a given ratio on a number line
	2	Expressing 1 part of a ratio as a fraction of the whole	• express 1 part of a ratio as a fraction of the whole
	3	Identifying terms of a ratio as 'parts' of the ratio	• identify terms of a ratio as 'parts' of the ratio

Learning Journeys Simplifying ratios

NA.D.1 Recognise and solve problems involving simple ratios	1	Simplifying ratios using highest common factors	• simplify ratios using highest common factors
	2	Simplifying ratios with fractions involved	• simplify ratios containing one or more fraction parts using the HCF to re-write as a pair of fractions with a common denominator first
	3	Simplifying ratios with decimals involved	• simplify ratios containing one or more decimal parts multiplying both parts by a common power of 10 that removes the decimal. Write the resultant ratio in simplest form
	4	Identifying equivalent ratios	• identify equivalent ratios

Learning Journeys Solve simple problems involving ratios

NA.D.1 Recognise and solve problems involving simple ratios	1	Applying the unitary method to ratio problems	• apply the unitary method to ratio problems
	2	Dividing a quantity into a given ratio	• divide a quantity into a given ratio • express the division of a quantity into 2 parts as a ratio using original amounts

Learning Journeys Solve problems involving ratios

NA.D.2 Solve a range of problems involving ratios and rates, with and without the use of digital technologies	1	Dividing a given quantity into 2 parts in a given part:whole ratio	• divide a given quantity into 2 parts in a given part:whole ratio
	2	Solving a variety of real-life problems involving dividing quantities into a given ratio	• solve a variety of real-life problems involving dividing quantities into a given ratio

Learning Journeys Ratios involving more than two parts

NA.D.2 Solve a range of problems involving ratios and rates, with and without the use of digital technologies	1	Simplifying ratios using highest common factors (ratio composed of 3 or more numbers)	• simplify ratios using highest common factors
	2	Dividing a quantity into a given ratio (ratio composed of 3 or more numbers)	• divide a quantity in a given ratio
	3	Applying the unitary method to ratio problems (ratio composed of 3 or more numbers)	• apply the unitary method to ratio problems

Understanding Practice and Fluency (UPF)

Learning Journeys Simplifying algebraic expressions using mixed operations

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.3 Simplify algebraic expressions involving the four operations	1	Simplifying algebraic expressions involving the 4 operations	<ul style="list-style-type: none"> simplify a range of algebraic expressions, including those involving mixed operations apply the order of operations to simplify algebraic expressions

Learning Journeys Number patterns

NA.E.4 Create algebraic expressions and evaluate them by substituting a given value for each variable	1	Using objects to build a geometric pattern, record the results in a table of values, describe the pattern in words and algebraic symbols, and represent the relationship on a number grid	<ul style="list-style-type: none"> use objects to build a geometric pattern, record the results in a table of values, describe the pattern in words and algebraic symbols, and represent the relationship on a number grid
	2	Checking pattern descriptions by substituting further values	<ul style="list-style-type: none"> check pattern descriptions by substituting further values
	3	Replacing written statements describing patterns with equations written in algebraic symbols	<ul style="list-style-type: none"> replace written statements describing patterns with equations written in algebraic symbols

Learning Journeys Evaluating formulae

NA.E.4 Create algebraic expressions and evaluate them by substituting a given value for each variable	1	Substituting known values in for pronumerals	<ul style="list-style-type: none"> substitute known values in for pronumerals to find the value of an expression, eg if $x = 2$ and $y = 3$, find the value of $2x + 3y$
	2	Using simple formulas to solve problems involving substituting in known variables to solve a problem	<ul style="list-style-type: none"> use simple formulas to solve problems involving substituting in known variables to solve a problem
	3	Using authentic formulas to solve problems involving substituting in known variables to solve a problem	<ul style="list-style-type: none"> use authentic formulas to solve problems involving substituting in known variables to solve a problem
	4	Determining whether a particular pattern can be described using algebraic symbols	<ul style="list-style-type: none"> describe patterns using algebraic symbols

Learning Journeys Creating algebraic expressions

NA.E.4 Create algebraic expressions and evaluate them by substituting a given value for each variable	1	Creating algebraic expressions	<ul style="list-style-type: none"> create algebraic expressions and evaluate them by substituting a given value for each variable
	2	Substituting into algebraic expressions and evaluating the result	<ul style="list-style-type: none"> substitute into algebraic expressions and evaluate the result substitute numerical values into formulas and expressions, including scientific formulas

Understanding Practice and Fluency (UPF)

Number and Algebra

MA4-6NA solves financial problems involving purchasing goods

Quest: Rates and ratios

Learning Journeys Extending and applying the distributive law

Content Descriptor	Steps	Spine Nodes	Subnodes
NA.E.5 Extend and apply the distributive law to the expansion of algebraic expressions	1	Expanding algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a and c are positive integers and b is a variable with coefficient of 1	<ul style="list-style-type: none"> expand algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a and c are positive integers and b is a variable with coefficient of 1
	2	Expanding algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a and c are positive or negative integers and b is a variable with coefficient of 1	<ul style="list-style-type: none"> expand algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a and c are positive or negative integers and b is a variable with coefficient of 1
	3	Expanding algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a , b , and c can be positive numbers or variables (coefficients are 1)	<ul style="list-style-type: none"> expand algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a, b, and c can be positive numbers or variables (coefficients are 1)
	4	Expanding algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a , b and c can be positive or negative numbers or variables (coefficients 1 or -1)	<ul style="list-style-type: none"> expand algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a, b and c can be positive or negative numbers or variables (coefficients 1 or -1)
	5	Expanding algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a , b and c can be positive or negative numbers or variables (coefficients integers not limited to 1)	<ul style="list-style-type: none"> expand algebraic expressions in the form $a(b+c)$ by removing grouping symbols (distributive law) where a, b and c can be positive or negative numbers or variables (coefficients integers not limited to 1)

Learning Journeys Factorising algebraic expressions

NA.E.6 Factorise algebraic expressions by identifying numerical factors	1	Decomposing (factorising) algebraic expressions by identifying numerical and algebraic factors	<ul style="list-style-type: none"> decompose (factorise) algebraic expressions by identifying numerical and algebraic factors and writing it as a product of these
	2	Factorising algebraic expressions by identifying numerical factors	<ul style="list-style-type: none"> factorise algebraic expressions by finding a common numerical factor and bringing it out the front of the brackets with its product inside the brackets
	3	Factorising algebraic expressions by identifying negative numerical factors	<ul style="list-style-type: none"> factorise algebraic expressions by finding a common negative numerical factor and bringing it out the front of the brackets with its product inside the brackets

	4	Finding the length of an unknown side (shorter side and hypotenuse) using Pythagoras' theorem in a variety of practical problems within a given context, with and without diagrams given, with answers given in surd form	<ul style="list-style-type: none"> find the length of an unknown side (shorter side and hypotenuse) using Pythagoras' theorem in a variety of practical problems within a given context, with and without diagrams given, with answers given in surd form
MA4-17MG classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles			
Quest: Triangles and quadrilaterals			
Learning Journeys Labelling and naming conventions			
MG.F.1 Classify triangles according to their side and angle properties and describe quadrilaterals	1	Labelling common shapes	<ul style="list-style-type: none"> label and name triangles (eg triangle ABC or $\triangle ABC$) and quadrilaterals (eg ABCD) in text and on diagrams use the common conventions to mark equal intervals on diagrams
Learning Journeys Properties of triangles			
MG.F.1 Classify triangles according to their side and angle properties and describe quadrilaterals	1	Classifying types of triangles	<ul style="list-style-type: none"> recognise and classify types of triangles on the basis of their properties (acute-angled, right-angled, obtuse-angled, equilateral, isosceles and scalene triangles) recognise that a given triangle may belong to more than 1 class
	2	Sketching and labelling triangles from a worded or verbal description	<ul style="list-style-type: none"> determine whether the triangle exists according to its physical description

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-17MG classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles			
Quest: Triangles and quadrilaterals			
Learning Journeys Convex and non-convex quadrilaterals			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.1 Classify triangles according to their side and angle properties and describe quadrilaterals	1	Distinguishing between convex and non-convex quadrilaterals	<ul style="list-style-type: none"> distinguish between convex and non-convex quadrilaterals by distinguishing between convex and non-convex quadrilaterals using the fact that the diagonals of a convex quadrilateral lie inside the figure distinguish between convex and non-convex quadrilaterals using the fact that a non-convex quadrilateral has an interior angle greater than 180 degrees using the fact that the diagonals of a convex quadrilateral lie inside the figure
Learning Journeys Properties of quadrilaterals			
MG.F.1 Classify triangles according to their side and angle properties and describe quadrilaterals	1	Investigating properties of special quadrilaterals: rectangles	<ul style="list-style-type: none"> prove a quadrilateral is a rectangle using properties
		Investigating properties of special quadrilaterals: squares	<ul style="list-style-type: none"> prove a quadrilateral is a square using properties
	2	Investigating properties of special quadrilaterals: parallelograms	<ul style="list-style-type: none"> prove a quadrilateral is a parallelogram using properties
	3	Investigating properties of special quadrilaterals: rhombuses	<ul style="list-style-type: none"> prove a quadrilateral is a rhombus using properties
	4	Investigating properties of special quadrilaterals: trapeziums/trapezoids	<ul style="list-style-type: none"> prove a quadrilateral is a trapezium using properties
	5	Investigating properties of special quadrilaterals: kites	<ul style="list-style-type: none"> prove a quadrilateral is a kite using properties
Learning Journeys Reasoning, sketching and describing quadrilaterals			
MG.F.1 Classify triangles according to their side and angle properties and describe quadrilaterals	1	Reasoning about special quadrilaterals on the basis of their properties	<ul style="list-style-type: none"> classify a set of quadrilaterals based on their properties identify a given quadrilateral from its description identify a given quadrilateral from a diagram
	2	Describing special quadrilaterals	<ul style="list-style-type: none"> describe a quadrilateral in sufficient detail for it to be sketched
	3	Reasoning about triangles and special quadrilaterals	<ul style="list-style-type: none"> use the properties of special triangles and quadrilaterals to solve simple numerical problems with appropriate reasoning recognise special types of triangles and quadrilaterals embedded in composite figures or drawn in various orientations

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-17MG classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles			
Quest: Triangles and quadrilaterals			
Learning Journeys Line and rotational symmetry			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.2 Identify line and rotational symmetries	1	Identifying line symmetry	<ul style="list-style-type: none"> identify, draw and determine the total number of lines of symmetry on designs and shapes, including special triangles, quadrilaterals and polygons complete symmetrical designs and shapes given their line of symmetry
	2	Determining rotational symmetry	<ul style="list-style-type: none"> determine whether or not given shapes and designs have rotational symmetry determine the order of rotational symmetry for given shapes and designs determine whether or not given shapes and designs have rotational symmetry
	3	Determining lines (axes) of symmetry and the order of rotational symmetry of polygons, including the special quadrilaterals	<ul style="list-style-type: none"> determine if particular triangles and quadrilaterals have line and/or rotational symmetry
	4	Investigating the line and rotational symmetries of circles and of diagrams involving circles, such as a sector or a circle with a marked chord or tangent	<ul style="list-style-type: none"> investigate if a particular circle with a marked chord or tangent, sector of a circle or a regular circle has a line and/or rotational symmetry
	5	Identifying line and rotational symmetries in pictures and diagrams	<ul style="list-style-type: none"> identify if a picture or diagram has a line and/or rotational symmetry
Learning Journeys Solving problems involving interior angle sums			
MG.F.3 Demonstrate that the angle sum of a triangle is 180° and use this to find the angle sum of a quadrilateral	1	Exploring and proving the interior angle sum of a triangle	<ul style="list-style-type: none"> calculate an unknown angle represented by a variable within a triangle, given the other 2 angles
	2	Finding the interior angle sum of a quadrilateral	<ul style="list-style-type: none"> calculate an unknown angle/s represented by a variable/s within quadrilaterals, given the appropriate angles
Learning Journeys Using properties of triangles & quadrilaterals			
MG.F.4 Use the properties of special triangles and quadrilaterals to solve simple numerical problems with appropriate reasoning	1	Reasoning about triangles and special quadrilaterals	<ul style="list-style-type: none"> use the properties of special triangles and quadrilaterals to solve simple numerical problems with appropriate reasoning recognise special types of triangles and quadrilaterals embedded in composite figures or drawn in various orientations
	2	Determining unknown sides and angles embedded in diagrams, using the properties of special triangles and quadrilaterals, giving reasons	<ul style="list-style-type: none"> determine unknown sides and angles embedded in diagrams, using the properties of special triangles and quadrilaterals, giving reasons

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-17MG classifies, describes and uses the properties of triangles and quadrilaterals, and determines congruent triangles to find unknown side lengths and angles			
Quest: Triangles and quadrilaterals			
Learning Journeys Defining and working with congruence			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.F.5 Define congruence of plane shapes using transformations	1	Identifying congruent figures by superimposing them through a combination of rotations, reflections and translations	<ul style="list-style-type: none"> identify congruent figures by superimposing them through a combination of rotations, reflections and translations
	2	Matching sides and angles of 2 congruent polygons	<ul style="list-style-type: none"> determine which angles and sides of a polygon are matched to another polygon's sides and angles
	3	Determining the condition for 2 circles or parts of circles to be congruent	<ul style="list-style-type: none"> determine when 2 circles are congruent according to their radii/diameters determine when 2 semi-circles are congruent according to their radii/diameters determine when 2 sectors are congruent according to equal internal angles at the centre and radii/diameters
Learning Journeys Determining congruence in triangles			
MG.F.6 Develop the conditions for congruence of triangles	1	Determining if 2 triangles are congruent using the SSS test	<ul style="list-style-type: none"> use the SSS test to determine if 2 or more triangles are congruent
	2	Determining if 2 triangles are congruent using the SAS test	<ul style="list-style-type: none"> use the SAS test to determine if 2 or more triangles are congruent
	3	Determining if 2 triangles are congruent using the AAS test	<ul style="list-style-type: none"> use the AAS test to determine if 2 or more triangles are congruent
	4	Determining if 2 triangles are congruent using the RHS test	<ul style="list-style-type: none"> use the RHS test to determine if 2 or more triangles are congruent
	5	Determining if 2 triangles are congruent using the SSS, SAS, AAS and RHS test Using the congruency tests to identify a pair of congruent triangles from a selection of 3 or more triangles or from triangles embedded in a diagram	<ul style="list-style-type: none"> identify which test to use to determine congruence of triangles use the SSS, SAS, AAS and RHS tests to determine if 2 or more triangles are congruent use the congruency tests (SSS, SAS, AAS, RHS) to identify a pair of congruent triangles from a selection of 3 or more triangles or from triangles embedded in a diagram
Learning Journeys Using properties of congruent triangles			
MG.F.7 Establish properties of quadrilaterals using congruent triangles and angle properties, and solve related numerical problems using reasoning	1	Applying the properties of congruent triangles to find an unknown side and/or angle in a diagram, giving a reason	<ul style="list-style-type: none"> apply the properties of congruent triangles to determine a missing angle or length by observing a congruent triangle that has the matching length or angle

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Angle relationships			
Learning Journeys Geometry conventions			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.1 Use the language, notation and conventions of geometry	1	Using the language and conventions of geometry	<ul style="list-style-type: none">define, name, label and draw points using capital lettersdefine, name, label and draw lines using capital lettersdefine, name, label and draw rays using capital lettersdefine, name, label and draw line segments using capital lettersdefine, name, label and draw angles using capital lettersname, label and draw triangles using capital lettersname, label and draw quadrilaterals and other polygons using capital lettersuse common conventions to label right angles and equal angles on diagramsuse common conventions to label equal line segments on diagrams
Learning Journeys Angles at a point			
MG.G.2 Recognise the geometrical properties of angles at a point	1	Investigating and defining complementary angles	<ul style="list-style-type: none">investigate, with and without digital technology, adjacent angles that form a right angle and establish that they add to 90°define complementary angles and identify them in diagrams
		Calculating complementary angles	<ul style="list-style-type: none">calculate the size of an unknown angle in a diagram and explain how this is done (using complementary angles)
		Investigating and defining supplementary angles	<ul style="list-style-type: none">investigate, with and without digital technology, adjacent angles that form a straight angle and establish that they add to 180°define supplementary angles and identify them in diagrams
		Calculating supplementary angles	<ul style="list-style-type: none">calculate the size of an unknown angle in a diagram and explain how this is done (using supplementary angles)
	2	Investigating and identifying adjacent angles	<ul style="list-style-type: none">investigate features of adjacent anglesidentify adjacent angles within a diagram
	3	Investigating angles at a point that form angles of revolution	<ul style="list-style-type: none">investigate, with and without digital technology, angles at a point that form an angle of revolution and establish that they add to 360°
		Calculating where angles form a revolution	<ul style="list-style-type: none">calculate the size of an unknown angle in a diagram and explain how this is done (using knowledge of angles that add to 360°)understand the ambiguity when labelling the reflex angle when 2 angles make up an angle of revolution
	4	Identifying and naming right angles, straight angles, vertically opposite angles and angles of complete revolution embedded in diagrams	<ul style="list-style-type: none">identify and name right angles, straight angles, vertically opposite angles and angles of complete revolution embedded in diagrams
	5	Applying geometric reasoning for adjacent angle relationships	<ul style="list-style-type: none">apply theorems of complementary angles, supplementary angles, vertically opposite and adjacent angles, calculating unknown anglesapply theorems for adjacent angles represented by variables in multi-step problems, writing equations to solve for an unknown angle, checking the reasonableness of the answerapply theorems of complementary angles, supplementary angles, vertically opposite and adjacent angles in multi-step problems, calculating unknown angles and stating all relationships used

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Angle relationships			
Learning Journeys Parallel and perpendicular line conventions			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.3 Identify corresponding, alternate and co-interior angles when two straight lines are crossed by a transversal	1	Identifying perpendicular and parallel lines	<ul style="list-style-type: none"> name and record perpendicular lines using the conventional notation name and record perpendicular lines using the conventional notation define parallel lines and identify them in pictures, designs, diagrams and the environment, using conventional notation to mark them name and record parallel lines using the conventional notation
Learning Journeys Angle relationships on parallel lines			
MG.G.3 Identify corresponding, alternate and co-interior angles when two straight lines are crossed by a transversal	1	Exploring special pairs of angles on parallel lines	<ul style="list-style-type: none"> define, identify and draw transversals on sets of 2 or more parallel lines explore, through measurement, the relationships between pairs of angles formed when a transversal is drawn on a pair of parallel lines define and identify pairs of equal corresponding angles when 2 or more parallel lines are cut by a transversal define and identify pairs of equal alternate angles when 2 or more parallel lines are cut by a transversal define and identify pairs of supplementary co-interior angles when 2 or more parallel lines are cut by a transversal
	2	Applying geometric reasoning with corresponding angles on parallel lines	<ul style="list-style-type: none"> apply geometric reasoning with corresponding angles on parallel lines use corresponding angles on parallel lines to calculate unknown angles represented by variables
	3	Applying geometric reasoning with alternate angles on parallel lines	<ul style="list-style-type: none"> apply geometric reasoning with alternate angles on parallel lines use alternate angles on parallel lines to calculate unknown angles represented by variables
	4	Applying geometric reasoning with co-interior angles on parallel lines	<ul style="list-style-type: none"> apply geometric reasoning with co-interior angles on parallel lines use co-interior angles on parallel lines to calculate unknown angles represented by variables
	5	Applying geometric reasoning with angles on parallel lines by choosing the appropriate angle relationship	<ul style="list-style-type: none"> apply geometric reasoning with angles on parallel lines by choosing the appropriate angle relationship choose and apply the appropriate angle property to calculate unknown angles on parallel lines represented by variables
Learning Journeys Proving parallel lines			
MG.G.4 Investigate conditions for two lines to be parallel	1	Understanding that corresponding, alternate and co-interior angles are not limited to when a transversal cuts a set of parallel lines	<ul style="list-style-type: none"> understand that corresponding, alternate and co-interior angles are not limited to when a transversal cuts a set of parallel lines
	2	Proving lines are parallel	<ul style="list-style-type: none"> prove or disprove that a pair of lines are parallel using the relationships between corresponding angles, alternate angles, and co-interior angles

NSW Curriculum

Stage 4

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Angle relationships			
Learning Journeys Geometric reasoning using angle properties			
Content Descriptor	Steps	Spine Nodes	Subnodes
MG.G.5 Solve simple numerical problems using reasoning	1	Applying geometric reasoning with angles at a point and angles on parallel lines	<ul style="list-style-type: none">• apply theorems of angles at a point and angles on parallel lines to solve numerical geometric problems involving up to 3 theorems/steps, giving a reason for each step of the solution
Quest: Interpreting and representing data			
Learning Journeys Collecting data			
SP.A.1 Investigate techniques for collecting data, including census, sampling and observation	1	Classifying data/recognising variables as categorical (qualitative) or numerical (quantitative) - either discrete or continuous	<ul style="list-style-type: none">• identify examples of categorical variables (eg colour, gender) discrete numerical variables (eg number of students, shoe size) and continuous numerical variables (eg height, weight)• recognise that data collected on a rating scale (Likert-type scale) is categorical, eg 1 = dislike, 2 = neutral, 3 = like
	2	Recognising and explaining the difference between a 'population' and a 'sample' selected from a population when collecting data	<ul style="list-style-type: none">• recognise and explain the difference between a 'population' and a 'sample' selected from a population when collecting data
	3	Investigating and determine the differences between collecting data by observation, census and sampling	<ul style="list-style-type: none">• identify examples of variables for which data could be collected by observation, eg direction travelled by vehicles arriving at an intersection, native animals in a local area• identify examples of variables for which data could be collected by a census or by a sample, eg a census to collect data about the income of Australians, a sample for TV ratings• discuss the practicalities of collecting data through a census compared to a sample, including limitations due to population size, eg in countries such as China and India, a census is conducted only once per decade
Learning Journeys Exploring data sampling			
SP.A.2 Explore the practicalities and implications of obtaining data through sampling using a variety of investigative processes	CLASSROOM BASED		
Learning Journeys The relationship between a sample & the population			
SP.A.2 Explore the practicalities and implications of obtaining data through sampling using a variety of investigative processes	1	Using samples to make predictions about a larger 'population' from which the sample comes	<ul style="list-style-type: none">• use samples to make predictions about a larger 'population' from which the sample comes• discuss whether a prediction about a larger population, from which a sample comes, would be the same if a different sample were used
	2	Inferring properties of populations or distributions from a sample, whilst knowing the limitations of sampling	<ul style="list-style-type: none">• infer properties of populations or distributions from a sample, whilst knowing the limitations of sampling
		Investigating ways in which different random samples may be drawn from the same population	<ul style="list-style-type: none">• investigate ways in which different random samples may be drawn from the same population, eg random samples from a census may be chosen by gender, postcode, state, etc

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Interpreting and representing data			
Learning Journeys Issues with data from primary & secondary sources			
Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.3 Identify and investigate issues involving numerical data collected from primary and secondary sources	1	Identifying and investigating issues involving numerical data collected from primary and secondary sources	<ul style="list-style-type: none"> identify and investigate issues involving numerical data collected from primary and secondary sources identify the difference between data collected from primary and secondary sources, eg data collected in the classroom compared with data drawn from a media source
	2	Exploring issues involved in constructing and conducting surveys, such as sample size, bias, type of data required, and ethics	<ul style="list-style-type: none"> discuss the effect of different sample sizes describe, in practical terms, how a random sample may be selected in order to collect data about a matter of interest detect and discuss bias, if any, in the selection of a sample explore issues around the type of data collected in a survey explore the ethics involved in constructing and conducting surveys
Learning Journeys Collecting and interpreting data			
SP.A.3 Identify and investigate issues involving numerical data collected from primary and secondary sources	1	Constructing appropriate survey questions and a related recording sheet in order to collect both numerical and categorical data about a matter of interest	<ul style="list-style-type: none"> construct a recording sheet that allows efficient collection of the different types of data expected refine questions in a survey after trialling the survey decide whether a census or a sample is more appropriate to collect the data required to investigate the matter of interest
	2	Collecting and interpreting information from secondary sources, presented as tables and/or graphs, about a matter of interest	<ul style="list-style-type: none"> collect and interpret information from secondary sources, presented as tables and/or graphs, about a matter of interest, eg sporting data, information about the relationship between wealth or education and the health of populations of different countries interpret and use scales on graphs, including those where abbreviated measurements are used, eg '50' on a vertical axis representing thousands is interpreted as '50 000' analyse a variety of data displays used in the print or digital media and in other school subject areas, eg share movement graphs, data displays showing sustainable food production identify features on graphical displays that may mislead and result in incorrect interpretation, eg displaced zeros, the absence of labelling on 1 or both axes, potentially misleading units of measurement
	3	Using spreadsheets or statistical software packages to tabulate and graph data	<ul style="list-style-type: none"> use spreadsheets or statistical software packages to tabulate and graph data
	4	Discussing ethical issues that may arise from collecting and representing data	<ul style="list-style-type: none"> discuss ethical issues that may arise from collecting and representing data
Learning Journeys Tallies and frequency distribution tables			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Using a tally to organise data into a frequency distribution table	<ul style="list-style-type: none"> use a tally to organise data into a frequency distribution table

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Interpreting and representing data			
Learning Journeys Frequency histograms and polygons			
Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting a discrete data set from its histogram and polygon	<ul style="list-style-type: none"> interpret a discrete data set from its histogram and polygon
	2	Constructing and interpreting frequency histograms and polygons	<ul style="list-style-type: none"> construct and interpret frequency histograms and polygons select and use appropriate scales and labels on horizontal and vertical axes recognise why a half-column-width space is necessary between the vertical axis and the first column of a histogram
Learning Journeys Frequency histograms and polygons: grouped data			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting a discrete data set from its histogram and polygon where grouping is required	<ul style="list-style-type: none"> interpret a discrete data set from its histogram and polygon where grouping is required
	2	Constructing histograms for discrete data sets where grouping is required	<ul style="list-style-type: none"> construct histograms for discrete data sets where grouping is required
	3	Constructing combined histograms and polygons for discrete data sets where grouping is required	<ul style="list-style-type: none"> construct combined histograms and polygons for discrete data sets where grouping is required
Learning Journeys Dot plots			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting dot plots	<ul style="list-style-type: none"> interpret dot plots
	2	Constructing dot plots	<ul style="list-style-type: none"> construct dot plots explain the importance of aligning data points when constructing dot plots
Learning Journeys Ordered stem-and-leaf plots			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting ordered stem-and-leaf plots with whole numbers and simple decimal values	<ul style="list-style-type: none"> interpret ordered stem-and-leaf plots with whole numbers and simple decimal values
	2	Constructing ordered stem-and-leaf plots with whole numbers	<ul style="list-style-type: none"> construct ordered stem-and-leaf plots with whole numbers only
	3	Constructing ordered stem-and-leaf plots with whole numbers and simple decimal values	<ul style="list-style-type: none"> construct ordered stem-and-leaf plots with whole numbers and simple decimal values
Learning Journeys Divided bar graphs			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting divided bar graphs	<ul style="list-style-type: none"> interpret divided bar graphs
	2	Constructing divided bar graphs with the use of digital technology	<ul style="list-style-type: none"> construct divided bar graphs with the use of digital technology
	3	Constructing divided bar graphs without the use of digital technology	<ul style="list-style-type: none"> construct divided bar graphs without the use of digital technology calculate the length of the bar required for each section of divided bar graphs

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Interpreting and representing data			
Learning Journeys Sector graphs			
Content Descriptor	Steps	Spine Nodes	Subnodes
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting sector graphs	<ul style="list-style-type: none"> interpret sector graphs
	2	Constructing sector graphs with the use of digital technology	<ul style="list-style-type: none"> construct sector graphs with the use of digital technology
	3	Constructing sector graphs without the use of digital technology	<ul style="list-style-type: none"> construct sector graphs without the use of digital technology calculate the angle at the centre required for each sector of sector graphs
Learning Journeys Line graphs			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting line graphs	<ul style="list-style-type: none"> interpret line graphs
	2	Constructing line graphs with the use of digital technology	<ul style="list-style-type: none"> construct line graphs with the use of digital technology
Learning Journeys Interpreting a variety of different graphs			
SP.A.4 Construct and compare a range of data displays, including stem-and-leaf plots and dot plots	1	Interpreting a variety of graphs, including dot plots, stem-and-leaf plots, divided bar graphs, sector graphs and line graphs	<ul style="list-style-type: none"> interpret a variety of graphs, including dot plots, stem-and-leaf plots, divided bar graphs, sector graphs and line graphs calculate the percentage of the whole represented by different categories in a divided bar graph or sector graph draw conclusions from data displayed in a graph, eg 'The graph shows that the majority of Year 8 students who play a musical instrument play a string instrument' critique ways in which data is presented in sector graphs, line graphs, bar graphs and pictographs
Quest: Analysing single sets of data			
Learning Journeys Calculating the mean			
SP.B.1 Calculate mean, median, mode and range for sets of data and interpret these statistics in the context of data	1	Calculating the mean of a set of data using mean = sum of data values/number of data values	<ul style="list-style-type: none"> calculate the mean of a set of data using mean = sum of data values/number of data values recognise that the mean is often referred to as the 'average' in everyday language identify that the bar notation represents the mean score for a set of data (\bar{x})
	2	Using the statistical functions of a spreadsheet to determine the mean for large sets of data	<ul style="list-style-type: none"> use the statistical functions of a spreadsheet to determine the mean for large sets of data
Learning Journeys Median mode and range			
SP.B.1 Calculate mean, median, mode and range for sets of data and interpret these statistics in the context of data	1	Determining the median for sets of data without the use of digital technology	<ul style="list-style-type: none"> determine the median for sets of data without the use of digital technology and containing an odd number of scores determine the median for sets of data without the use of digital technology and containing an even number of scores
	2	Determining the mode for sets of data without the use of digital technology	<ul style="list-style-type: none"> determine the mode for sets of data without the use of digital technology

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-18MG identifies and uses angle relationships, including those related to transversals on sets of parallel lines			
Quest: Analysing single sets of data			
Learning Journeys Median mode and range			
Content Descriptor	Steps	Spine Nodes	Subnodes
SP.B.1 Calculate mean, median, mode and range for sets of data and interpret these statistics in the context of data	3	Determining the range for sets of data without the use of digital technology	<ul style="list-style-type: none">determine the range for sets of data without the use of digital technology
	4	Determining the median, mode and range for sets of data using digital technology	<ul style="list-style-type: none">determine the median, mode and range for sets of data using digital technologyuse the statistical functions of a spreadsheet to determine the median, mode and range for large sets of data
SP.B.1 Calculate mean, median, mode and range for sets of data and interpret these statistics in the context of data	CLASSROOM BASED		
Learning Journeys Clusters, gaps and outliers in data			
SP.B.2 Investigate the effect of individual data values, including outliers, on the mean and median	1	Identifying any clusters, gaps and outliers in sets of data	<ul style="list-style-type: none">identify any clusters, gaps and outliers in sets of dataidentify any clusters, gaps and outliers in sets of data when represented in different displays
	2	Investigating the effect of outliers on the mean, median, mode and range by considering a small set of data and calculating each measure, with and without the inclusion of an outlier	<ul style="list-style-type: none">investigate the effect of outliers on the mean, median, mode and range by considering a small set of data and calculating each measure, with and without the inclusion of an outlierexplain why it is more appropriate to use the median than the mean when the data contains 1 or more outliersdetermine situations when it is more appropriate to use the median or mode, rather than the mean, when analysing data, eg median for property prices, mode for shoe sizes
Learning Journeys Using mean, median, mode to analyse data displays			
SP.B.3 Describe and interpret data displays using mean, median and range	1	Calculating measures of location (mean, median and mode) and the range for data represented in a variety of statistical displays, including frequency distribution tables, frequency histograms, stem-and-leaf plots and dot plots	<ul style="list-style-type: none">Calculating measures of location (mean, median and mode) and the range for data represented in a variety of statistical displays, including frequency distribution tables, frequency histograms, stem-and-leaf plots and dot plots
	2	Drawing conclusions based on the analysis of data displays using the mean, median and/or mode, and range	<ul style="list-style-type: none">draw conclusions based on the analysis of data displays using the mean, median and/or mode, and range
SP.B.4 Explore the variation of means and proportions of random samples drawn from the same population	CLASSROOM BASED		

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-21SP represents probabilities of simple and compound events

Quest: Understanding probability

Learning Journeys Language of chance experiments

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.C.1 Construct sample spaces for single-step experiments with equally likely outcomes	1	Understanding the language around chance	<ul style="list-style-type: none"> understand that the term 'chance experiment' is used when referring to actions such as tossing a coin, rolling a dice or randomly selecting an object from a bag understand that the term 'outcome' is used to describe a possible result of a chance experiment and list all of the possible outcomes for a single-step experiment understand that the term 'sample space' is used to describe a list of all of the possible outcomes for a chance experiment use the term 'probability' to describe the numerical value that represents the likelihood of an outcome of a chance experiment arrange the likelihood of chance experiment outcomes in order from least likely to most likely (and vice versa)

Learning Journeys Sample spaces

SP.C.1 Construct sample spaces for single-step experiments with equally likely outcomes	1	Identifying equally likely outcomes in single-step chance experiments	<ul style="list-style-type: none"> identify equally likely outcomes in single-step chance experiments
	2	Identifying the sample space for a probability experiment involving 1 event	<ul style="list-style-type: none"> identify the sample space for a probability experiment involving 1 event
	3	Identifying the sample space for a probability experiment involving 2 independent events	<ul style="list-style-type: none"> identify the sample space (where the combined sample space has 36 or fewer elements) for a probability experiment involving 2 independent events
	4	Listing the outcomes for chance experiments where the outcomes are not equally likely to occur and assign probabilities to the outcomes using fractions	<ul style="list-style-type: none"> list the outcomes for chance experiments where the outcomes are not equally likely to occur and assign probabilities to the outcomes using fractions

Learning Journeys Chance experiments

SP.C.1 Construct sample spaces for single-step experiments with equally likely outcomes	1	Describing single-step chance experiments in which the outcomes are equally likely	<ul style="list-style-type: none"> describe single-step chance experiments in which the outcomes are equally likely use the terms 'chance experiment', 'outcome' and 'sample space' appropriately for experiments in which the outcomes are equally likely
	2	Describing single-step chance experiments in which the outcomes are equally and not equally likely	<ul style="list-style-type: none"> describe single-step chance experiments in which the outcomes are equally and not equally likely use the terms 'chance experiment', 'outcome' and 'sample space' appropriately for experiments in which the outcomes are equally and not equally likely
	3	Creating and conducting a chance experiment given equally probable events	<ul style="list-style-type: none"> create a chance experiment given equally probable events determine the theoretical probability of a series of events using tree diagrams conduct the chance experiment with both small and large numbers of trials using digital technologies compare the expected probabilities with the observed probabilities after both small and large numbers of trials for the chance experiment given equally probable events

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-21SP represents probabilities of simple and compound events

Quest: Understanding probability

Learning Journeys Chance experiments

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.C.1 Construct sample spaces for single-step experiments with equally likely outcomes	4	Creating and conducting a chance experiment given unequally probable events	<ul style="list-style-type: none"> determine the theoretical probability of a series of unequally probable events using tree diagrams compare the expected probabilities with the observed probabilities after both small and large numbers of trials, given unequally probable events

Learning Journeys Language of probability

SP.C.2 Assign probabilities to the outcomes of events and determine probabilities for events	1	Recognising that a probability of 0 is for events that are impossible and a probability of 1 for events that are certain to occur	<ul style="list-style-type: none"> recognise that a probability of 0 is for events that are impossible and a probability of 1 for events that are certain to occur
	2	Relating calculated probabilities with the language of chance and the likelihood number line	<ul style="list-style-type: none"> relate calculated probabilities with the language of chance and the likelihood number line
	3	Assigning numerical probabilities with their associated language	<ul style="list-style-type: none"> assign language such as impossible, highly unlikely, unlikely, even chance, likely, highly likely and certain to the known probabilities of outcomes occurring allocate words such as impossible, highly unlikely, unlikely, even chance, likely, highly likely and certain along a number line from 0 to 1 representing their respective probabilities

Learning Journeys Understanding basic probability

SP.C.2 Assign probabilities to the outcomes of events and determine probabilities for events	1	Explaining the meaning of 0, 1/2 and 1 in a given chance situation, using the language of chance	<ul style="list-style-type: none"> explain the meaning of 0, 1/2 and 1 in a given chance situation, using the language of chance
	2	Applying probabilities to simple events by reasoning about equally likely outcomes	<ul style="list-style-type: none"> apply probabilities to simple events by reasoning about equally likely outcomes
	3	Expressing the theoretical probability of an event formally	<ul style="list-style-type: none"> express the theoretical probability of an event, given a number of equally likely outcomes in the sample space, as $P(\text{event}) = \text{number of favourable outcomes} \div \text{total number of outcomes}$
	4	Expressing probabilities as decimals, fractions and percentages	<ul style="list-style-type: none"> express probabilities as decimals, fractions and percentages
		Interpreting probabilities expressed as fractions, percentages or decimals	<ul style="list-style-type: none"> interpret probabilities expressed as fractions, percentages or decimals
	5	Calculating the probability of an event of a single-step experiment using cards, dice, spinners, etc	<ul style="list-style-type: none"> calculate the probability of an event of a single-step experiment using cards, dice, spinners, etc

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-21SP represents probabilities of simple and compound events

Quest: Understanding probability

Learning Journeys Complementary events

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.C.3 Identify complementary events and use the sum of probabilities to solve problems	1	Understanding the term 'complement' to describe events that are mutually exclusive and add to 1	<ul style="list-style-type: none"> understand the term 'complement' to describe events that are mutually exclusive and add to 1
	2	Finding the complement of an event	<ul style="list-style-type: none"> find the probability of the complement of an event by using the fact that the sum of the probabilities of an event and its complement is 1
	3	Identifying the complementary event for a given event, and calculating the theoretical probability that a given event will not occur	<ul style="list-style-type: none"> identify the complementary event for given event, and calculate the theoretical probability that a given event will not occur describe in words the complement of an event

Learning Journeys Language of probability to describe events

SP.C.4 Describe events using language of 'at least', exclusive 'or' (A or B but not both), inclusive 'or' (A or B or both) and 'and'	1	Describing events using language of 'at least', exclusive 'or' (A or B but not both), inclusive 'or' (A or B or both) and 'and' (both A and B)	<ul style="list-style-type: none"> describe events using language of 'at least', exclusive 'or' (A or B but not both), inclusive 'or' (A or B or both) and 'and' (both A and B) recognise the difference between mutually exclusive and non-mutually exclusive events
	2	Describing compound events using the terms 'at least', 'at most', 'not' and 'and'	<ul style="list-style-type: none"> describe compound events using the terms 'at least', 'at most', 'not' and 'and'
	3	Posing problems that involve the use of the terms 'at least', 'at most', 'not', 'and' and solve problems posed by others	<ul style="list-style-type: none"> pose problems that involve the use of the terms 'at least', 'at most', 'not', 'and' solve problems posed by others that involve the use of the terms 'at least', 'at most', 'not', 'and'
	4	Understanding the effect of the use of 'and' and 'or' when using internet search engines	<ul style="list-style-type: none"> understand the effect of the use of 'and' and 'or' when using internet search engines
		Classifying compound events	<ul style="list-style-type: none"> classify compound events using inclusive 'or' and exclusive 'or' recognise that the word 'or' on its own often needs a qualifier, such as 'both' or 'not both', to determine inclusivity or exclusivity

Learning Journeys Understanding and constructing Venn diagrams

SP.C.5 Represent events in two-way tables and Venn diagrams and solve related problems	1	Interpreting Venn diagrams involving two or three mutually exclusive attributes	<ul style="list-style-type: none"> interpret Venn diagrams involving two or three mutually exclusive attributes describe regions in Venn diagrams representing mutually exclusive attributes
	2	Interpreting Venn diagrams involving two or three non-mutually exclusive attributes	<ul style="list-style-type: none"> interpret Venn diagrams involving two or three non-mutually exclusive attributes describe individual regions or combinations of regions in Venn diagrams representing non-mutually exclusive attributes, using the language 'and', exclusive 'or', inclusive 'or', 'neither' and 'not'
	3	Representing events in Venn diagrams	<ul style="list-style-type: none"> represent events of 2 or 3 attributes using Venn diagrams
		Constructing Venn diagrams to represent all possible combinations of 2 attributes from given or collected data	<ul style="list-style-type: none"> construct Venn diagrams to represent all possible combinations of 2 attributes from given or collected data

Understanding Practice and Fluency (UPF)

Measurement and Geometry

MA4-21SP represents probabilities of simple and compound events

Quest: Understanding probability

Learning Journeys Using Venn diagrams to solve problems

Content Descriptor	Steps	Spine Nodes	Subnodes
SP.C.5 Represent events in two-way tables and Venn diagrams and solve related problems	1	Using data presented in venn diagrams to answer problems, including probability questions	<ul style="list-style-type: none"> use data presented in venn diagrams to answer problems, including probability questions
	2	Using given data to calculate missing values in a Venn diagram	<ul style="list-style-type: none"> use given data to calculate missing values in a Venn diagram
	3	Using data presented in venn diagrams to answer problems where missing values must first be found, including probability questions	<ul style="list-style-type: none"> use data presented in venn diagrams to answer problems where missing values must first be found, including probability questions

Learning Journeys Interpreting and constructing two-way tables

SP.C.5 Represent events in two-way tables and Venn diagrams and solve related problems	1	Interpreting given two-way tables representing non-mutually exclusive attributes	<ul style="list-style-type: none"> interpret given two-way tables representing non-mutually exclusive attributes describe relationships displayed in two-way tables using the language 'and', exclusive 'or', inclusive 'or', 'neither' and 'not'
	2	Constructing two-way tables to represent the relationships between attributes	<ul style="list-style-type: none"> construct two-way tables to represent the relationships between attributes
	3	Using data presented in two-way tables to answer problems, including probability questions	<ul style="list-style-type: none"> use data presented in a two-way table to answer problems, including probability questions
	4	Using given data to calculate missing values in a two-way table	<ul style="list-style-type: none"> use given data to calculate missing values in a two-way table
	5	Using data presented in two-way tables to answer problems where missing values must first be found, including probability questions	<ul style="list-style-type: none"> use data presented in two-way tables to answer problems where missing values must first be found, including probability questions

Learning Journeys Two-way tables and Venn diagrams

SP.C.5 Represent events in two-way tables and Venn diagrams and solve related problems	1	Converting between representations of the relationships between 2 attributes in Venn diagrams and two-way tables	<ul style="list-style-type: none"> convert between representations of the relationships between 2 attributes in Venn diagrams and two-way tables
